

Block Obsolete Materials

Tasks to be completed when documenting an operation (from creation to publication)

1. Enter the Title of the operation / page

2. Add the following Labels:

- Scope of applicability: `ww`, `country_accounting`
- Country or group of countries (if applicable): `belux`, `china`, `france`, `italy`, `lam`, `nam,uk_ie`, `bulgaria`, `dach`, `netherlands`, `iberia`, `poland`, `latvia`, `australia`, `india`, `japan`, `south_korea`, `thailand`, `singapore`, `new_zealand`, `emea_transversal`, `apac_transversal`
- Unit and Domain according to the [List of labels to be used in the Finance Service Line space](#)
 - E.g. 1: WW Operation in Financial Accounting under domain "Central Finance Processes & Compliance":
 - Labels to be used: `ww`, `financial_accounting`, `central_fin_proc_compliance`
 - E.g. 2: France Operation in Financial Accounting:
 - Labels to be used: `country_accounting`, `france`, `financial_accounting`

(for country operations, the Domain is always `country_accounting`)

3. Fill in all fields as described above

4. Name the title of each section using OPD methodology naming convention - **Infinitive verb without the “to”, mainly action verb...something**) - " I do something..."

5. Once the description of the operation is completed, ensure it is approved and published by launching the [SBS-Finance approval workflow](#)

Domain: Country Accounting

Responsibility area: N/A

<< Block Obsolete Materials >>

1. Objective and Scope

1.1. Objective of this Operation

With the systems updated and products changes some materials code are not used in the operation anymore. Those materials code must be identified as obsolete and blocked to not be used accidentally in any process. This procedure has the objective to demonstrate how must it be done in the system SAP by the Finance team.

1.2. Scope

This procedure is applied to all companies from Brazil in WP2 system.

2. Definitions

See Finance Glossary:

- [SAP](#)
- [WP2](#)

3. Tasks description

3.1. *I identify obsolete materials*

It's possible to check when need if there are materials that were turned obsoletes. These kind of control will help to avoid mistakes in the process.

How to do it:

Enter in SQ00 in WP2 system.

Go to Environment menu and select "Query areas":

Select "Costing":

Query from User Group COSTING: Initial Screen	
Name	User group name
COSTING	Gpe Utilisateurs Costing

Click twice in Z_ARTICLE and run 

Z_ADDITIVE	list additive costs	KEKOPH
Z_ARTICLE	DONNEES ARTICLE CO/PP (MV)	COSTING
Z_ARTICLE_VIEW	Article Master Views Creation Status	Z_ARTICLE_VIEW

In this section you will need to fill in the information you want to check:

- Plant (Which you want to check)
- Plant-Specific Material Status (Less Z0 - Blocked for all)

Plant-Specific Material Status  **Z0**

DONNEES ARTICLE CO/PP (MV)

Output Format:

☐ SAP List Viewer 

Run 

Check if **'Plant-Specific Material Status'** is added in the layout.

As example it will be used plant 7524 from company code 7523.

You must look for material that starts with ***OBS***, see below:

DONNEES ARTICLE CO/PP (MV)			
Material	Plant	Material description	MS
10455	7524	RHODIASOLV RPDE BULK

Valid from Profit Center 7523-I1050

They must be blocked until second order.

3.2. I block obsolete materials

After identify what are the materials that need to be blocked, you have to effectively block it. To do so enter in transaction [MM02](#) for each material selected, add Z0 at material status and flag 'Do not cost', save it .

This way the material couldn't be used as system will show material blocked.

3.3. I change many materials

If you have many materials to change you can use a file created for massive changes.

To do a mass change in materials through the macro, you can following the steps below:

- Open the file [Template Mass Change Material 'Do not cost & Block Z0'](#)
- Fill in with the materials and plants that you want to change (here you must separate what is marked for deletion or not)
- Open the system WP2, can be initial page
- Click in the button depending the material is marked for deletion or not
- Wait for the macro finish

End of document.
