

# Drilldown/change of dimension not working

## Problem

When you click on the Arrow icon in a dashboard, it does nothing when normally it should change the drill down, or propose a selection of dimensions to use.

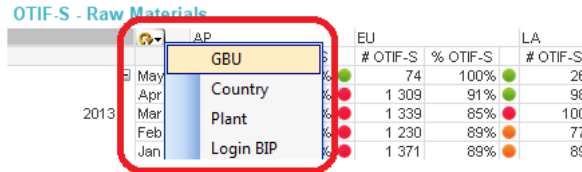

- What you are getting (nothing happens when you click on the arrow) :

OTIF-S - Raw Materials

		# OTIF-S	% OTIF-S	OTIF-S
2013	Apr	380	96%	●
	Mar	387	93%	●
	Feb	305	92%	●
	Jan	373	92%	●
2012	Dec	320	93%	●
	Nov	313	91%	●

- What you should get (able to choose the dimension when you click on the arrow) :

OTIF-S - Raw Materials

	AP	EU	LA	
	# OTIF-S	% OTIF-S	# OTIF-S	
2013	May	74	100%	2€
	Apr	1 309	91%	9€
	Mar	1 339	85%	10€
	Feb	1 230	89%	7€
	Jan	1 371	89%	8€

## Solution

This usually happens if you are using the "Full Browser" client instead of the "Internet Explorer Plug-In" client. The full browser uses java to display the dashboard and some functionalities don't work properly, or not the same way. See in the FAQ how to verify [which client you are using](#) and [how to modify it](#).
