Once logged in choose:

- **Información de Cuentas**
- **Módulo de tesorería**

When the page is displayed choose:

- **"Estado"** - Pendientes
- **"Tipo de ficheros"** – TODOS (always)

If the previous day is a Friday you must perform the task also for Saturday and Sunday. This means that on Mondays the procedure should be done with a date from Friday to Sunday but for the posting date you must consider is the last working day (Friday).
Next, it will ask you to choose the files to extract:

A batch input session is a sequence of transactions supplied with user data by a program. SAP stores these transactions on a stack until you decide to process them online. No database updates are performed until the session has been processed. Using this technique, you can transfer large amounts of data to SAP in a short time.

STEP 2

Look for the batch input session to be processed

If you don't know the session name you can run this transaction using the "Selection criteria" in the top of the screen.

These selection criteria can be combined in order to strengthen the list of batch input sessions.
