

CK354 - Material XXXX in plant YYY has material status Z4 : Material deleted

Procedure

This error happens when we have a Produced material, and the respective BOM is including a material which is blocked (with status Z4).

The material that appears in the text of the error is the material inside of the BOM, meaning the one which is blocked.

In order to correct the error it's necessary to contact the plant controller to know which is the option that suits better:

- Block the final material (the one we are trying to cost)
- Remove the blocked material from the BOM
- Un-lock the material which is blocked

The screenshot shows the SAP Material Master Display for Material 154301. The title bar reads "Display Material 154301 (Z700-Chemicals (trade))". The material is associated with plant FEB and material status Z4. The "Plant-sp.matl status" field is circled in red, showing the value "Z4". The "Valid from" date is 04.12.2015. The "Profit Center" is F40BXD3X11. The "Quantity structure data" section shows "Alternative BOM" and "Group" fields. The "BOM Usage" field is set to "BOM Usage". The "Costing Lot Size" is 35.000,000. The "Versions" button is visible at the bottom right.
