

Job Monitoring OtC

OTC Tickets on Job Monitoring / Cancelled updates

This document shows the process of analyzing and resolving the job monitoring tickets

There are two types of tickets that we receive on the cancelled updates / Job Monitoring

- **Type ONE** : It refers to the procedure that has to be followed for the tickets with the title **CANCELLED UPDATES- WP1_400 / CANCELLED UPDATES- PF1_020**

1. Go in the ticket and read the details of the ticket like the client, the transaction code, the user etc

[blocked URL](#)

2. Goto the tcode SM13

The screenshot shows the 'Update Requests: Initial Screen' in SAP. The window title is 'Update Requests: Initial Screen'. The interface includes a toolbar with various icons. The main area contains several input fields and a status selection section. The 'Client' field has a dropdown arrow and a small icon. The 'User' field has a dropdown arrow and a small icon. The 'Status' section has radio buttons for 'Canceled', 'To be updated', 'V1 executed', 'V2 Executed', and 'All' (selected). There is also a 'Global View' checkbox. The 'Selection' section has 'From date' (15.06.2017) and 'To date' (empty) fields, 'From time' (00:00:00) and 'To time' (00:00:00) fields, 'Maximum no. records' (99.999), and 'Update server' (empty). At the bottom, there is an 'Update System' button with a gear icon and a label 'Administration', and a status bar showing 'Update is active'.

3. Now enter the details of Client and Username and date from the ticket and execute

4. Remove the entries displayed with SM13 and send a mail to the user identified in the ticket.

Request him to double check that his update is well done and if not, don't forget to suggest him to try again.

If the volume of the update is greater than 20, change the group to ' IS-CGI-L2-OTC ' and solve the ticket as you usually do.

Please also intimate partnership coordinator(Stephane Martinez) and stream leader about this issue

- a) For this example, in this ticket, there are 6 results with status as error as shown in the following screenshot

Cnt	User	Date	Time	TCODE	I	n	f	o	Status
400	WFTAN	07.06.2017	02:08:23	MIGO					Error
400	WFTAN	07.06.2017	01:44:48	MIGO					Error
400	WFTAN	06.06.2017	10:01:21	MIGO					Error
400	WFTAN	05.06.2017	10:27:51	VT02N					Error
400	WFTAN	25.05.2017	10:16:36	VT02N					Error
400	WFTAN	25.05.2017	09:35:03	VT02N					Error
400	WFTAN	25.05.2017	08:54:52	VT02N					Error
400	WFTAN	25.05.2017	04:25:49	VT02N					Error
400	WFTAN	25.05.2017	01:59:23	VT02N					Error

- b) Select all them and delete the records

c) Click on continue

d) Now, Send a mail to the user identified in the ticket and request him to double check that his update is well done and if not, don't forget to suggest him to try again.

5. To identify the user, goto tcode SU01D, and search with the user name provided in the ticket

Then the following details about the user are displayed

Users Edit Goto Information Environment System Help

From this screen, copy the E-Mail of the user and inform the user by forwarding the note to the mentioned e mail of the user

6. Change the status of the ticket to Activities before closure and after 3 days, set the status of the ticket as closed

• **Type TWO** : It refers to the procedure that has to be followed for the tickets with the title **CANCELLED UPDATES- PF1**

1. These tickets must be transferred to the group ' IS-OTC-SD-LE '. For example refer to the following screenshot

Job - PF1-020 - S1EV_020_D_PF1_BILLING

is-adagio-sap-operations-system-mes reported a day ago (Thu, 10 Aug at 3:30 AM) via Email

To: applications-monitoring@solveysbs.freshdesk.com

Cc: is-adagio-sap-operations-system-messages@solvay.com

Hello,

The job **S1EV_020_D_PF1_BILLING** was canceled on PF1-020:

Descr :
Component : OTC
Owner : IS-Appli-OTC-Operations@solvay.com
Restart : Undefined
Can be canceled? : Undefined (=> can be canceled)

1. Start Date / Time : 09.08.2017 / 22:45:04
Last changed : 19.07.2017 / 09:21:04 by DE02350
Job released : 08.08.2017 / 22:45:01 by SAP SYS
Step / Report : 005 / SDBILLDL
Message : Billing date 08.08.2017 date from table ZZV_CTRL_INV_DAT 09.08.2017
