

SFI (Shop Floor Information)

SFI (shop floor information) system is used at several production sites. The system interfaces with BAAN and Web Apps (Jumppad).

Note: **SFI is unavailable during BAAN maintenance every Sun 2am - 6am EET**

For Location	Down Times In Winter Are	Down Times In Summer Are
GM	Sat 7-11 pm EST	Sat 8pm - midnight EDT
Riga	Sun 2am - 6am EET	Sun 3am - 7am EET
Singapore	Sun 7am - 11am SGT	Sun 8am - 12pm SGT

- The system interfaces with BAAN and Web Apps (Jumppad). SFI can be accessed via <http://sfi.cytec.com> (new NIST-compliant server) or <http://fasrfg01/sfi/master/> (old, non-compliant server). The site only works from Internet Explorer.
- After opening the link, users must click **Click Here to Restart Application** and then log on with their Jumppad username and password.
- **The most important thing** to capture the error message, the activity the client was attempting to perform, when the error occurred, and order / PO / PN / lot numbers.
