

SAP - Client Installation

Introduction

Client needs SAP GUI client installed on their computer.

Installation Steps

All employees can install SAP GUI from Software Center. If SAP is not available under any of the tabs, it means it has already been installed.

To install SAP:

- 1. Go to **Start > All Programs > Microsoft System Center > Configuration Manager > Software Center**
[blocked URL](#)*
- 2. From the list of available software select **SAP GUI** and click on **Install** to start the installation. The installation should be available either under **Available Software** or **Installation Status** tabs.
[blocked URL](#)*
- 3. Click on the **Installation Status** tab. You will be able to monitor the installation status from here.*
- 4. The installation will be silent and no interaction will be needed from you.*
- 5. On completion your computer will need to be restarted.
