

Solvay SAP - SAP 7.40 Install / Uninstall

To install Solvay version of SAP (7.40 patch level 7)

1. Check if Cytec SAP (7.40 patch level 2 or any previous versions) is already installed in Programs & Features
2. If yes, manually uninstall it.
3. If installed, SAP BusinessObjects Analysis should also be removed.
4. Reboot
5. Log in to the computer with your credentials and run **SAP GUI 7.40 Install (Profile02)** from the [Application catalog](#). **When using the Application Catalog, be sure that you are the only user logged in to the computer.**
