

Qlikview Access Point Sign in

Problem

When accessing the Qlikview access point, the page requests a sign in with a user and password.

Normally qlikview will not ask you to log in and will automatically recognise you based on your windows account.

The image shows a web form for signing into Qlikview. On the left is a large, stylized green 'Q' logo with a white center, set against a light gray background. To the right of the logo, the text 'Sign In' is displayed in a green font. Below this, there are two input fields: 'User Name:' followed by a white text box, and 'Password:' followed by a white text box. Below the password field is a green button with the word 'Submit' in white text.

Solution

This can happen randomly due to internet browser configuration. You do not need to enter a user name or password. * imply click on Submit and it will log you in.*
