

- Introduction -

The Reference Manual for Measurement has been designed to establish a benchmark of good practices harmonized throughout Syensqo.

- It contains 23 procedures, that provide the tools and describe the methodology to evaluate, compare, validate and transfer measurement methods
- The language and the statistical rules are standardized.
- The proposed methodologies are in line with international standards (ISO 9001, ISO 17025, IATF 16949, USP, UL ...)
