1. Objective and Scope

This work instruction describes the process for creating or changing Customer Master Data records in SAP PE1 – client 300. It covers the Companies and Sales Organizations listed in chapter 1.6. Company codes and Sales organizations in SAP PE1.

Customer master data is maintained by Data Operations team. Master data maintenance includes new account creations, changes, extensions, inactivation's, reactivations, data validation, mass uploads and master data report creations.

1.1. Definitions

Abbreviation	Description	Abbreviation	Description	Abbreviation	Description
DM	Data management (operations) team				
SBS	Solvay Business Services	PO	Purchase Order	Sales area	Combination of sales org.+distribution channel+division
CS	Customer Service	PO BOX	Postal Office Box		

ZSAM	Sales Account Manager	30000-39999
ZINC	Intercompany Customer	50001000-59999999
ZULC	Ultimate Consignee	60001000-69999999
ZCPD	One Time Customer (<i>Used <u>only</u> for quotes & free-of charge samples</i>)	70000-79999
ZCOM	Commissions Agent	80000-89999
ZCRM	Credit Manager	90000-99999
ZFPY	Freight Payer	40000-49999
ZBUY	Buyer	90001000-99999999
ZRET	Return Vendor	70001000-79999999
ZPAR	Parent customer	80001000-89999999
ZEND	End user	10000-19999

1.5. Data view per account group type and transactions

The Account Group field is a high-level grouping which defines the primary use of a customer. The account group selection drives certain aspects of system processing, master view layout and field access

Different Customer Account Groups require different set of Views to be maintained. Use the recommended transactions and/or ensure to leave empty Company Code and/or Sales Area Data as per the table below:

Account Group	General data view maintained?	Company Code view maintained?	Sales Area View maintained?	Transaction code recommended for use
ZSLD ZPYR ZINC	Yes	Yes	Yes	XD01/XD02/XD03
ZPAR	Yes	Yes	No	FD01/FD02/FD03 Only general data and company data view must be opened. Do not create sales view for these account groups.
ZSHP ZBTP ZSAM ZCPD ZRET	Yes	No	Yes	VD01/VD02/VD03 Only general data and sales data view must be opened. Do not create Company code view for these account groups.
ZBUY ZCOM ZCRM ZCSR ZEND ZFPY ZPRS ZULC	Yes	No	No	VD01/VD02/VD03 Only general data view must be opened. Do not create Company code and/or Sales data view for these account groups.

Most commonly used transaction codes for Customer Master data:

XD01/VD01/FD01	Create new
XD02/VD02/FD02	Modification
XD03/VD03/FD03	Display
XD04	View account changes
XD05	Block account
XD06	Mark for deletion
XD07	Account group change (upgrade)
VA03	Display sales order

VA05	List of sales orders
------	----------------------

1.6. Company codes and Sales organizations

Company code and Sales organization view for ZSLD, ZPYR and ZINC accounts always will have the same code. Meaning, if new creation request is for sales organization is 1237, then the corresponding company code will be 1237.

The following are the Company codes and Sales organizations defined in the system for different type Account groups:

Company Code	Description		Sales Organization	Description
1246	Aerovac LLC	+	1246	Aerovac LLC
7250	Aerovac Keighley LTD	+	7250	Aerovac Keighley LTD
7252	Aerovac Toulouse SAS	+	7252	Aerovac Toulouse SAS
7257	Aerovac Mondovi SRL	+	7257	Aerovac Mondovi SRL

2. Process description

2.1. Check for request completeness

1. Check completeness of the **Customer template** – have all mandatory fields been completed?
All mandatory fields are highlighted in orange on the template, they may vary by type of customer to be set up.
2. Check if all necessary documentation is provided according to **Request requirements**.
3. Check for duplicates as described in § **Check for potentially already existing customer**.
4. Check if Registration number is valid and match customer name. See **Validation steps and rules** according to the country where customer is located.

2.2. Check for potentially already existing customer

Transaction **XD03 – Display Customer (Centrally)**

- Initiate Search
- Search for potential already existing customer on following fields :
- VAT (when applicable)
- Name
- Postal code, Country

Remark: wild card = *

- If identical customer is found for another Company Code and/or Sales Area, it needs to be extended to the requested Company Code and/or Sales Area. Go to section **Extending customer to Company Code and/or Sales Area** for additional detailed instructions.
- If an existing customer is found, but there is a slight difference in requested data: return to the requester to validate the non-equal data and decide on further actions
- If no potential duplicate is found, proceed with the request .

3. Customer creation

Initial screen	
----------------	--

Transaction: XD01 / VD01 / FD01 - as per account group type.

See chapter 2. *Data view per account group type and transactions*

Account group: as per request

See chapter 2. *Data view per account group type and transactions*

Customer: Must not be filled, a number will be given automatically as per defined number range at the moment of saving the new record, see section *Customer Master Account Groups* for number range assignment.

Company Code: must be filled out **only for ZSLD/ZPYR/ZINC** creations. Same code as for Sales organization. Check request form.

Sales Organization: must be filled out for majority of creations. Check request form.

See chapter 2. *Data view per account group type and transactions*

Distribution channel: always "00" – Cytec Distribution
Division: "IM" for Industrial Materials Customers; "AM" for Aerospace Materials Customers. Check request form.

Reference: not used.

Hit **Enter** or green checkbox button to proceed to next screen.

3.1. General data

ZSLD customer general data view consists of several tabs:

- Address
- Control data
- Payment transactions
- Marketing
- Unloading points
- Contact persons

Information populated in these tabs will be shared for all open sales organizations of a particular account number. Meaning, if you update address in sales organization 1237, IM division, it will be updated also for any other active sales organization, not only for the selected sales area.

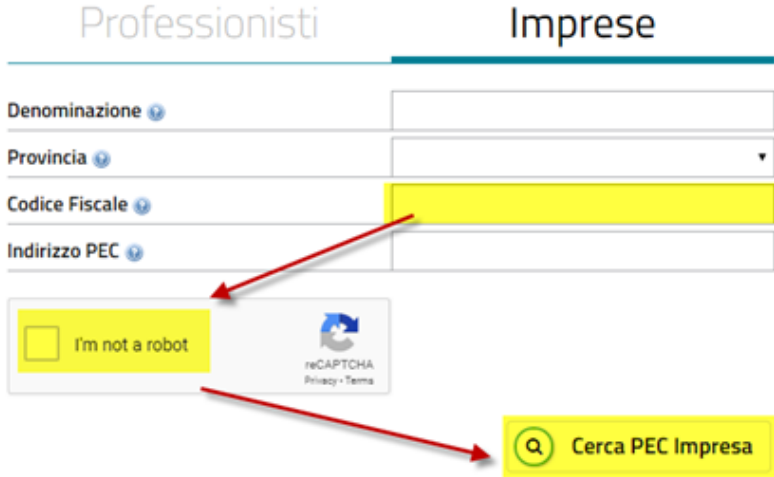

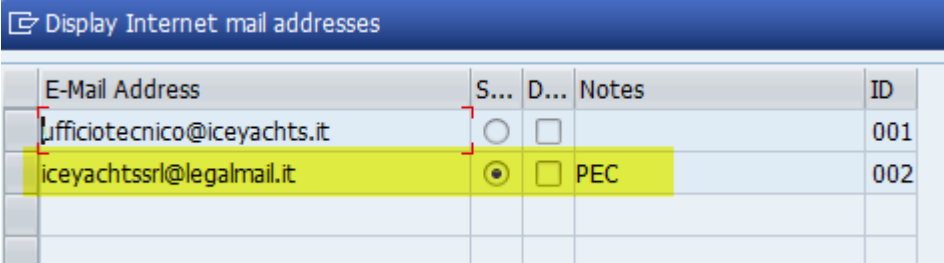

For name and address setup, abbreviate as follows (if applicable):

Incorporated	INC	Place	PL	Avenue	AVE	South East	SE
Corporation	CORP	Plaza	PLZ	Boulevard	BLVD	East	E
Manufacturing	MFG	Building	BLDG	Lane	LN	North East	NE
Limited	LTD	Apartment	APT	Highway	HWY	North	N
Limited Liability Corp	LLC	Road	RD	West	W	North West	NW
Limited Liability Partnership	LLP	Drive	DR	South West	SW		
Public Limited Company	PLC	Court	CT	South	S		

3.1.1. Address

Address	Control Data	Payment Transactions	Marketing	Unloading Points	Contact Person
<div style="display: flex; justify-content: space-between; align-items: center;"> Preview </div>

StandardComm.Mtd					

SAP field	Description
Name 1	Legal name of the customer. In this line the name should not be longer than 40 characters. If the name exceeds 40 characters, second line (<i>Name 2</i>) is to be used for next 40 characters. Do not use commas or any special symbols in the name (except for the '&' sign if specifically requested). If the VAT validates with a name different from the template, go back to the requester and verify which name should be used. NOTE! <i>Name 1</i> and <i>Name 2</i> fields are printed on documents and labels – try to accommodate all name info in those 2 fields.
Name 2	Used to capture DBA (doing business as), T/A (trading as), C/O (care of) name.
Name 3	Name 3 field should be populated for non-trade customer accounts indicating (NON-TRADE ACCOUNT)
Search term 1	Should capture the “essence” of the customer name
Search Term 2	This field is used to capture customer's 'doing business as' name, starts with 'DBA'. NOTE! Information entered in Search Term 2 field is not printed on documents, therefore to make DBA information visible for document users it may be copied to Name 2 field.
c/o	do not use. C/O, DBA, T/A must be added as Name 2 or in address fields if it is too long.
Street	Main field for street address of customer, max 35 characters to be filled in this field. If street address exceeds 35 characters, Street 2 field to be populated with the remaining information. Fields Street and Street2 are usually printed on documents. Street 3 is additional address field for street name to fulfill the requirement for lengthy street address, however note that it is not printed on most of documents. NOTE! House number field is not to be used!
Postal Code	Postal code / ZIP code as part of the address. SAP provides standard postal code format checks depending on the country maintained.
City	City name as part of the address. For some countries SAP may overwrite the City name with a value depending on Postal Code.
Country	Country key contains information which the system uses to check entries such as the length of the postal code or bank account number. The two-character ISO code is used.
Region	State / Province / County. Choose according to the City, should always be populated for US, CA, GB and IT and optional for other countries.

Transportation Zone	Used to determine regional zone for recipient of the goods; customer country and postal code determines a Transportation zone to be assigned to a customer. Select Transportation Zone from available entries. If a corresponding Transportation Zone does not exist. Applicable for ZSLD, ZSHP, ZRET, ZINC accounts.
PO BOX Address	do not use these fields, they do not work. Sold-to and ship-to accounts cannot be based on PO BOX address, they must have physical address. If PO BOX address needs to be added, it must be created as a separate bill-to (ZBTP) account and PO BOX address must be populated in Street field.
Language	Customer Master Records to be maintained in English (EN) only.
Telephone	Telephone number, consisting of dialing code and number, but without the country code as it is being picked automatically based on the country entered as part of the address. If more than one telephone number is maintained for an address, the first telephone number is marked as the standard number. Press <i>Other Telephone Numbers</i> button to maintain more numbers: If the country code of the telephone number is different from the country in the address, it can be changed in the pop up "Maintain Telephone Number".
E-Mail	<p>1) Use to capture general customer email address – solely for the purpose of contacting customers (will not drive any functionality – no documents will be sent to this address).</p> <p>2) For Italian customers PEC email must be added. PEC email can be found here: https://www.inipec.gov.it/cerca-pec/-/pecs/companies?p_p_auth=GE2gJ00T&_1_WAR_searchpecsportlet_mvcPath=%2Fsearch_pecs%2Fview.jsp Codice fiscale: the same as VAT number but without country code.</p>  <p>Law 205/2017 in Italy states that from 1st of Jan 2019 all invoices issued by Italian companies must use the electronic format. The e-invoices use a special XML format and work with the SDI, Serial Digital Interface, directly connected with the Italian Tax Agency. Alternatively, when the SDI is not provided by the customer, the e-invoice is sent out using a Certified E-mail, the PEC (Posta Elettronica Certificata).</p> <p>DMO have to add Tax number 4 (SDI number) or add PEC email to general data. SAP will send e-invoices with SDI as priority, but if this field is missing, will use the PEC.</p> <p>If for some reason you receive Tax number 4 and PEC email for the same customer account, add both.</p> <p>PEC emails are set up in Address screen - Communication area - E-mail as follows:</p> 
StandardComm. Mtd	Standard Communication Method for documents.

3.1.2. Control Data (visible for ZSLD, ZSHP, ZPYR, ZBTP, ZRET, ZPRS, ZPAR, ZINC)

Customer Classification: This field is used for Customer categorization, it is optional.

Leave blank.

Address	Control Data	Payment Transactions	Marketing	Unloading Points	Contact Person
Classification					
Customer class.	01	Strategic Cust.			
Industry					
Industry Code 1					

3.1.5. Unloading Points (visible for ZSLD, ZSHP, ZINC)

Unloading Point: Always "CARRIER"

Calendar key: Always "ZZ" – Customer will accept deliveries only on normal workdays (Monday thru Friday).

Address	Control Data	Payment Transactions	Marketing	Unloading Points	Contact Person
Unloading points					
Unloading Point	Defa...	Cale...	Customer calendar	Goods	
CARRIER	<input type="checkbox"/>	ZZ	Default Customer Calendar-Mon-Fri		

3.1.6. Contact Person

Contact Person tab is used for maintaining different contacts related to the customer. Contacts can be internal or external.

- Do not add more than one email per one contact. If you notice setups where there are several emails under the same contact number, please correct it.
- Please follow the format below for contact names

Address	Control Data	Payment Transactions	Marketing	Unloading Points	Contact Person		
Contact Person							
Form of ad...	Name	First name	Telephone1	Dep... Description	F... Description	Fax	E-Mail
	Invoices receiver 01			0005 Cust-AccountsPayable	03 Invoices receiver		toms.salenieks@so
	Invoices receiver 02			0005 Cust-AccountsPayable	03 Invoices receiver		accountspayable@r

Automatic sending of invoices by email can be activated. Add **invoices receiver** email. Add to contact:

- Department : **0005** - Cust-Accounts Payable + Function: **03** - Invoices receiver
- **Attribute 5** in Additional Data is set to 01 - CP Bill-to-Party

Double click on the contact line added:

Go to **Additional data** and add **Attribute 5 - "01"**

Finally, to activate automatic invoice distribution you need to maintain **ZVAR_CHANGE** lists after customer account creation is completed. If sold-to customer has additional bill-to account added, it also requires invoice receiver contact addition the same way you do for sold-to account, and at the end to be added to **ZVAR_CHANGE** lists.

See appendix about ZVAR CHANGE maintenance.

Customer: 10002791 SPACE EXPLORATION TECHNOLOGIES HAWTHORNE

Contact person: 0000002882

3.2. Company Code Data (to be created for ZSLD, ZPYR, ZPAR, ZINC)

3.2.1. Account management

SAP field	Description	Value
Recon. account	Maintain this field for all the customers extended for company code view, this is a mandatory field:	
	• for AR Trade (regular) customers	11000100
	• for Trade AR Bad Debt customers (to be used only after special request from Credit Management)	11000400
	• for Non-Trade Receivables	12000100
	• for Intercompany Receivables (ZINC)	13000100
Sort key	default value "001 – Posting date" for all the customers. Other values to be used only after special request from Credit Management.	001

3.2.2. Payment Transactions

Maintain values in the fields listed below in order to process payments from the customer. All the values in this tab are business critical fields and have an impact on the payment collections.

SAP field	Description	Value
Terms of payment	Maintain this field with payment terms agreed with the customer. This field is mandatory to be filled. Payment Terms have to be validated by Credit Management. NOTE! Default Payment Term for Intercompany customers (ZINC) is "Z044– DUE ON RECEIPT".	as per request form
Tolerance group	default value "ARTG" for all the customers	ARTG
Credit mem pay term:	default value "Z124" for Sold-to records only, leave blank for all other account groups	Z124
Payment history record	Mark this check-box for all the customers	check-marked
	1) default value for all the customers (except Italy)	Z – Customer Payments

Account Management		Payment Transactions	Correspondence
Payment data			
Terms of payment	Z001	Tolerance group	ARTG
Credit memo pay term	Z124	<input checked="" type="checkbox"/> Payment history record	
Automatic payment transactions			
Payment methods	Z	Lockbox	0204687
Payment advice notes			
Rsn code conv.		Selection rule	001 Selection rule 001

Payment methods	2) Customer located in Italy + payment terms RIBA:	D (direct debit)
	3) Customer located in Italy + any other payment terms	S
Lockbox	The lockbox number is the identification for the customer to make the payment, default value in this field is site specific. Leave blank, except for company code 1246.	1) blank 2) for Company Code 1246 - default value 0204687
Selection rule	default value "001" for all the customers	001

3.2.3. Correspondence

The fields in this tab are to be maintained to manage correspondence related to accounts receivable with the customers.

SAP field	Description	Value
Dunn. Procedure	Entry in this field has to be maintained only if requested by Credit Management. The value to be entered is "CYDP - Cytec Dunning Procedure".	-
Acctg clerk	Assigned only to regular SOLD-TO & PAYER accounts. There is no need to maintain acc. clerk contact details, only accounting clerk code is required.	JW

3.3. Sales Area Data (to be created for ZSLD, ZSHP, ZPYR, ZBTP, ZRET, ZCPD, ZINC, ZSAM)

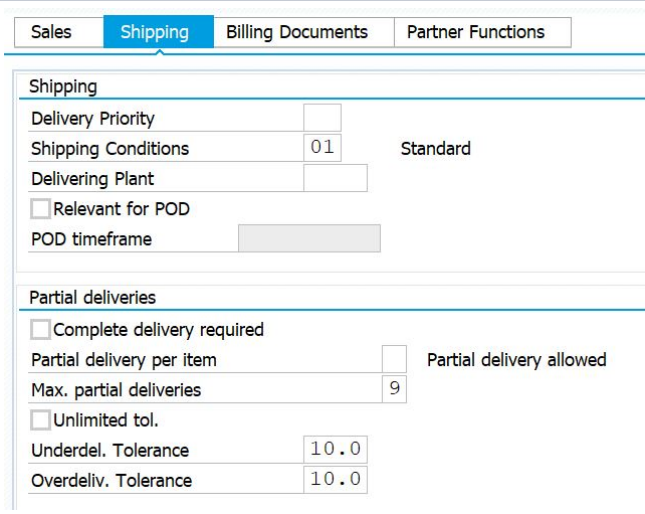

Maintain Sales Area data for customers for which sales transactions have to be booked. **NOTE!** Sales Area Data is specific to a combination of **Sales Organization & Distribution Channel & Division**.

3.3.1. Sales

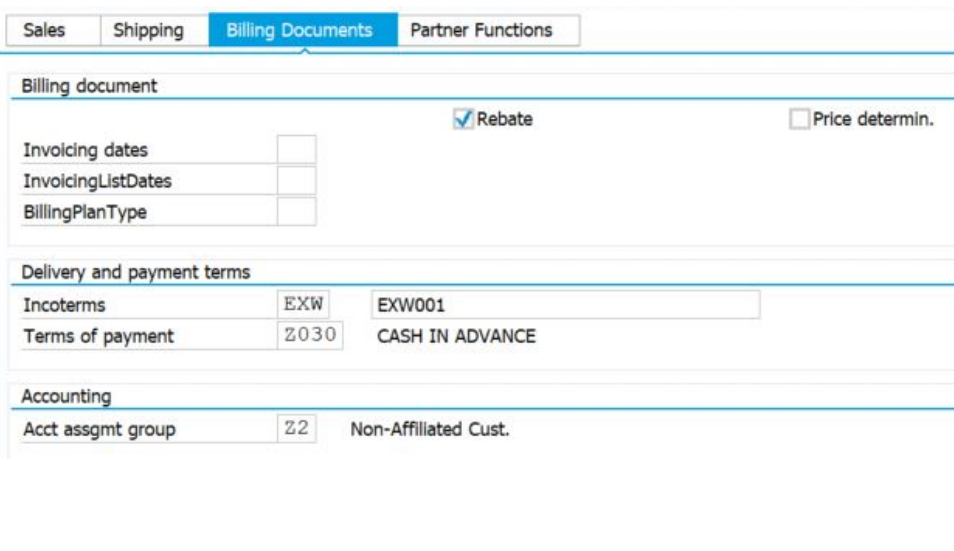

SAP field	Description	Value	
Customer group	Maintain the program to which the customer is linked. This field is optional - it is only relevant for customers priced based on the program to which they are assigned.	as per request form	
ABC class	Maintain the provided classification of customer. This field is business-mandatory for Sold-to account group records.	as per request form	
Currency	Maintain the currency in which customer is transacted. Where there is more than one currency, this should be the primary currency for the customer. This field is mandatory.	as per request form	
Switch off rounding	To be checked for all customers.	check-marked	
Price group	Maintain the market to which the customer is linked. This field is critical from a pricing perspective. This field is optional - it is only relevant for customer's priced based on market.	as per request form	

Customer pricing procedure:	The value in this field drives the pricing procedure that will be picked for sales transaction with the customer. Although many pricing procedures are available the ones used in Cytec are:	<ul style="list-style-type: none"> • maintain "1" for trade customer • maintain "1" for Intercompany customer (ZINC) • maintain "4" for Return Vendors (ZRET)
Price List	Maintain this field only for customers identified as distributors. There is only one value defined "D1". This field controls the pricing for distributors.	

3.3.2. Shipping

SAP field	Description	Value	
Shipping Conditions	Value in this field determines shipping point and route in sales order. This field is mandatory for sold to and ship to customers. As per the design customer master will be defaulted with "01". If required the value will be changed when booking a sales order.	as per request form	
Underdelivery Tolerance	default values 10% for all the customers. This field specifies the percentage (based on the order quantity) up to which an under delivery of the line item is permitted.	10	
Overdelivery Tolerance	default values 10% for all the customers. This field specifies the percentage (based on the order quantity) up to which an over delivery of the line item is permitted.	10	

3.3.3. Billing Documents

SAP field	Description	Value	
Rebate	This check-box should be marked if the customer is to be activated for rebates. This field must be checked for all Sold to party customers.	check-marked	
Incoterms 1	Incoterms are a set of rules which define the responsibilities of sellers and buyers for the delivery of goods under sales contracts. They are published by the International Chamber of Commerce (ICC) and are widely used in commercial transactions. Maintain the Incoterm 1 based on the agreement with the customer. This field is a mandatory field. Default value for Intercompany customers is "EXW".	as per request form	

Incoterms 2	Use the drill down option and enter the Incoterm 1 selected to get the list of available Incoterms 2. Select the Incoterms 2 applicable for the given customer.	as per request form
Terms of payment	Maintain this field with payment terms agreed with the customer. This field is mandatory. The Payment term maintained in the Sales Area Data should be the same as the one maintained in the Company Code Data. NOTE! Default Payment Term for Intercompany customers (ZINC) is "Z044- DUE ON RECEIPT".	as per request form
Account assignment group	Maintained Account assignment group drives the G/L account to be posted at the time of billing. This field is mandatory for all customers.	<ul style="list-style-type: none"> maintain "Z1 - Affiliated Customer" for Intercompany customers maintain "Z2 - Non - Affiliated Customer" for Trade customers
Tax classification	The table Taxes shows the countries from where deliveries to the customer can be made. Maintain the tax characteristics when the customers is shipped from these countries. By default tax classification to be maintained as taxable if there are no special requests from Tax Department. (Brazil and Taiwan, Mexico always '0' unless differently requested).	BR, MX, TW - always 0 all the rest - always 1

Country	Name	Tax categ...	Name	Tax...	Description
BR	Brazil	IBRX	Brazil tax calc.	0	Not taxable
FR	France	LCFR	License - France	1	Check license
FR	France	MWST	VAT	1	Liable for Taxes
GB	United Kingdom	MWST	VAT	1	Liable for Taxes
IT	Italy	LCIT	VAT license Italy	1	Check license
IT	Italy	MWST	VAT	1	Liable for Taxes

Country	Name	Tax categ...	Name	Tax...	Description
MX	Mexico	MWST	VAT	0	Tax Exempt
TW	Taiwan	MWST	VAT	0	Tax Exempt
US	USA	UIXJ	Tax Jurisdict.Code	1	Taxable

NOTE! In Italy (so: 7257 Mondovi) and France (so: 7252 Toulouse) some customers are VAT exempt for a limited period of time.

When such request has been received from Finance or Tax Department (Data Steward – Giuseppina Barovero, Cristina Cattaneo, Mara Ramondetti; Chiara Menardi), to reflect it in system set Tax Classification indicator to "0 – Tax Exempt" in line for Tax Category MSWT.

Also add Sales Text. Go to **Extra Text Finance external** (notes can be added, removed or updated upon the request).

The image shows three screenshots from the SAP system:

- Taxes Table:** A table listing tax configurations for various countries. The row for Italy (IT) with Tax Classification '0' and Description 'Tax Exempt' is highlighted with a red box.

Country	Name	Tax categ...	Name	Tax classification	Description
FR	France	LCFR	License - France	1	Check license
FR	France	MWSI	VAT	1	Lable for Taxes
GB	United Kingdom	MWSI	VAT	1	Lable for Taxes
IT	Italy	LCII	VAT license Italy	1	Check license
IT	Italy	MWSI	VAT	0	Tax Exempt
US	USA	UTXJ	Tax Jurisdict.Code	1	Taxable
- Customer Display:** A screenshot of the 'Display Customer' screen for customer 10003088. The 'Extras' menu is open, and the 'Texts' option is highlighted in yellow.
- Customer Change: Sales Texts:** A screenshot of the 'Customer Change: Sales Texts' screen. The 'IT Finance-External' text is highlighted with a red box, with the description 'OPERAZIONE NON IMPONIBILE A NORMA DELL'A' and a checked checkbox in the 'M' column.

S..	L..	Description	1st line	M
		CSR Notes		<input type="checkbox"/>
		Shipping-External		<input type="checkbox"/>
		Carrier-External		<input type="checkbox"/>
		Quality-External		<input type="checkbox"/>
IT		Finance-External	OPERAZIONE NON IMPONIBILE A NORMA DELL'A	<input checked="" type="checkbox"/>
		Exports-External		<input type="checkbox"/>

3.3.4. Partner Functions

Information in this tab is maintained to link partners, it defines the responsibility of each partner in a business transaction.

Maintain the following partner assignments for the Sold-to:

- Ship-to or the goods recipients where the product ordered should be delivered
- Sales Account Manager
- Bill-to party if the address to send the invoice is different from legal address of the customer
- CR – Forwarding Agent For Heanor customers, if indicated

Never remove first SH code that it is the same number as sold-to number. Sold-to accounts functions as ship-to for itself.

The Ship-to party and Bill-to party cannot stand alone. They have to be linked to a Sold-to.

Sales Account Managers have to be linked to a Ship-to and Sold-to.

Maintain the following partner assignment for the Ship-to:

- Sales Account Manager

Sales	Shipping	Billing Documents	Partner Functions
Partner Functions			
PF	Partner Function	Number	Name
SP	Sold-to party	10001006	B/E AEROSPACE INC - SFC NOGALE

3.3.5. Saving the master record

When all the required data has been entered press floppy disc icon to save the new customer master record:

System message confirming successful setup and customer number will be displayed at the bottom of the SAP screen:

Once customer creation is saved and completed, do not forget to complete ZVAR_CHANGE setup (Appendix 8) if this was a sold-to & bill-to creation that requires e-invoicing activation.

3.4. Credit control

Sold-to and Payer account group customers have to be blocked immediately after being set up (go to section **Blocking customer** for additional detailed instructions on blocking customer record) and then information has to be sent to the Credit Management for review and completion of the Credit data. After their confirmation is received Data Management should check and change the Terms of Payment and assign Accounting Clerk and Account Statement period if applicable. After this is done Data Management may unblock customer and close the ticket.

Email subject : Customer creation/extension/change - #customer number - CUSTOMER NAME

Credit management contacts:

- David Stephens: david.stephens@aerovac.com
- Jane Walker: jane.walker@aerovac.com

3.5. Global Demand Planner

Once you have created / extended / reactivated **sold-to and/or ship-to account**, notify Global demand planner:

- Clare Downing Smith: clare.downing-smith@aerovac.com

In the email include the following information:

- account number and name
- sales area

3.6. Blocking new customer setups

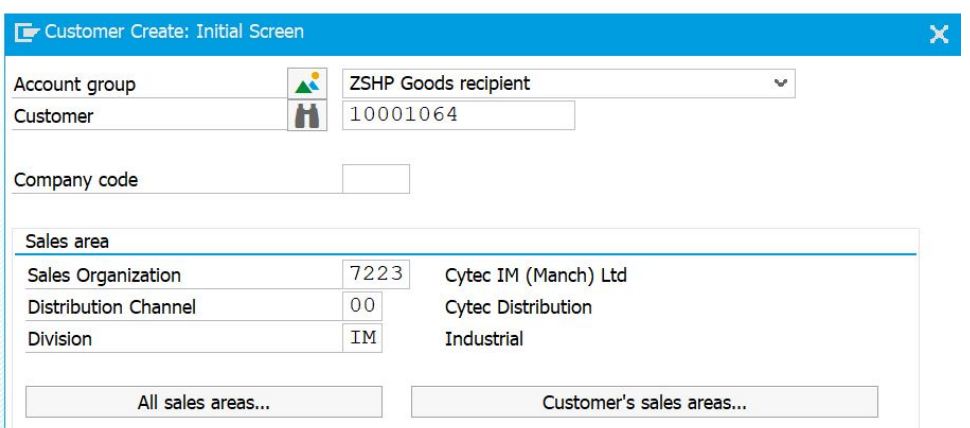

A customer master record can be blocked whenever there is a need to temporarily stop all or part of business relations with a customer. **NOTE!** Credit's approval is required before performing block/unblock, deactivate/reactivate customers.

In order to ensure that the new customer created is not used for raising sales orders before credit fields are completed, right after completing the setup on the Data Management side and before sending information about this customer for Credit's approval, it has to be blocked. After approval from Credit is received and credit fields are completed, the block can be removed.

<p>Transaction to block Customer Master record is XD05 – Block customer (centrally) or transaction XD02 - modify master data.</p> <p>It is possible to block customers for all Company Codes and all Sales Areas or only for selected ones. There are several types of blocks in SAP and each of them have several options to be chosen.</p> <p>The example below shows a typical set of blocks for a new customer created and awaiting to be released from Credit Control.</p> <p>A block in a customer master record can be cancelled by removing the block indicators and saving the master record.</p>	<table border="1"> <tr> <td>Customer</td> <td>10002791</td> <td>SPACE EXPLORATION TECHNOLOGIES CORP</td> </tr> <tr> <td>Company Code</td> <td>1246</td> <td>Aerovac LLC</td> </tr> <tr> <td>Sales Org.</td> <td>1246</td> <td>Aerovac LLC</td> </tr> <tr> <td>Distr. Channel</td> <td>00</td> <td>Cytec Distribution</td> </tr> <tr> <td>Division</td> <td>IM</td> <td>Industrial</td> </tr> </table> <hr/> <p>Posting Block</p> <p><input type="checkbox"/> All Company Codes</p> <p><input type="checkbox"/> Selected Company Code</p> <hr/> <p>Sales and Distribution Blocks</p> <p>Order Block</p> <table border="1"> <tr> <td>All Sales Areas</td> <td>01</td> <td>Overall block</td> </tr> <tr> <td>Selected Sales Area</td> <td></td> <td></td> </tr> </table> <p>Delivery Block</p> <table border="1"> <tr> <td>All Sales Areas</td> <td>01</td> <td>Planning Block</td> </tr> <tr> <td>Selected Sales Area</td> <td></td> <td></td> </tr> </table> <p>Billing Block</p> <table border="1"> <tr> <td>All Sales Areas</td> <td>06</td> <td>Cytec Services</td> </tr> <tr> <td>Selected Sales Area</td> <td></td> <td></td> </tr> </table> <p>Block Sales Support</p> <p><input type="checkbox"/> All Sales Areas</p> <p><input type="checkbox"/> Selected Sales Area</p>	Customer	10002791	SPACE EXPLORATION TECHNOLOGIES CORP	Company Code	1246	Aerovac LLC	Sales Org.	1246	Aerovac LLC	Distr. 4. Extending customer to Company Code and/or Sales Area

If an existing customer (Sold-to, Ship-to, Bill-to, Payer, etc.) has to be extended to another Company Code/Sales Area, **follow the same steps as for new customer creation (according to the account group type)**, the important part is to populate customer number field with the number to be extended in the selection screen of Transaction **XD01/FD01/VD01**.

<p>Example: Ship-to customer #10001064 is created for Sales Area 7218/00/IM. Request is received to extend it to 7223/00/IM:</p> <p>Account group: of the party to be extended (ZSLD – Sold-to, ZSHP – Ship-to, etc.)</p> <p>Customer: must be filled with the customer number to be extended</p> <p>Company Code: to be filled with Co.Cd. for which the customer has to be extended if applicable</p> <p>Sales Organization: to be filled with Sales Org. for which the customer has to be extended if applicable</p> <p>Distribution channel: always "00" if applicable</p> <p>Division: to be filled with division for which the customer has to be extended if applicable</p> <p>Hit Enter and populate all required fields with information supplied.</p> <p>NOTE! All business specific fields have to be confirmed by corresponding CSR (requestor) or credit manager (in case of payment terms), e.g., incoterms, ABC class etc.</p>	 <p>The screenshot shows the 'Customer Create: Initial Screen' in SAP. It includes the following fields and values:</p> <ul style="list-style-type: none"> Account group: ZSHP Goods recipient Customer: 10001064 Company code: (empty) Sales area section: <ul style="list-style-type: none"> Sales Organization: 7223 (Cytec IM (Manch) Ltd) Distribution Channel: 00 (Cytec Distribution) Division: IM (Industrial) Buttons: 'All sales areas...' and 'Customer's sales areas...'
---	---

5. Customer inactivation

There is two ways how to inactivate customer account:

1. Overall account inactivation - most commonly used when an account is being made inactive due to no sales for the past 2 years (in all sales areas), due to invalid registration number, address duplicate. Blocks and deletion flags are set on general data, company code data and sales area data.
2. Sales area specific inactivation - most commonly used when an account is being made inactive due to no sales for the past 2 years in a specific sales area, or sales area created by mistake.

5.1. Blocking existing customer in sales/company code view

Used when customer must be blocked in a specific sales area (and other active sales areas remain active).

Transaction to block Customer Master record is **XD02 - modify master data**. Alternatively you can also use **XD05 – Block customer (centrally)**.

Customer block consists of two parts:

1. selecting blocks in **Extras - Blocking data**
2. selecting deletion flag in **Extras - deletion flags**

NOTE! "Selected company code" block can be applied only if:

- **customer is not open for the same company code in combination with another division that is active.**
Each company code can be open in combination with two divisions - AM and IM. E.g. customer can be open for 7218/00/IM and 7218/00/AM - these are two different sales areas but shares same company code information. If you assign a company code block, it will block company data for both sales areas.
If company code is used for both divisions under the same company code:
= second sales area is blocked or not created - you can add "Selected company code" block
= second sales area is created and without sales area blocks - do not select "Selected company code"

NOTE! Same rules applied to "Selected company code" deletion flags.

Customer	10002066	MUBEA CARBO TECH GMBH	SALZBURG

Selected company code incl. general data

5.2. Marking customer for deletion (overall account inactivation)

A customer master record can be marked for deletion if, for example, Solvay no longer maintains business relationships with the customer. Customer master record can be reactivated by deselecting the Deletion Flag.

NOTE!

- Credit's approval is required before performing block/unblock, deactivate/reactivate customers.
- In case if we receive a request from CS or Data Stewards to re-activate any of accounts that have been marked as a duplicate for some reason, like, order line shipped but not invoiced, please re-activate them **immediately**.
- Before inactivating customer always check sales order history to make sure that there is no recent sales activity (Appendix - How to find and display order?)

Transaction to block Customer Master record is **XD02 - modify master data**. Alternatively you can also use **XD06 – Mark customer for deletion (centr.)**

When marking customer for deletion, first:

- **customer name (1st line)** needs to be updated by adding in the end of the name "- INACTIVE"/"- DUPLICATE"/"- INVALID VAT" - according to the reason for deletion. Between the name and reason of deletion keep the dash sign so it is more visible in reports etc. If customer name is too long, move part of the name to 2nd line so you can add reason of deletion in the 1st line:

Address	Control Data	Payment Transactions	Marketing	Unloading Points
<div style="display: flex; justify-content: space-between; align-items: center;"> Preview </div>				
Name				
Name	MUBEA CARBO TECH GMBH - INACTIVE			
Search Terms				
Search term 1/2	****INACTIVE			

- change **Search term** to one of the following options:
 - ****INACTIVE - if customer has been inactivated due to no sales in past 18 months
 - ****DUPLICATE - if customer has been inactivated due duplication
 - ****INVALID - if customer has been inactivated due invalid/incorrect registration number
 - ****DO NOT USE - rarely to be used for setups which is not possible to fix in any way
- then go to **Extras - Blocking data** and add blocks for "all sales areas" and "selected sales area" as shown below:

Customer	10002066	MUBEA CARBO TECH GMBH - INACTIVE
Company Code	7218	Cytec IM (Derby) Ltd.
Sales Org.	7218	Cytec IM (Derby) Lim
Distr. Channel	00	Cytec Distribution
Division	AM	Aerospace

Posting Block	
<input checked="" type="checkbox"/>	All Company Codes
<input checked="" type="checkbox"/>	Selected Company Code

Sales and Distribution Blocks	
Order Block	
All Sales Areas	01 Overall block
Selected Sales Area	01 Overall block

Billing Block	
All Sales Areas	06 Cytec Services
Selected Sales Area	06 Cytec Services
Block Sales Support	
<input checked="" type="checkbox"/>	All Sales Areas
<input checked="" type="checkbox"/>	Selected Sales Area

- then go to **Extras - Deletion flags** and select all fields as shown below:

Customer	10002066	MUBEA CARBO TECH GMBH - INACTIVE
Company Code	7218	Cytec IM (Derby) Ltd.
Sales Org.	7218	Cytec IM (Derby) Lim
Distr. Channel	00	Cytec Distribution
Division	AM	Aerospace

Deletion flags	
<input checked="" type="checkbox"/>	All areas
<input checked="" type="checkbox"/>	Selected company code
<input checked="" type="checkbox"/>	Selected sales area

Deletion blocks	
<input checked="" type="checkbox"/>	General data
<input checked="" type="checkbox"/>	Selected company code incl. general data

6. Customer reactivation

Customer can be reactivated (if not marked for deletion due to invalid registration number) by deselecting all the blocks and deletion flags. And do not forget to update the name and search term in the general data view.

Remember, that reactivation requires approval from the Credit Management side.

IMPORTANT TO NOTE! If a customer is marked for deletion in all sales areas, reactivate only the requested area!

This means that you need to remove blocks and deletion flags from fields concerning "all areas" but do not remove blocks for "selected sales areas" in other sales areas that should remain inactive.

7. Change customer data

To perform any change in Customer Master record use transaction **XD02 – Change Customer (Centrally)**:

Full path: Logistics/Sales and Distribution/Master Data/Business Partner/Customer/Change/XD02 – Complete

To change data in General Data (some tabs) or Sales Area Data transaction **VD02 – Change Customer (Sales)** can be used as alternative.

Full path: Logistics/Sales and Distribution/Master Data/Business Partner/Customer/Change/VD02 – Sales and Distribution

To change data in General Data (some tabs) or Company Code Data transaction **FD02 – Change Customer (Accounting)** can be used as alternative.

Full path: Accounting/Financial Accounting/Accounts Receivable/Master Records/FD02 – Change

NOTE! Make sure all required documentation and approvals have been supplied along with the change request before performing actual change in system.

When all the required changes have been performed press floppy disc icon to save the record:

System message confirming change will be displayed at the bottom of the SAP screen:

8. Display changes

All the changes performed in Customer Master record can be tracked.

To display changes of a particular field open the master record (e.g. **XD03**) and select **Environment -> Field Changes**:

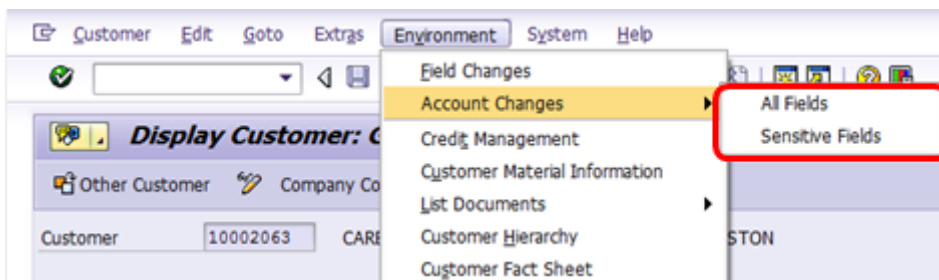

An overview of the changes done to the field will be displayed:

Customer Changes : Overview			
Changed Fields Entries Deletions Field Names			
Customer 0010002063 CARBON TECHNOLOGY LIMITED			
Date	Field	New	Old
07.04.15	Acct.clerks tel.no.	+371 6711 8990	0037167118990164

Double-click on any value will give more details – time of change and the ID of the person that performed the change will be displayed:

PE1(1)/300 Details	
Details	
Date	07.04.2015
Time	08:50:16
User	ISACENOKAI
Field	Acct.clerks tel.no. (K01B1-ILFNS)
from	0037167118990164
to	+371 6711 8990
Changed in Company Code 7218	

Selecting **Environment -> Account Changes -> All Fields** will display all changes performed in the customer master record, selection **Sensitive Fields** will limit the list to changes of customer name, tax and VAT codes:

By using transaction **SU01D** you can find more information on the person behind every user ID:

User Maintenance: Initial Screen

🔍

9. Account group upgrade

It is possible to change Account Group of customer by transaction **XD07 – Change Customer Account Group**. Account group upgrade is possible from Ship-to, Bill-to, Payer or Prospect to Sold-to.

Change Account Group

Customer: 10001792 KAMAN COMPOSITES - VERMONT

SE1(1)/500 Company Codes/Sales Areas by Customer

Customer: 10001792 KAMAN COMPOSITES - VERMONT
Account group: Goods recipient

must be maintained after the account group has been changed

Co...	Company Name	Sal...	Name	D.. Name	D.. Name
		1237	Cytec IM (OK) Inc	00	Cytec Distribution
					IM Industrial

The new Account Group has to be entered in the dialogue window:

SE1(1)/500 Change Account Group

Customer: 10001792 KAMAN COMPOSITES - VERMONT

Account group: Goods recipient

New account group:  ZSLD Sold-to party

A message indicates fields that are mandatory to be maintained for customers of the Sold-to Account Group:

SE1(1)/500 Change Account Group: Critical Field Groups

Customer 10001792 KAMAN COMPOSITES - VERMONT

The following field groups must be maintained as ;; -->
the change has made them mandatory fields:

S	Group	Group name	M...	Group name
V	D310	Sales	016	Currency
V	D320	Billing	003	Account assignment group
			004	Terms of payment
			013	Incoterms

Save the record after maintaining the additional information:

SE1(1)/500 Information

i Customer 10001792: Account group Goods recipient has been replaced by Sold-to party

 

NOTE! Missing views have to be manually created after Account Group upgrade is performed:

- ZSHP/ZBTP -> ZSLD create Company Code Data, use **FD01** (or **XD01**)
- ZPRS -> ZSLD create Company Code Data and Sales Area Data, use **XD01**

SE1(1)/500 Customer Create: Initial Screen

Account group  ZSLD Sold-to party

Customer  10001792

Company Code 1237

10. Returns vendor maintenance

New returns vendor creation is required for all new raw-material & packaging vendors. Usually requests related to returns vendor accounts is received from Data operations representatives working with vendor master data.

Request for returns vendor must be submitted as a separate ticket under Customer domain. In request description the following information must be provided:

- vendor number (ZVEN account number)
- company code
- reference to the initial ticket for new vendor creation

No need to perform any validations and Tradebeam checks as it already should be done by Vendor team.

Returns vendor creation

Display vendor master data

Use transaction **XK03 - Display Vendor** in order to display vendor information.

Rest of them: always "1"

Partner functions

No information to be maintained here for new creations. Returns vendor rarely has partner functions assigned. Most commonly it would be CR - Forwarding Agent but this is not relevant for new creations.

Save the record.

Returns vendor changes & extensions

Once general data changes has been performed to raw-material and packaging vendor, Vendor team must request same change for its returns vendor account.

No validations needs to be done as it already should be done by Vendor team before performing changes to vendor master data. Normally, changes requested will include name and address change. If registration number has changed, new account must be created.

If Customer team has received request for general data changes and we have returns vendor account with matching details, we should create a ticket for Vendor team to check if this information is applicable for vendor account. Only after their confirmations, returns vendor should be updated.

Extensions to other sales areas are created automatically so there is no need to perform extensions if vendor is created for several company codes. **DO NOT** open company code view for returns vendors!

Returns vendor inactivation

There is no need to ask approval from Credit Management if we have received ticket to inactivate returns vendor account due to invalid VAT, or inactive vendor account.

If request has been received from vendor team, following steps needs to be performed:

1. After the name add "- INACTIVE"/"- DUPLICATE"/"- INVALID VAT" - according to the reason of deletion;
2. Add blocks and deletion flags as described in Chapter "Blocking customer & Marking customer for deletion".

Appendixes

Appendix 1 – Required documentation

A request for customer setup/maintenance must be accompanied by approvals and the documents listed below.

	SOLD-TO & PAYER accounts	SHIP-TO & BILL-TO accounts	COMMENTS
NEW & REACTIVATION	<ul style="list-style-type: none"> • Request form • Filled and signed AEROVAC Credit application • Purchase Order • If US customer - Bank and Trade references • If China customer - business license 	<ul style="list-style-type: none"> • Request form • Purchase Order (optional) 	IF PO not available - also accepting communication from customer stating the future order / customer company letterhead
NAME change	<ul style="list-style-type: none"> • Official letter supporting the change • Purchase Order if available 	<ul style="list-style-type: none"> • Purchase Order 	
ADDRESS change	<ul style="list-style-type: none"> • Purchase order • or Email from the customer stating the change • or Blank customer company letterhead 	<ul style="list-style-type: none"> • Purchase order • or Email from the customer confirming the change 	
BANK DETAILS	<ul style="list-style-type: none"> • Letterhead with bank details or • Email from customer stating bank details 	-	If email, email domain should match other contacts in customer account
SALES AREA changes	Customer number, sales area, description of the change required	Customer number, sales area, description of the change required	CHANGES like incoterms, destination, shipping conditions, contacts, text notes etc.

Account UPGRADE	Same as NEW & REACTIVATION	-	Upgrade can be from Ship-to, Bill-to, Payer and Prospect to Sold-to
TAX ID change	Same as NEW & REACTIVATION	Ship-to or Bill-to number and new registration number.	IF addition or typo correction: <ul style="list-style-type: none"> • EU – official documentation • US – W-9 form • LAM – TAX ID validation form • CN - business license
PAYMENT TERMS	Contact Credit Manager directly	-	Approval from Credit manager is mandatory
SALES MANAGER changes	Contact Clare Downing Smith directly	-	Approval from Clare is mandatory

- To set up **Sales Account Manager**. Requests should come only from Claire-Downing Smith.

- To set up **Ultimate Consignee, Buyer, Freight Payer, Commissions Agent** no documents are required, supply customer Name and Country and indicate SAP Number of existing Sold-to for link.

- To set up **End User, Customer Service Representative, Credit Manager** no documents are required, customer Name and Country is sufficient.

- To set up **Returns Vendor** as customer no documents are required, respective Vendor number has to be provided.

- To set up **Intercompany** please refer to SAP Intercompany Work instructions.

All other changes may be requested by filling Customer Master Data Maintenance Request or in a text message.

Appendix 2 – Changes/Approvals/Creations table

TYPE OF CHANGES or CREATIONS	Credit Management approval needed?	Responsible for maintenance

Regular customer creation (Sold-to + Payer; account groups ZSLD + ZPYR)	YES (after the record is created DMO will block it and send it to CM for their review and completion of the credit data; after approval is received the record will be unblocked and released to the requester)	DMO
Sold-to / Payer name change (no ownership changes)	YES (before any changes are implemented)	DMO
Sold-to / Payer name change (due to ownership changes)	YES (a new customer code should be created, but an approval needs to be obtained first for a creation and deactivation of the old code)	DMO
Sold-to / Payer address change (within the same country)	NO	DMO
Bill-to creation/ address change (within the same country or to another country)	NO	DMO
Any Ship-to changes (creation, activation/deactivation, link to a sold-to, name, address, shipping conditions, incoterms changes; account group ZSHP). Not applicable to ZSAM changes.	NO	DMO
General customer contacts in customer master (telephone, fax)	NO	DMO
Dunning procedure changes	YES (before any changes are implemented)	DMO
Language	NO (but in SAP default language should always be ENG)	DMO
Currency	YES	DMO
VAT # or Tax ID	YES (a new customer code should be created, then DMO will block it and send it to CM for their review and completion of the credit data as well as for an approval to deactivate the old code; after approval is received the new record will be unblocked and released to the requester and the old one will be blocked)	DMO
Prospect customer creation / changes (account group ZPRS)	YES	DMO
Intercompany customer creation / changes (account group ZINC)	NO	DMO
ZSAM change	NO, but approval from Clare Downing-Smith required (sold-to & ship-to, including ZSAM changes upon customer re-activation) – usually no actions required – Clare requires the account in mass update list	DMO
Ultimate consignee creation / changes (account group ZULC)	NO	DMO
Ultimate consignee link (account group ZULC)	NO	Customer Service (on the order level)
Sales account manager creation / link / changes (account group ZSAM)	NO, but approval from Clare Downing-Smith required (sold-to & ship-to, including ZSAM changes upon customer re-activation)	DMO
Customer Service Representative creation / changes (account group ZCSR)	NO	DMO
Customer Service Representative link (account group ZCSR)	NO	Customer Service (on the order level)
One-time customer creation / changes (account group ZCPD)	NO (as long as Cytec is not charging money on orders)	DMO
Commissions Agent creation / link / changes (account group ZCOM)	NO	DMO
Credit Manager creation / link / changes (account group ZCRM)	YES (before any changes are implemented)	DMO
Freight Forwarder link (vendors-carriers)	NO	DMO
Freight Payer creation / link (to a Ship-to) / changes (account group ZFPY)	NO	DMO
Payment terms creation / changes	YES (before any changes are implemented)	DMO
Block / unblock, mark / unmark for deletion (Bill-to / Sold-to / Payer / Credit Manager / Parent)	YES (before any changes are implemented)	DMO
Block / unblock, mark / unmark for deletion (Ship-to / Prospect / Customer Service Representative / Sales Account Manager / Intercompany / Ultimate Consignee / One-time customer / End User / Returns Vendor / Buyer / Commissions Agent / Freight Payer)	NO	DMO
Tax classification changes (change customer's status from / to taxable / non-taxable)	NO	DMO
Customer extension to another SO / Company (Sold-to / Payer)	1) NO – if requested payment terms remains the same as for existing sales areas. After extension notification to CM must be sent with all documentation attached. 2) YES – if requested payment terms are different from already existing sales areas. Can be temporary setup with existing payment terms for another SO.	DMO

Customer extension to another SO / Company (Credit manager / Parent)	YES (only after approval DM extends customer to different SO)	DMO
Customer extension to another SO / Company (Ship-to / Prospect / Bill-to/Customer Service Representative / Sales Account Manager / Intercompany / Ultimate Consignee / One-time customer / End User / Returns Vendor / Buyer / Commissions Agent / Freight Payer)	NO	DMO
Payer link to a Sold-to (in case Payer is different)	YES (before any changes are implemented)	DMO
Bill-to link to a Sold-to (in case Bill-to is different)	No	DMO
Account group upgrade into a Sold-to (Ship-to / Prospect / Bill-to / Payer)	YES (after the record is upgraded DMO will send it to CM for their review and completion of the credit data; after approval is received the record will be released to the requester)	DMO
Credit risk (=bad-debt accounts) check mark	YES	Credit (a box which can be ticked in the credit view)
Credit limit setups / changes, credit checking parameters and other credit fields	YES	Credit (everything is maintained in the credit view)

Appendix 4 – How to find and display order?

Sometimes it may be useful to find out who created a certain order in SAP. This can be used, for example, to determine a correct person to turn to when the VAT# of the customer changed, a new account has been created, and in order to block the old one all open orders need to be reassigned.

Transaction to display an order is **VA03 – Display Sales Order**. Fill Order number in the selection screen or use Search options to find it by Sold-to customer number:

Appendix 5 – Transportation Zone coding

Name	
Name	CARBON BY DESIGN
Search Terms	
Search term 1/2	CARBON BY DESIGN
Street Address	
Street/House number	1491 POINSETTIA AVE SUITE 136
District	SAN DIEGO
Postal Code/City	92081 VISTA
Country	US USA Region CA California
	Tax Jurisdictn 0507337000
Transportation zone	US920 POWAY

Transportation Zones are dependent upon Country Code master (T005). Customer, Vendor and Routes are dependent upon Transportation Zones.

Transportation Zone is defined based on Country Code (CC) and Postal code (PP..) as follows:

- For US: Country Code (US) + first 3 symbols of postal code, CCPPP (Example: US750 if the postal code is 75053-2029)
- For other countries: Country Code + first 3 symbols of postal code if postal code is less or equal to 5 symbols, CCPPP
Country Code + first 4 symbols of postal code if postal code contains more than 5 symbols, CCPPPP
- For countries which do not have zip codes (e.g. Ireland) : SAP Country Code + 3 or 4 zeros, CC0000.

Inner spaces and dashes are eliminated before concatenation:

Ex1: Country CA, Post code H7L 4R9 = 6 symbols = CCPPPP = CAH7L4 (no space)

Ex2: Country KA, Postal code 110-360 = 6 symbols = CCPPPP = KA1103 (no dash)

Appendix 6 – Sales Account Manager setup (ZSAM)

Sales Account Manager creation and modification requests should be received only from Clare Downing Smith. If request is received from any other person, Clare's approval must be obtained before setting up or changing information on ZSAM accounts.

For SAM maintenance use T-codes **VD01 - create /VD02 - modify /VD03 - display**

<p>Account group: ZSAM Sales Acct Manager</p> <p>Customer: must not be filled, a number will be given automatically as per defined number range at the moment of saving the new record, see section Customer Master Account Groups for number range assignment.</p> <p>Sales Organization: to be filled if necessary with areas for which the customer has to be opened, see list of Sales organizations in Company Codes and Sales Organizations. Provided by requester.</p> <p>Distribution channel: always "00" – Cytec Distribution</p> <p>Division: "IM" for Industrial Materials Customers; "AM" for Aerospace Materials Customers. Provided by requester.</p>	<p>Customer Create: Initial Screen</p> <p>Account group <input type="text" value="ZSAM Sales Acct Manager"/></p> <p>Customer <input type="text"/></p> <hr/> <p>Sales area</p> <p>Sales Organization <input type="text"/></p> <p>Distribution Channel <input type="text"/></p> <p>Division <input type="text"/></p> <p>All sales areas... Customer's sales areas...</p>

Appendix 8 – Customer Invoice Email Job setup

When a new customer who wants to receive invoices via email is set up, it is required that the customer number must be added to the variant jobs which control email and paper (print job) of invoice output. The variants of the invoice output to be updated are as follows:

Variant to enable e-invoicing	Variant to disable printing
Z_EMAIL_1246 & Z_EMAIL_1246AM	Z_PRINT_1246
Z_EMAIL_7250	Z_PRINT_7250
Z_EMAIL_7257	Z_PRINT_7257
Z_EMAIL_7252	Z_PRINT_7252

- Z_EMAIL are for switching ON e-invoicing
- Z_PRINT are for switching OFF printed invoices

Usually when an email address has been provided for e-invoicing and we switch ON e-invoicing, we switch OFF paper invoices by default even if requester did not mention that. Please note that there could be exception cases for so: 7252 & 7257 that will be described in the next steps.

Enter transaction **ZVAR_CHANGE** and select variant name from drop-down list program variant that must be updated, and then press Execute.

Please note that if a sold-to customer has additional bill-to number added in master data partner functions, Invoice receiver details must be added also to the bill-to account, and both number (sold-to and bill-to) must be added to variants.

Variants are activated after customer account is set and email for e-invoicing has been added in master data, and even if the customer is created only for one sales area, we are activating variants for all sales area options, so if you will extend customer to another sales area, you will not need repeat this step.

t Variants: Report SD70AV3A, Variant Z_E

Change variant name to **Z_EMAIL_1246AM** and perform the same steps as you did for **Z_EMAIL_1246**.

And then perform the same steps also for variant **Z_EMAIL_7250**.

Variant Z_EMAIL_7257

This variant has an exceptional setup rules depending on the fact if customer is IT domestic customer or not. Meaning,

- if customer is located in Italy and opened for so: 7257 = it is domestic customer
- if customer is not located in Italy and opened for so: 7257 = it is non-domestic customer
- if customer is located in Italy and opened for any other sales area than so: 7257 = it is non-domestic customer

For this variant maintenance we just need to pay attention to the first two points.

Edit Variants: Report SD70AV3A, Variant Z_EMAIL_1246

Sales organization	1246			
Distribution channel	00			
Division	IM			
Sold-to party		to		
Payer	11003501	to		
Destination country				

1. IF Customer is **located in Italy + opened for so: 7257 (domestic customer) = e-invoicing and printed invoices must be switched OFF**

Go to payer line and click on button **Multiple selection**.

As explained by giuseppina.barovero@aerovac.com:

ALL ITALIAN DOMESTIC customers receive an XML file automatically from SAP via SDI (that's why we have tax n. 4 field populated in the master data).
 >> they don't want to receive a PDF via email from SAP (what is called ZRD1 output in the billing document header)
 >> we don't want to have paper copies printed out locally because it's not requested to store hard copies

In order to do that, in variant **Z_EMAIL_7257** you need to add customer number (sold-to and bill-to) to **Exclude Single values**.

- EMAIL variant 7257 = customer number added to Exclude single values
- PRINT variant 7257 = customer number added Exclude single values

Once added to the list, press button **Copy** and you will return to the previous page.

2. IF Customer is located in any other country than Italy + so: 7257 (non-domestic customer) = e-invoicing and printed invoices must be switched ON

As explained by giuseppina.barovero@aerovac.com:

NON DOMESTIC customers follow the general rule: if they want to receive the billing documents via email, then the customer must be set in the variant for the e-invoice (email). We also need a hard copy printed out locally because of the local compliance about non XML invoices.

Go to payer line and click on button **Multiple selection**.

In order to do that, in variant **Z_EMAIL_7257** you need to add customer number (sold-to and bill-to) to **Select Single values**.

- EMAIL variant 7257 = customer number added to Select single values - to be added in the variant only if there is an invoice receiver added in master data
- PRINT variant 7257 = no action required

Appendix 9 – Bank details

Bank details should be added only to the sold-to accounts.

Bank details can be added only when AR or CS has provided one of the following bank details conformations:

- 1) customer letterhead with bank details
- 2) email from customer saved in pdf format, in which customer asks to use certain bank account for the refund. Customer email domain should match with other contacts set up in the systems for the given customer number.

Prior of making any amendments in the system you must **validate bank details** provided. See work instructions "Validations For Customer And Vendor Master Data"

1) If you have bank details **with IBAN number**, the easiest option to add it is:

- after you have validated IBAN number and validation results comes back with no errors

- go to the sold-to account for which you need to modify the bank details by using **transaction XD02**
- in general data view - go to Payment transactions and press on button **IBAN**

Address Control Data **Payment Transactions** Marketing Unloading Points Contact Person

Bank Details

Control key	
Reference	

- by doing this, system will divide all the information in the fields required
- then add sequential number of bank account, set "0001" for default banking details, for the others "0002", "0003", etc.

Customer 19000118 TECNO TESSILE ADLER SRL AIROLA

Address Control Data **Payment Transactions** Marketing Unloading Points Contact Person

Bank Details

Ctry	Bank Key	Bank Account	Acct holder	Co. I...	IBANValue	Bk.typ.	Reference details	Colle...	Bank name
IT	06940034	100000003147			IT41X0306940034100000003147	0001		<input type="checkbox"/>	INTESA SANPAOLO SPA

Bank Data... Payment cards IBAN

in case there is several bank detail lines, bank type should go in sequence ,e.g. 0001, 0002, 0003 etc.

- and if you are adding bank details for refund, you might need to change payment method in company code (if requested)

2) If you have other type of bank details

Address	Control Data	Payment Transactions	Marketing	Unloading Points	Contact Person					
Bank Details										
Ctry	Bank Key	Bank Account	Acct holder	Co...	I...	IBANValue	Bk.typ.	Reference details	Colle...	Bank name
US	021309379	601877418					0001		<input type="checkbox"/>	Unknown
									<input type="checkbox"/>	
									<input type="checkbox"/>	

Bank Data...    Payment cards  IBAN

Ctry: Enter country code of the bank.

Bank Key Bank key / Sort code for UK / ABA for US / CSA for Canada.

Bank Account: Enter bank account number.

Bk.typ: Sequential number of bank account, set "0001" for default banking details, for the others "0002", "0003", etc.

Swift Code or BIC is used ONLY for International Wire Transfers. If you are doing only domestic payments then you only need ABA or routing number of bank instead of swift code. Some International wires require an IBAN number, but bank accounts in the USA do not have an IBAN. However, you need to provide ABA Routing Number and your Account Number along with Swift Code of bank to initiate International wire transfer.

Europe: The registrations of Swift Codes are handled by Society for Worldwide Interbank Financial Telecommunication ("SWIFT"). Swift Code is a standard format of Bank Identifier Codes (BIC) and it is a unique identification code for a particular bank. The Swift code consists of 8 or 11 characters:

- First 4 characters - bank code (only letters)
- Next 2 characters - ISO 3166-1 alpha-2 country code (only letters)
- Next 2 characters - location code (letters and digits) (passive participant will have "1" in the second character)
- Last 3 characters - branch code, optional ('XXX' for primary office) (letters and digits)

America: An ABA number (or RTN - Routing Transit Numbers) is a code that identifies your bank. This code helps other banks transfer money to and from your account; it is similar to an address which tells everybody where to find your account. "ABA" is used because the American Bankers Association (ABA) assigns the numbers to banks. It is usually nine digit number.

Appendix 10 – SAP table lists

Commonly used SAP tables for reporting.

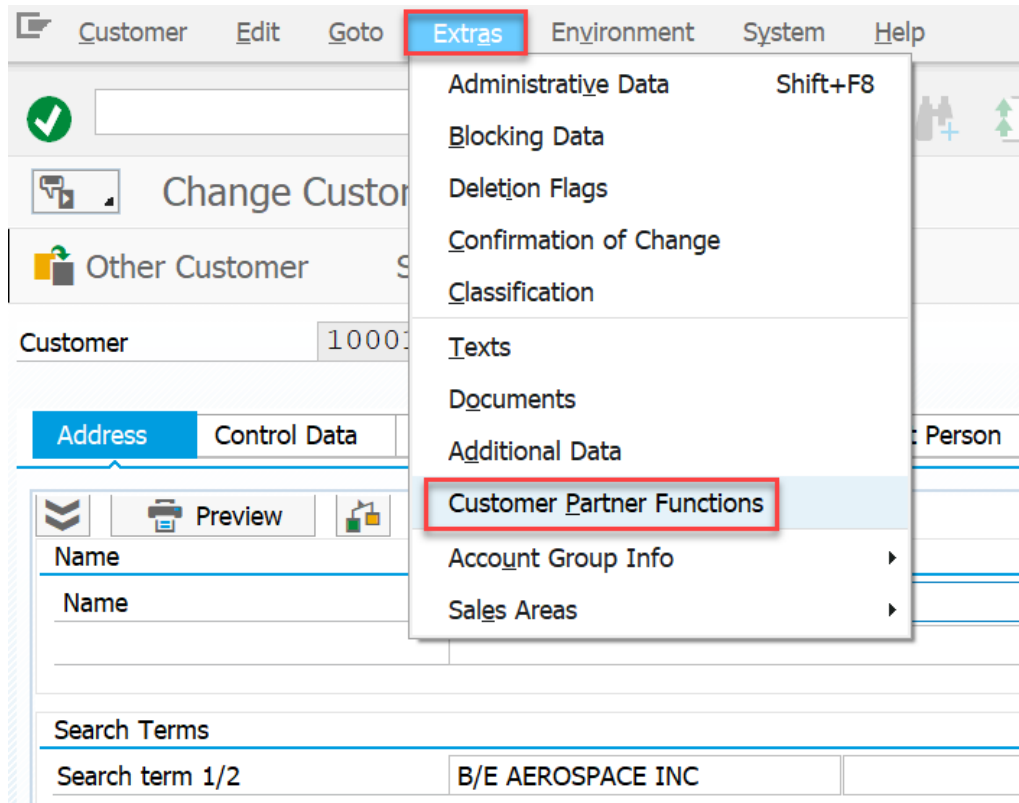

Transaction: SE16 or SE16N

Table	Description	Area
KNA1	general data	customer
KNA1VV	address and sales data	customer
KNB1	company code data	customer
KNBK	Bank details	customer
KNKK	credit limit and risk	customer
KNVA	Unloading point	customer
KNVP	partner functions	customer
KNVV	sales area data	customer
TPART	find by partner function	customer
ADRC	address	general
ADR6	emails	general
ADR2	Contact Telephone number	general
ADR3	Contact Fax number	general
TZONE	transportation zone	general
VBAK	order header	sales orders
VBAP	order item data	sales orders
VBPA	order partner functions (all)	sales orders
ZWOCR05	open order reports (WP1 specific)	sales orders

Appendix 11 – How to check partner functions

When you are checking a given account number and you want to see if this account is linked to any other account, you can find it in the following way.

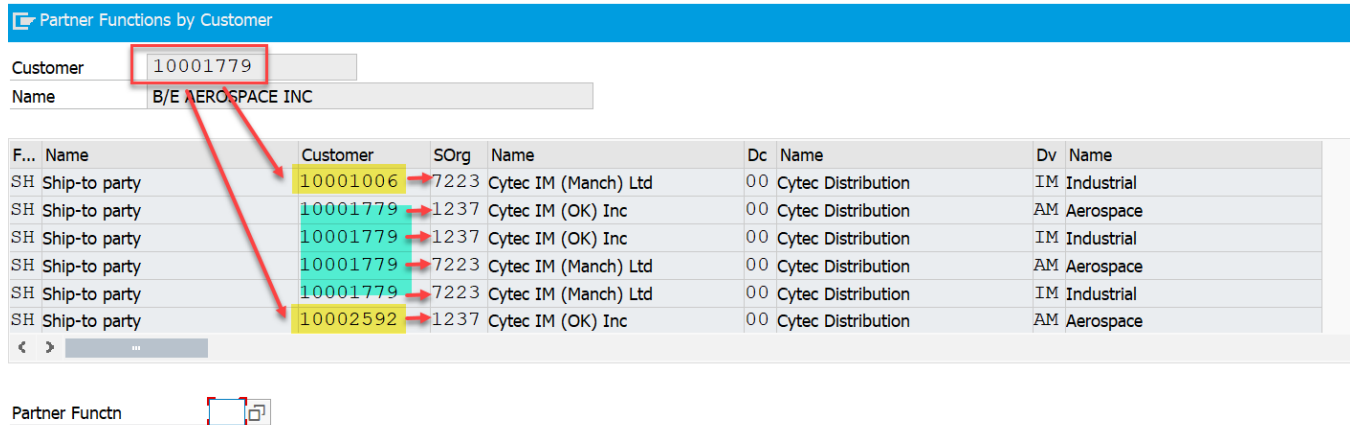

Open the account, go to Extras - Customer Partner functions:

The screenshot shows the SAP interface for a customer account. The 'Extras' menu is open, and 'Customer Partner Functions' is highlighted. The background shows the customer details for account 10001779, B/E AEROSPACE INC.

Example: account 10001779 B/E AEROSPACE INC (created as goods recipient account) is linked to:

- as a ship-to partner to sold-to account #10001006 B/E AEROSPACE INC - SFC NOGALES in sales area 7223/IM
- as a ship-to partner to sold-to account #10002592 B/E AEROSPACE INC in sales area 1237/IM
- and exists as ship-to partner for itself in sales areas 1237/IM, 1237/AM,7223/IM,7223/AM

The screenshot shows the 'Partner Functions by Customer' table in SAP. The customer number 10001779 is entered in the search field. The table lists various partner functions for the customer, including ship-to and sold-to relationships.

F...	Name	Customer	SOrg	Name	Dc	Name	Dv	Name
SH	Ship-to party	10001006	→7223	Cytec IM (Manch) Ltd	00	Cytec Distribution	IM	Industrial
SH	Ship-to party	10001779	→1237	Cytec IM (OK) Inc	00	Cytec Distribution	AM	Aerospace
SH	Ship-to party	10001779	→1237	Cytec IM (OK) Inc	00	Cytec Distribution	IM	Industrial
SH	Ship-to party	10001779	→7223	Cytec IM (Manch) Ltd	00	Cytec Distribution	AM	Aerospace
SH	Ship-to party	10001779	→7223	Cytec IM (Manch) Ltd	00	Cytec Distribution	IM	Industrial
SH	Ship-to party	10002592	→1237	Cytec IM (OK) Inc	00	Cytec Distribution	AM	Aerospace

So if you would open sold-to account #10001006 B/E AEROSPACE INC - SFC NOGALES in sales area 7223/IM - partner functions tab, you would see all the partners linked to this sold-to account, including the ship-to account from screenshots above:

Customer	10001006	B/E AEROSPACE INC - SFC NOGALES	WINST
Sales Org.	7223	Cytec IM (Manch) Ltd	
Distr. Channel	00	Cytec Distribution	
Division	IM	Industrial	

Sales Shipping Billing Documents **Partner Functions**

Appendix 12 – Customer mass maintenance

To perform change of a value in the same field for a list of customers Transaction **XD99 – Customer master mass maintenance** can be used.

NOTE! The transaction **XD99** should be used with extreme caution!

First option - when you need to change field data to the same value for several customer records

Select the field(s) to be changed:

Use search function (binocular) to easily find the field to be changed. Use technical name of the field in search. You can find out technical name of the field pressing F1 when field is selected and pressing Technical Information button:

Technical information of the field will be displayed:

SE1(1)/500 Technical Information

Screen Data
 Program Name: SAPMF02D
 Screen Number: 7321

GUI Data
 Program Name: SAPMF02D
 Status: 700A

Field Data
 Table Name: KRVV
 Table category: Transparent table
 Field Name: INCO1
 Data Element: INCO1

Field Description for Batch Input
 Screen Field: KRVV-INCO1
 Program Name: SAPMF02D
 Screen Number: 7000

✓ Navigate ✕

Limit selection as much as possible to perform the change only for the customers that need it:

✓ Data Records to Be Changed ✕ Data Records to Be Created

Do Not Change Existing Data

Restrict Data Records to Be Changed

Customer	10001062	To		
Sales Organization	1237	To		
Distribution Channel	00	To		
Division	IM	To		

Use additional options on the bottom of selection screen to amend selection options or add/remove selection fields if necessary:

As example Country field has been added to the list of selection criteria:

SE1(1)/500 Select fields

Selection criteria

- Customer
- Sales Organization
- Distribution Channel
- Division
- Country (KNA1-LAND1)

Pool

- Controlling Area
- Cost Center
- Cost estimate
- Country code
- Created by (KNA1-ERNA)
- Created by (KNVV-ERNA)
- Created on (KNA1-ERDA)
- Created on (KNVV-ERDA)
- Credit Control Area (KNV)
- CRT Number

Additional field is available now for record selection:

✓ Data Records to Be Changed ✕ Data Records to Be Created

Do Not Change Existing Data

Restrict Data Records to Be Changed

Customer	10001000	To		
Sales Organization	1237	To		
Distribution Channel	00	To		
Division	IM	To		
Country (KNA1-LAND1)	05	To		

The required new value(s) have to be entered in the designated space above list of customers. It is possible to deselect customers that do not require data to be changed:

General Data in Customer Master Customer Master Sales Data
