

SAP - Production BW/BOBJ System Access Information

After client has received access to PB1 Business Warehouse (BW / BOBJ) and the e-mail with their credentials, they have to first reset their BW (Business Warehouse) password by logging onto PB1 Production BW via SAP GUI (this has to be only after they change their password through the SAP self-service site).

1. This step has to be done only if you've reset password through SAP Self-Service site or are a new user.
Open **PB1 - Production BW** from **SAP GUI** and log on with your temporary password. Change the password to a permanent one as requested.
