

Rules to create and maintain the documentation

1

Create a structure for a new application

Create the structure of the new application in 5 steps

1. [Create the page "Application Overview"](#)
2. [Create the page "Application Get Started"](#)
3. [Create the page "Application FAQ"](#)
4. [Create the page "Application How-to"](#)
5. [Create the page "Application Troubleshooting"](#)

2

Create and maintain the documentation of the application

Once the structure of the application is created you can [Create and maintain the documentation of an application](#)

3

Add the application to the home page

Once the documentation of the application is created, you must [Add the application on the home page](#)
