 - [BW - Material - Production Program Follow Up \(Core Query\)](#)

General Presentation

The BW PP Production Planning application regroups all the reports that are based on the inventory data and MRP elements in SAP and more particularly :

- The inventory movements (MM documents)
- The future elements (MRP)
- The capacities analysis

Reports are usually used by production and supply chain.

Access

Access to the application in the WBP Server is provided by **Company Code**. You can have access to one, several or all company codes.

Perimeter

The application in WBP covers the data from all companies found in the **RCS (WP1) System**.

It **does not include** Acetow or PF1 ERP systems data.

Data update

Most data is updated **several times per day** based on the [D4 loading schedule](#).

Reports (Queries/Workbooks)

CATEGORY	BW CORE QUERY NAME	BW TECHNICAL NAME
Production	BW - MRP Elements in the past (Core Query)	BW_QRY_CUB_PP02_0001
	BW - Projected Stocks 60 days (Core Query)	BW_QRY_MPR_IC001_0002
	BW - Stock Movement Production (core query)	BW_QRY_MPR_IC001_0013
	BW - Value stream production (core query)	BW_QRY_MPR_IC001_0065
Planning	BW - Capacity planning - Monthly (Core Query)	BW_QRY_CUB_CAPM_0001
	BW - Capacity planning - Weekly (Core Query)	BW_QRY_CUB_CAP_0001
