Assessment cycle Created Oct 17, 2018 (11:00) by Cátia Pinto

Definition

[Link](#) [Link](#)

An assessment cycle is used in SAP to assign all primary cost elements and secondary cost elements from a sending cost center to the receiver cost center. When you want to transfer costs from one cost center to another costs from one cost center to another through an assessment cycle, sap use a secondary cost element and accumulates all the primary cost and secondary cost and send it to the receiving cost center.

AODocs is a document management system that integrates with Google Drive and provides central ownership of documents. It solves the problem of individual ownership of documents in Google Drive by transferring ownership to a single AODOCS account provisioned by IT. At a minimum it will provide a folder/file hierarchy that can be used to house and access team-based documents
