

GSite Restricted page access

When there is need to provide restricted access to a particular page in GSite, please find below the steps.

Open the Giste in the browser and click on More actions -->Sharing & permissions

The screenshot shows the GSite interface for 'SBS for Aroma Performance & Silica'. The top navigation bar includes 'WELCOME', 'GBU'S WITH SBS : KEY POINTS', 'AROMA PERFORMANCE', 'SILICA', 'BRM AREA', and 'FEEDBACK JOURNÉE *COLLABORATION &'. The main content area displays 'G.Now@Aroma' and a 'CONTENTS' list. A right-side menu is open, showing options like 'Subscribe to page changes', 'Page settings', 'Print page', 'Copy page', 'Move page', 'Delete page', 'Preview page as viewer', 'Page templates', 'Site actions', and 'Sharing and Permissions' (highlighted in yellow).

Step 1: Under sharing and permission we have option to manage the page level permission, which has to be in ON state.

Click on Enable Page-Level permissions

The screenshot shows the 'Manage Site' page in the GSite interface. The 'Enable page-level permissions' button is highlighted in yellow. The page displays a 'Link to share' field, a 'Who has access' section with a list of users (Daniel Zelioli, Priscila Almeida) and their roles, and an 'Invite people' section.

Enable Page-Level Permissions

Page-level permissions allow you to control who can view or edit specific pages.

We recommend you read our [getting started guide](#) before you use page-level permissions.

The screenshot shows a dialog box with two buttons: 'Turn on Page-Level Permissions' (highlighted in yellow) and 'Cancel'.

Once the permission is turned ON we will get the below screen

Step 7: Click save. Finally, we can see the users on the specific page and the one in red is an user that doesn't have access to the page and the one in blue is user who can the page. If we want an user not to have access to the page then just click on the 'x' icon and the user will not be highlighted anymore.

To add the user, click on the drop down and select 'can view'
