

How to Display Technical Name of a Query

1. Open the [Design panel](#)
2. Go to "Information" tab at the bottom of Design panel. Query Technical name will be present at the Information area

The screenshot shows the SAP Analysis tool interface. At the top, the 'Information for:' dropdown is set to 'CBS - Functions by Companies - end of month (Core query)'. Below this, the 'Data Source Name' is 'CBS - Functions by Companies - end of month (Core query)'. The 'Key Date' is 'Tuesday, April 11, 2017' and the 'Last Data Update' is 'Thursday, February 16, 2017 9:52:47 AM'. A 'Filter' section is visible with the following details:

- 1 Organisation**
