

2.03/ Portfolio of work orders by status

/ Definition

Total number of work orders not still finished classed by status.

2/ Objective / Target

The main objective of a SolWOM transformation is to improve the efficiency of maintenance process. The portfolio of work orders will allow us to know if we have increased our efficiency.

The evolution of this indicator is related directly to the workforce in the site and to their efficiency. The value of the indicator is not as important as its evolution.

Example of a good target (Benchmark SolMaX): The number of WO correspondant of Maxi 8 week of WO completion

3/ Formula

Number of work orders by status : work orders not still completed* by status

* completed work orders

system status = TECO or CLSD

4/ Frequency

Weekly

5/ SAP extraction and detailed calculation

The list of all work orders which are not still finished should be extracted from SAP, all user status and work order status included.

We exclude completed work orders : system status = TECO or CLSD

I : Include / E : Exclude

Field name	From	To	I/E
Order system status PF1	TECO, CLSD		E
Order system status RCS	TECO, CLSD		E
