Next OP*

1. Objective and Scope

1.1. Objective of this Operation

The goal of this operation is to guarantee that, at the end of each month, the results in FI match with the ones in COPA.

1.2. Scope

This procedure is applied to all companies WW.

2. Definitions

See [Finance - Glossary](#)

3. Tasks description

3.1. I run the FI CO reconciliation report:

Go to transaction ZCO_FICO_RCON. Update Company code, fiscal year and posting period:

Click on  and check its execution on transaction SM37.

Once it is done, click on

It will show FI and CO Net Results, their difference, and the possible sources:

A screenshot of the "Reconciliation Report" table. The table has multiple columns including CoCode, Period, FI Net, CO Net, and various difference columns. A red rectangular box highlights a row of data, specifically the columns for FI Net, CO Net, and their difference.

CoCode	Period	FI Net	CO Net	Diff	...
2001	004.2020	34,517,492.54	34,517,402.47	9.07	...

A detailed guide is in the link https://docs.google.com/presentation/d/1OxH84TKYZeXuh7KBikd_3XHkRDv-HtLL7ghPjShnJZU/edit#slide=id.p1.

How to eliminate the differences is indicated in 3.6 below.

If necessary, you may do the detailed analysis described in 3.2 to 3.5

3.2. I run the FI report "net result"

Go to transaction FS10N. Update the company code, the year, and check the result for all BS 98* accounts:

A screenshot of the "G/L Account Balance Display" form. It includes fields for G/L account, Company code (8485), Fiscal year (2019), and Business area. On the right, there is a "Multiple Selection for G/L account" dialog box with tabs for "Select Single Values", "Select Ranges (1)", and "Exclude". The "Select Ranges (1)" tab is active, showing a table with "Lower limit" and "Upper limit" columns. The first row has values 98000000 and 98999999.

O..	Lower limit	Upper limit
	98000000	98999999

Account number	98000000			
To	98999999	Intra-company BAAN		
Company code	8485	SOLVAY SOLUTIONS ESPANA		
Business area				
Fiscal year	2019			
All documents in currency	*	Display currency	EUR	
				
Period	Debit	Credit	Balance	Cumulative balance
Balance Carryf...				
1	64.276.755,60	64.248.610,88	28.144,72	28.144,72
2	47.478.860,76	47.267.812,30	211.048,46	239.193,18
3	48.154.275,70	48.642.030,88	487.755,18-	248.562,00-
4	48.949.394,19	49.093.830,46	144.436,27-	392.998,27-

Go to transaction GR55, report Z4F1. Update the company code, the period, and check the result in heading L12000:

Lead column	Cumul 2
** ZFC-L12000 Profit/Loss for the period	-27.988.136,82

3.3. I run the CO-PA report "net result"

Go to transaction KE30, report ZZZ-SOLV00. Update the company code, the period, and check the result in the Net Result:

P&L Lines	Period	Year
VVM65 Def.withhold.tax R73210	0,00	0,00
VVDO1 Gains-losses DO R85100	0,00	0,00
VVN20 Minority Interes R76000	0,00	0,00
Net Result	27.986.693,69	27.986.693,69

Go to transaction KE30, report ZZZ-SOLV00. Update the company code, the period, and check the result in the Net Result:

ZZZ-SOLV00 Company 8485 SOLVAY SOLUTIONS ESP			
IFRS Periods/Year			
From period	1		
To period	4	Fiscal year	2019
*		Not assigned	
Company Code 8485 SOLVAY SOLUTIONS ESP			
Navigation			
Customer	▲		
Product	.		
Division	.		
Distr. Channel	▼		
P&L Lines	Period	Year	
Net Result	392.998,35	392.998,35	
EBITDA	1.031.593,81	1.031.593,81	
REBITDA	1.031.593,81	1.031.593,81	

3.4. I compare both results

Both amounts must match. If it is not year closing, and the total difference is below 3K local currency, nothing must be done during closing ((Implemented in July /2022 under controller validation reduction - Everyday Close Project)), but must be left to adjust during the rest of the month (before next closing). Else, the actions below must be done during closing.

3.5. I analyse the reason of the discrepancy and take the corresponding corrective action

STEP 1

Display cost centers

Execute report group: Initial Screen

To check if cost centers are balanced, use a cost centers report with transaction **GR55** :

Standard SAP reports that can be used in both systems:

- **1SHK** (= S_ALR_87013615)
- **1SIP** (= S_ALR_87013611)
- **S_ALR_87013635**

In PF1 you can use the following reports inside GR55:

- **ZFC2**
- **ZIAB**

Execute Report Group: Initial Screen

Data extracts Multiple selection

Report Group

Reports 1SHK, 1SIP and transaction S_ALR_87013635: Selection

STEP 2

Enter

1. Controlling area

2. Fiscal year
3. Period
4. Plan version (usually 0)
5. Cost center group or value (to check all the CCTrs from a certain company in PF1 please choose "CC-xxxx" and in WP1 please choose "xxxx", being xxxx0company code)
6. Cost element group (the standard group is ZRCS-FC) or or value, or leave blank
7. Value type = 4 Actual

and Execute

Cost Centers: Breakdown by Partner: Selection

Which cost centers must be balanced at the end of the month ?

- In PF1 :
 - All organizational cost centers = group of cost centers E_cccc
 - All reporting cost centers = group of cost centers cccc
 - All cost centers = group of cost centers CC-cccc
- In WP1 : All cost centers excluding technical cost centers (group CCCC-NA & CCCC-UNL)

Column Delta in Report ZIAB

All lines in Column Delta need to be equal to zero.

STEP 1

Solde total en devise:		EUR	13.407,00			

Tasks to be completed when documenting an SAP Transaction, Report or Message code.

1. Title of the page = SAP Transaction code, SAP Report or SAP Message

2. Add the following Labels, respectively:

- SAP Transaction => "sap_transaction", Transaction code "xxxx"
- SAP Report => "sap_report"
- SAP Message => "sap_msg"

3. On the left section, describe the steps. On the right section, insert respective print screens and additional guidelines, if needed (e.g. Main selections of the transaction...)

STEP 1

Use transaction code:

Go to transaction **Z1K_RECONCILIATION**, and select the Default variant (it's important to use this variant and not create different ones, because IS is constantly updating it with more details that might be useful):

Variant name	Short Description
DEFAULT	Default Variant SPS COGS Check
DEF COGS BACKUP	Check and backup for...

Z1K_RECONCILIATION - Reconciliation of Cost of Goods Sold: Initial Screen

After choosing the variant and adding the company code, it's important to press "Enter" so that you have both periods with the same information:

Operating concern	FO01
Company Code	0270
Calendar year / month	02.2018
Posting Period	1 2018

STEP 2

After running the report you'll have 3 columns:

- Amount in FI
- Amount in COPA
- Tip: for bigger companies, it might be helpful to make a filter in column "difference" excluding the range -1 to 1:

Select:
Difference FI-PA 1,00 to 1,00

Materi	Plant	FI Amount in LC	Difference Kind	PA Amount D
15366		1.768,70	1.768,70	
16654		7.749,60	7.749,60	
19021		15.301,21	15.301,21	
20424		103.361,30	103.361,30	
20425		34.095,40	34.095,40	
23794		11.992,86	11.992,86	
23796		6.968,74	6.968,74	
25930		849,53	849,53	
30156		1.003.095,90	1.003.095,9	
31851		126.654,97	126.654,97	
31859		2.524,94	2.524,94	
31867		306.069,77	306.097,66	27,89
31874		31.630,44	31.630,44	
32490		2.110,08	2.110,08	
35028		70.908,03	70.908,03	
35029		81.575,27	81.675,96	100,69
35030		6.150,70	6.150,70	

How to analyze and correct COGS differences: [click here](#).

All postings done directly in COPA should be avoided. If possible, all necessary corrections must be done in the original CO object.

Anyway, several times it's necessary to make these postings, and therefore we need to guarantee that the total impact in PL of those postings is 0 (or that they were posted to correct already some discrepancy coming from FI - example: from Z1K_Reconciliation).

Go to KE24 and search for manual postings (record type = Z):

Selection Conditions				
Currency type	10	to		
Record type	Z	to		
Period/year	002.2018	to		
Document number		to		
Date created		to		
Reference document number		to		
Entered by		to		
Sender cost center		to		
Cost element		to		
CO order		to		
Sales order		to		
Company code	0270	to		
Customer		to		
Product		to		
Billing date		to		

All postings that we find should have a total amount 0:

- In the same value field - transfer of characteristic (profit center, product, customer, etc)

- In different value fields - transfer of value field (example below)

Several times we are facing manual postings done without any CO Object. This generates differences FI/COPA, so we need to identify them and correct them.

In order to do it, go to transaction SQ00.

Select Environment- Query Areas, and then select the Standard Area.

Then select the User Group "FI_3S_CTB" and run Query "Z_FI_DOC", selecting the company and the period:

Check GL posting without A cost object

Company code to
Document Number to
Fiscal Year to

General selections
Posting date to

After executing you will have all items posted in the respective company without any CO Object (if any), and that most probably will be generating the FI/COPA differences.

Check GL posting without A cost object

CoCd	DocumentNo	G/L	Doc. Type	Year	Pstng Date	Document Header Text	Prof. Seg.	Cost Ctr	WBS Element	Trs	Order	ΣAmount in LC	Text

												-	0,00
												-	0,00

1) Check on CHEF_DUMMY

- How to check:
 - KE24 with variant SPS_001 -> just need to add the relevant company codes
 - KE30 ZZZ-SOLV00 report -> check P&L lines with CHEF_DUMMY PrCtr
- Goal:
 - CHEF_DUMMY PrCtr needs to have balance 0 in all value fields end of the month. Take into account that the original posting and corrections may be done with different posting dates.
- To reduce the number of future cases we should identify the reason for the CHEF_DUMMY PrCtr assignment. Most of the times it is due to missing PrCtr in the material master data (view General Plant Data / Storage 2 OR Costing1), so in this case it's necessary to address the topic to SU MAC (giving the material/plant/missing profit center) so that we can update the material master data.

2) Check on Activity1

- How to check:
 - KE24 with variant SPS_002 -> just need to add the relevant company codes
 - KE30 ZZZ-SOLV00 report -> check P&L lines with empty Activity1(mkt)
- Goal:
 - All headings requiring Activity1 detail must have balance 0 at the end of the month. Take into account that the original posting and corrections may be done with different posting dates. [These headings can be found here.](#)
- To reduce the number of future cases you should identify the reason for which Activity1 was not determined. Most of the times it is due to:

- Posting in COPA together with a common Cctr because the posting involves a G/L account defined in the FI PA transfer structure (cost element group XCS-FIPA)
 - You should decide either if you want to keep the Cctr or the COPA posting but not both and reclassify the posting.
 - If Cctr -> another G/L account should be used
 - If CO-PA -> remove the Cctr and include the basic CO-PA axes: material and plant -> PrCtr should be derived from the material
 - Soon we'll set a substitution in the system to eliminate these cases.
- Common PrCtr (Cxxx) assigned to the material. Actions:
 - Correct the material master data and PrCtr assignment (view General Plant Data / Storage 2 OR Costing1)
 - Reclassify the posting:
 - Manually KE21N (cancel original CO-PA doc + create manual document taking the original one as reference and update the PrCtr)

3) Check on D4X and E4X

- Goal of these Value Fields:
 - Used only in Purchases of Materials with Moving Average Price. If the material is managed at Standard Price, the price difference will be rolled-up with Material Ledger.
 - Whenever an operation affects the purchase price of the material subsequently to its consumption, the price variance will be allocated proportionally to the existing stock and P&L (using these Values Fields).

Tasks to be completed when documenting an SAP Transaction, Report or Message code.

1. Title of the page = SAP Transaction code, SAP Report or SAP Message

2. Add the following Labels, respectively:

- SAP Transaction => "sap_transaction", Transaction code "xxxx"
- SAP Report => "sap_report"
- SAP Message => "sap_msg"

3. On the left section, describe the steps. On the right section, insert respective print screens and additional guidelines, if needed (e.g. Main selections of the transaction...)

STEP 1

Use transaction code:

S_ALR_87013635 - Check balance of Cost Centers in 2 currencies: Initial Screen

1. Enter the analysis parameters, with "0" for the Plan version.
2. Enter the cost center group.
3. Execute

Area: Actual/plan 2 currencies: Selection

All Orders in KOC4 must be balanced

STEP 1

Start the transaction using the menu path or transaction code

STEP 2

Set the Controlling Area

STEP 3

You can look for an existing variant by

clicking on

Select the variant and

Enter the period

When there is not an existing variant you can make the following selection :

1. Enter the plant code

2. Enter the list of "order type" using the list below

PI01	Z002	Z015	Z050	ZDNI
PI02	Z003	Z020	Z060	
PI04	Z006	Z030	Z100	
Z001	ZDNI	Z040	Z010	

3. Enter the period

4. Enter the controlling area

5. Enter the company code

Enter the layout "/RCS-CLOT" to filter on non balanced orders

STEP 4

During the closing period, launch processing in background with RFCRCS server group (when the option is available)

STEP 5

- Enter an output device
- Validate the printing parameters
- and enter 

The 'Background Print Parameters' dialog box is shown. The 'Output Device' field is highlighted with a red box and contains the text 'lcl'. Below it, the 'Windows printer' dropdown menu is set to '\\camvps01\PC22-CL'. The 'Number of copies' is set to 1. The 'Number of pages' section has 'Print all' selected. The 'Title' field is empty. The 'Time of print' dropdown is set to 'Print immediately'. At the bottom right, there are buttons for 'Properties', a close button (X), and an information button (i).

STEP 6

Click on  to launch the processing immediately and save 

The 'Start Time' dialog box is shown. The 'Immediate' button is highlighted with a mouse cursor. Below the buttons, the 'Date/Time' section is expanded, showing a checked 'Immediate start' checkbox. The 'After job' and 'At operation mode' sections are empty. The 'After event' section is also empty. At the bottom, there is a 'Periodic job' checkbox which is unchecked. At the bottom right, there are buttons for 'Check', 'Period values', 'Restrictions', and a close button (X).

A message informs that the Job is active

 Background job was scheduled for program RKKBALV1

STEP 7

Open the job overview

The SAP System menu is shown. The 'System' menu is open, and the 'Jobs' option is highlighted. The 'Jobs' submenu is also open, showing 'Define Job' and 'Job Overview' options. The 'Job Overview' option is highlighted.

STEP 8

Execute  with your user name

Simple Job Selection

											4.557,98

3.6. I perform a direct CO-PA posting in PL (KE30), in case of impossibility to correct automatically the FI/COPA discrepancy

Important: Please note that the following amounts must be added to the result of the COPA report KE30 as they concern manual corrections:

- Manual Postings in account 98350050 with cost center XXXX-9200 (XXXX stands for company code);
- Manual Postings in COPA derivation accounts 98154199, 98258199 and 98254199;
- MR11 postings in account 98150363 (documents beginning with 48*).

Manual Corrections via FI (Standard Method)

Some accounts are created to be used in manual accounting in COPA. These accounts are assigned in the field status group "Z033 - Purchase & Change in stock acc. COPA" that is, the profit segment fields need to be filled/used: customer, product, distr. channel, payer, ship-to-party and payer country. These accounts are created in CO with cost element category 1 and are customized in the automatic transfer of structure in COPA for direct posting in FI:

Cost Element	Cost Element Name	COPA Structure	COPA Structure Name
--------------	-------------------	----------------	---------------------

98100199	NS COPA REGUL	VVB10	Net Sales Corr.
98120020	VAR. SELLING EXPENSES FREIGHT COST ON SALES COPA	VVC20	Freight (Prov)
98120120	VARIABLE SELLING EXPENSES -COMMISSIONS ASCE. CC	VVC10	Sales Commission
98120210	VARIABLE SELLING EXP - INSURANCES ON SALES COPA	VVC20	Freight (Prov)
98150364	VC - DIRECT TRADE WITH THIRD PARTIES COPA	VVD00	VC Variable Cost
98154199	CP ADJUSTEMENTS - COPA	VVD45	VB cc variances
98254199	CNP ADJUSTEMENTS - COPA	VVE45	FC cc variances
98258199	CNP DEPRECIATION - COPA	VVF45	Dep cc variances
98279199	CNP DIVERS ADJUSTEMENTS - COPA	VVE65	FC others
98333199	FAC ADJUSTEMENTS - COPA	VVI25	G&A adm expenses
98361199	R&D ADJUSTEMENTS - COPA	VVJ01	R&D gross cost

Posting Rules:

- Manual documents with document type AD
- **Reversed on the following period** if the flow is not complete
- Items of the document: enter the most elements (plant, material, sales order) as possible allowed by the account to have the most accurate allocation of these corrections when analyzed. Check file [Possible_Variations.xlsx](#) tab "Example COPA Info Search" to see an example on how to retrieve the COPA data to be used in the posting.
- Posting on "direct COPA" P&L accounts (more often cost valuation differences): If dedicated to a specific flow, report the elements of sales flow (material, plant, customer, sales domain) in the PA object; If more generic, some generic values (material, customer) may be used but the sales domain (sales organization, distribution channel, division) should be carefully chosen in order to allocate this cost to the right BU.

These generic values allow the corrections to be taken in account in Premier Pilotage.

Generally, division XH "non allocated", 999930 for non EU customer or 999931 for EU customer, 77269 for generic material

Types of FI-COPA Adjustments:

Accounting stock corrections – Temporary Corrections Reversed in the following month.
Deliveries not billed: 1. Some very specific cases may not be treated by transaction ZWFAT135. Need to post a manual adjustment. 2. Sales invoices posted on the closing period after ZWFAT135 process.
Stock variation adjustment account: 98350050 "FINISHED PRODUCT STOCK VARIATION-COST OF SALES ADJ" + Cost center CCCC-9200 (statistical cost center for cost of goods sold)
Stock adjustment account: 37000109 "FINISHED PRODUCTS-ADJUSTMENT"
Debit / credit position depending on the correction

Correction of COPA cost of sales – Permanent Corrections not Reversed in the following month.
Posting using a FI document: • C.O.G.S. adjustment P&L account 98154190 "CP Adjustment CC" + Cost center CCCC-9200 (statistical cost center for cost of sales) • C.O.G.S. adjustment P&L account 98154199 "CP Adjustment – COPA" with direct posting in COPA "D45 VC CC variance"
Credit/Debit depends on the type of correction (COPA increase or decrease)
COPA segment parameters should be entered following those of the original flow

Posting Example (IECRA Transfer):

The customer code has been set as mandatory to guarantee the consistency of the analyses made in Premier Pilotage (BOXI). To allow generic postings, the following was defined for the sake of consistency and to avoid discrepancies between RCS PPE and Magnitude:

- "Dummy" customer codes : 999930 (outside EU) and 999931 (within EU).
- Generic "dummy material code" = 77269
 - division XH (unallocated)
 - Combined with an "unallocated" Distribution Channel which is linked to one IECRA (see the list in file [RCS unallocated Distribution Channels.xlsx](#))
 - corresponding commercial product 90032925

Important:

There are value fields in COPA that must not be used in cycles, because they are reserved for automatic accounts of logistical flows (see table on the right).

Tasks to be completed when documenting an SAP Transaction, Report or Message code.

1. Title of the page = SAP Transaction code, SAP Report or SAP Message

2. Add the following Labels, respectively:

- SAP Transaction => "sap_transaction", Transaction code "xxxx"
- SAP Report => "sap_report"
- SAP Message => "sap_msg"

3. On the left section, describe the steps. On the right section, insert respective print screens and additional guidelines, if needed (e.g. Main selections of the transaction...)

STEP 1

In case you know the specific document to correct, go to KE24 and find the respective document:

Use transaction code:

i KE21N - Manual Posting in COPA: Initial Screen

i By rule, we should not post a document directly in COPA without making an analysis first, because posting only in COPA will cause FI/COPA differences. Everytime it's really necessary to post in COPA, and it's not coming from a reclassification (topic mentioned above), we need also to make sure to fill all necessary information in the 1st tab, namely the PC, material and plant.

Display Actual Line Items: Initial Screen

Selection Conditions

Currency type	10	to	
Record type		to	
Period/year	02.2018	to	
Document number		to	
Date created	12.03.2018	to	
Reference document number		to	
Entered by	pt300185	to	
Sender cost center		to	
Cost element		to	
CO order		to	
Sales order		to	
Company code	3430	to	
Customer		to	
Product		to	
Billing date		to	

Each line is 1 document. In order to see the amounts it's necessary to add the necessary value fields (by column):

COGS	E4X Spare P Var. NA	E90 FC absorption	F00 DEP Std
0,00	0,00	2.247.142,69-	0,00
0,00	0,00	4.395.029,09-	0,00
0,00 -	0,00 -	4.395.029,09 -	0,00 -
0,00	0,00	2.247.142,69-	0,00

You can select layout "ALLVLFIELDS" which includes already all value fields and relevant information, but note that if you do it the transaction will take some time to run, as it will display lots of columns. On the other hand, if you already know which are the value fields or additional details that you are searching for, it's better not to use this layout, and manually add the necessary columns.

STEP 2

Go to KE21N and set Record Type Z and your document as reference (if available; if not, please fill the much details as possible):

Create Line Items: Initial Screen

Document number: Item number: Record Type:
 Posting date: 13.03.2018 Period: Fiscal Year:

Valuation Type
☒ Legal View
☐ PrCtr View

Post Line Items
☒ In Operating Concern and Company Code Currency
☐ Only in Operating Concern Currency
☐ Only in Company Code Currency

Enter Using Reference
 Document number: 29154666
 Item number:
 Record Type:
 Ref.doc.number:
 Reference item:

Change what you want to change in the first 2 tabs:

Characteristics Value fields Origin data

Go to the 3rd tab and fill the CE and Order/WBS/etc (which you can also find in the original document, but it's not filled automatically when you use the reference doc) - Very Important to have the correct data in BW:

Characteristics	Value fields	Origin data
Sales and Distribution		
Sales Order		
Sales Order Item	0	
Billing Type		
Goods Issue Date		
Invoice date		
Controlling		
Order		
Sender cost center	4KF5100019	
Sender bus. process		
WBS Element		
Cost Object		
Cost Element	9800310001	

3.7. I properly check the result of the posting

After correcting all differences, re-check the results in FI and in COPA to guarantee that the postings were correctly made, and that the difference doesn't exist anymore.

Also it's necessary to remark that, after the closure, all differences not corrected properly must be analyzed and corrected in the origin:

- New materials should be costed before being used (delivery, production, billing)
- New orders or WBS elements should have a settlement rule
- New cost centers should be included in the assessment cycles
- Blocked invoices in VFX3 should be processed everyday
- Avoid returns with stock movements in different periods of the corresponding credit memos.

For WP2 it might be useful to use the file below to see in detail the existing differences:

[FI COPA CONTROL.xlsm](#)
