

SAP - Error: Scripting Not Enabled

Issue

When uploading by Z-Option in SAP, it shows an error "**Scripting Not Enabled**" (see below screen shot). It may happen even if the user has already enabled scripting.

Resolution

This is a known issue with the SAP GUI. Advise client to turn it "OFF" and then hit "apply" and turn it back "ON" and select "Apply" it should start working.

1. Go to **Customize Local Layout** [blocked URL](#) (Alt+F12) and select **Options...**
2. Under **Accessibility & Scripting** select **Scripting** and uncheck next to **Enable Scripting** and click on **Apply**
