1 OBJECTIVE AND SCOPE

1.1. Objective of this Procedure

This document's objective is to provide a guide to ZPRC, ZUNB and ZMAT – Raw Material Material master data management for GBU Technology Solutions (Legacy Cytec organization).

Material Master Data management process includes creation and modification of the material as well as its inactivation and flagging for deletion. Creation of Basic Data, Classification, Sales general/plant, Foreign Trade, Purchasing, General, Plant Storage and Label Data Views will be presented in this procedure. Management of MRP, Work Scheduling, Quality Management, Accounting and Costing Views is being performed by Process Teams.

Requests of Technology Solutions Material Master creation or maintenance can be performed by approved requestors listed in Appendix - List of contacts.

All requests are sent to Riga Data Operations team via Freshdesk or alternatively by e-mail. Common e-mail address of Riga Data Operations team: datamanage@solvay.com

Request form for Technology Solutions materials should usually be attached to MOC Gensuite web page under MOC ID provided by requester.

The referral Technology Solutions lists mentioned in this procedure, such as Purchasing Groups and Profit Center List are embedded in the [TS SAP Material request form file](#).

1.2. Scope

Under Riga Data Operations scope is the management of ZMAT, ZVER and ZUNB materials for GBU Technology Solutions (legacy Cytec) sites in WP1 SAP system. Management of ZERS materials is described in a separate procedure. Riga Data Operations can create and extend ZDIE materials if requested so by Finance.

Material Type	Description	Division
ZMAT	Finished Goods Semi-finished Goods Raw Materials	Multiple Multiple KV
ZPRC	Commercial Products	N/A
ZVER	Packaging	WD
ZUNB	Stocked and non-valuated materials	WD (for packaging)
ZDIE	Services	Multiple

1.3. Abbreviations

Abbr.	Description	Abbr.	Description
RCS	Rhodia Core System	SBS	Solvay Business Services
ZMAT	Finished product, semi-finished product, raw material	HSE	Health, Safety and Environment
ZVER	Packaging	DG	Dangerous goods
ZUNB	Stocked and not valuated material	MRP	Material Resource Planning

ZDIE	Service	UoM	Unit of Measure
ZPRC	Commercial Product		

1.4. Roles and responsibilities

Technology Solutions ZMAT – Raw Material setup can be performed only once MOC-ID and ZPRC code are available.

Prior to submitting a new ZMAT request, it is the requester's responsibility to ensure the material does not exist in SAP already, so no duplicates are created in the system. If the material was not found, the TS SAP Material request form must be filled and submitted to Data Management for material master setup in SAP. A second search in the system is performed by the Data Management team to ensure no duplicates are created.

2 STANDARD OPERATING PROCEDURE DESCRIPTION

2.1. Creation of material in RCS

2.1.1. Technology Solutions Pre-requisites

Raw Material setup can be performed only once MOC-ID and ZPRC available.

In all cases when MOC-ID is missing **Lindsay Schramm** and **HazCom team** should be contacted to clarify whether raw material code can be set up without this information.

Prior to material creation in the system search is performed by the Data Management team to ensure no duplicates are created.

Important! Verify the question "Is it a raw material or re-sale?" in the Data Operations checklist:

- **0451** should be used for **Raw materials** (production raw materials) or re-sale when relabeling is happening at Solvay location.
 - MOC required
 - ZPRC required – PRCO 900XX
- **0450** when supplier relabels the raw material at their own location. Solvay SDS and label will be send to supplier and attached to the material.
 - MOC required (all the regulatory information on the supplier)
 - Manual PRODCOM (Real SUB E 500XX) without link with logistics).
 - Should be linked to the proper business unit

2.1.1.1. Accessing MOC Gensuite Portal

ZPRC and PRCO can be found validating MOC in [Gensuite Portal](#).

User: [data.manage@solvay.com](#)

Password: Solvay123

Once you access the MOC Portal, please:

- Check if the site is marked as **General, Technology Solutions**.
- In order to see the MOC, access **Applications**
- Click on **MOC Manager**.

Screening Checklist Questions

1) What type of change is this?
Existing Approved Raw Material Extension to a new SAP Facility

1.1) **Impacted Raw Material Extension Facilities** 13
8712 Greenville

1.2) Approved Raw Material SAP Code and Descriptor
154260 - POLYNAPHTHALENE SULFONATE NA 40% 1000KG

1.3) Approved Raw Material Supplier and Manufacturer
94567 GEO Specialty Chemicals, Inc.

1.4) Approved Raw Material Country of Origin
USA

1.5) Approved Raw Material Shelf Life
TBD

1.6) Original Approved Raw Material MOC ID Reference Number
AQ-19-40 (Also can be found attached to this MOC)

1.7) Have impacted finished goods changed from original Raw Material MOC (list any new product not reviewed/approved previously)
No
Additional Details: To be used in 154343 REAGENT S-11472 1000KG 2205LB IBC

1.8) **Impacted Business Unit** 14
Mining Solutions - Mineral Processing (E5)

- The approval from hazcom team

RM Extension - Regulatory - HSE Hazcom

Approval Date 10-Jul-19

Critical Path? Yes

Change

- The ZPRC name and number

Path Checklist Questions

1) Did you review checklist and other documentation available to make sure it contains all necessary information?

Yes

2) Is the raw material Safety Data Sheet (SDS) less than 5 years old and in the proper language and format of the country where the raw material will be used?

Yes

Additional Details: US format SDS is available

3) Is this raw material listed on the proper chemical inventory of the country where it will be used and where it is provided from?

Yes

Additional Details: Based on information provided by supplier - listed for all regions except Taiwan. Taiwan's inventory status has not been evaluated.

4) Is it acceptable to use this raw material in the EU (REACH)?

Not Applicable

5) Is this raw material subject to any special regulatory requirements (SNUR, TSCA12b, Restricted substances, SVHC and S-SVHC, Nanomaterials, ...)?

No

6) Is the necessary documentation provided for any defined special use (food contact,...)?

Not Applicable

7) If approval of this raw material to new location results in any changes to the Solvay SDS, have these changes been addressed?

Not Applicable

Additional Details: No changes for RM master record.

8) Prodcod name under which raw material is set-up in SAP

POLYNAPHTHALENE SULFONATE, NA 40%/GENERIC

16

9) SAP Prodcod specification

PRCO90076420

10) SAP Supplier specific (Real Sub E) specification

800000001131

Template

Dear (Requester's name),

Please be informed that the material (number) (description) has been (created/extended) for plant (number).

Dears,

Could you please complete necessary views for material set up (MRP, QM, Acct, Costing)?

- Material (number) (description)
- MOC (number)
- ZPRC (number)
- Documentation from MOC

Kind regards,

2.1.3. Extension of material - Technology Solutions

Following MOC procedure plants are obligated to review existing MOC process every two to three years, therefore valid MOC ID is mandatory component for Raw Material extension, this information should be provided by requester any time material should be created for a new plant.

HazCom Team should be involved in Raw Material activation process due to their responsibility to verify MSDS (ZPRC) code validity and correctness. They will also verify whether existing MOC ID can still be used.

NOTE: Raw Materials *should not* be extended to Trading plants (8572 – MX, 8573 – CL, 8571 – PE, 8580 – NL, 7788 – ID, 7786 – AU, 8574 - CN).

To extend material enter transaction MM01. Copy from... option can be used, preferably to copy from an existing view of the same material.

Create Material (Initial Screen)

2.2. Material modification

2.2.1. Pre-requisites

Material modification is allowed only if validated by all Plants using the material.

Requests to change the fields listed below must not be performed – in this case a new material has to be created.

- Base Unit of Measure
- Net Weight

In some exceptional cases range can be added to Raw Material, e.g. TALLOW ALKYL AMINE >97% 159/165KG DR

Another exception can be a mistake for recently created material that has not yet had any stock and stock movements in the system.

Main activities	Tips / Best practices	Key points
Enter transaction MM03	T-code can be entered directly in Command field. T-code can be saved in Favorites.	Full path: Logistics -> Materials Management -> Material master -> Material -> Display

Main activities	Tips / Best practices	Key points
Enter Material number		
Select Purchasing (or Sales: General/Plant Data) view		

Main activities	Tips / Best practices	Key points
Verify the possible Plants related to the Material by clicking on the match code.		
All Plants using the material are listed		

If material is open for more than one Plant, contact the other Plants to validate the requested modification.

If the answer is positive, change the material as shown in section 2.2.2. Manual modification of material.

If the answer is negative, create a new material as described in Chapter 2.1.2. of this OP, associated with the Plant that made the request.

2.2.2. Manual modification of material

Main activities	Tips / Best practices	Key points
-----------------	-----------------------	------------

Enter transaction MM02	T-code can be entered directly in Command field. T-code can be saved in Favorites.	Full path: Logistics -> Materials Management -> Material master -> Material -> Change
Select the view containing the field that needs modification		
Select the Organizational Level for which the modification is requested	Repeat the modification for all Sales Areas or Plants if applicable.	
Save the changes performed		

2.2.3. Material Sales Organization Extension

Should not be performed by material creation, can be opened for Intercompany (e.g. US23/90; NL01/90 etc) sales area only when extending Raw Material to different plant and Stock Transfer is required from one location to another.

Should not be extended to commercial sales area.

2.3. Material Inactivation

Before inactivating material an approval from appropriate purchasing contact should be received, material should also be checked for open items under "Stock overview".

Technology Solutions
Required approval from Buyer - list

If there are no open activities, Stock will show only "0". If any other values displayed, appropriate Product Manager should be contacted for Stock removal.

	Technology Solutions
Global	After Stock is cleared material can be inactivated. If material has to be inactivated for all plants and sales areas - Set X-plant matl status (Basic data 1 view) to Z0 - Set X-distr.chain status (Sales: sales org. 1 view) to 61 and update the date to when the status was changed - Set Plant-sp.matl status (MRP1 view) to Z0 for each plant (field is available also in Purchasing, Quality Management and Costing views) - Set MRP Type (MRP1 view) to ND for <u>each plant</u> that has to be blocked - Change Description adding *OBS* before name in all languages - Activate Deletion Flag in MM06
Local	If material has to be inactivated for specific sales areas - Set DChain-spec. status (Sales: sales org. 1 view) to 61 to block material for one particular Sales Area and update the date to when the status was changed If material has to be inactivated for specific plants - Set Plant-sp.matl status (MRP1 view) to Z0 for each plant that has to be blocked (field is available also in Purchasing, Quality Management and Costing views) - Set MRP Type (MRP1 view) to ND for each plant that has to be blocked - Activate Deletion Flag in MM06 for the requested plant

Inactivation of ZPRC material can be performed only if all ZMAT materials linked to it are inactive:

- Change Description adding ***OBS*** before name in all languages.

2.4. ZPRC creation

It is in Data Management scope to create ZPRC records for Raw Materials when requested comes from HazCom Team. When ZPRC record is completed in SAP WP1, systems are being synchronized overnight and PRCO code appears on HazCom side. To complete this request material chemical name should be verified and provided by HazCom Team.
