Most of the time, the customer agreement is received by email or phone. The user will then have to update the Quote status and put an accepted or denied value.

<p><b>If the Quote is rejected, the user enters the denied value in the status field and the process ends.</b></p> <p><b>If the quote is accepted, the user updates the status and an automatic email notification will go to the CSR specified in the CSR field.</b></p> <p><b>The CSR will then create the order in SAP after receiving the purchase order document.</b></p> <p><b>The notification user when an order is created for a specific quote can be done by the CSR through notes or chatter if needed.</b></p>					
<p>If the Quote is accepted, Augusto updates the status and an automatic email notification will go to the CSR specified in the CSR field.</p> <p>Note that to be set the status &lt;&lt;Accepted&gt;&gt;, at least one of the quote line items must be flagged as accepted.</p>	<p><b>Quote Line Item Detail</b></p> <p>Quote <a href="#">Q-00000000983</a></p> <p>Product <a href="#">ABEX AP 235</a></p> <p>Other Product name</p> <p>Minimum order quantity <input type="text"/></p> <p>Packaging</p> <p>Payment terms 30 Days</p> <p>Specific Payment Term</p> <p><b>include in Reporting / Accepted</b> <input checked="" type="checkbox"/></p>				
<p>The user can now fill the Agreement section of the quote:</p> <p>This section is relevant for GBU which will not use the contract object. If the quote itself is regarding as an agreement:</p>	<p>▼ Contract Informations</p> <table border="1"> <thead> <tr> <th>Agreement status</th> <th>Expiration Notice</th> </tr> </thead> <tbody> <tr> <td></td> <td>Expiration Notice before 14/09/2017</td> </tr> </tbody> </table>	Agreement status	Expiration Notice		Expiration Notice before 14/09/2017
Agreement status	Expiration Notice				
	Expiration Notice before 14/09/2017				
<p>In the "Agreement Status", Fernando can set "Send/Signed" to track the status.</p>	<p>▼ Contract Informations</p> <p>Agreement status</p>				

"Expiration Notice before" indicates the greater dates of:

Price Validity to 14/09/2017

Volume validity to 01/09/2017

Expiration Notice before 14/09/2017

"Expiration Notice" allows the user to set an automatic reminder (task) X days before the 'Expiration Notice before' value.
