

Development of a method and / or Validation of a method

To do absolutely	P08-Trueness P17-Comparison of two measurement methods P06-Selectivity-Specificity of a measurement method
To do if necessary	P10-Precision of a measurement method P07- Estimation of the standard deviation of repeatability P13-Linearity study of a method P11-Detection and quantitation limits P15-Expression of an experimental result P22-Rounding of a measurement result
To go further	P12-Robustness of a measurement method P02-Capability and performance criteria
