

I control CATS hours

Tasks to be completed when documenting an operation (from creation to publication)

1. Enter the **Title of the operation / page**

2. Add the following Labels:

- Scope of applicability: ww, country_accounting
- Country or group of countries (if applicable): belux, china, france, italy, lam, nam,uk_ie, bulgaria, dach, netherlands, iberia, poland, latvia, australia, india, japan, south_korea, thailand, singapore, new_zealand, emea_transversal, apac_transversal
- Unit and Domain according to the [List of labels to be used in the Finance Service Line space](#)
 - E.g. 1: WW Operation in Financial Accounting under domain "Central Finance Processes & Compliance":
 - Labels to be used: *ww, financial_accounting, central_fin_proc_compliance*
 - E.g. 2: France Operation in Financial Accounting:
 - Labels to be used: *country_accounting, france, financial_accounting*
(for country operations, the Domain is always country_accounting)

3. Fill in all fields as described above

4. Name the title of each section using OPD methodology naming convention - **Infinitive verb without the "to", mainly action verb...something) - "I do something..."**

5. Once the description of the operation is completed, ensure it is approved and published by launching the [GBS-Finance approval workflow](#)

Domain: Investments & Divestments

Responsibility area: Control GBS IS Projects

I create missing CATS report<< I
control CATS hours >> I post CATS
hours

1. Objective and Scope

1.1. Objective of this Operation

- Ensure that all data are consistent (no input is missing and it was posted always on an standard manner)
- Ensure that the data is reliable (the controllers can trust on the financial figures)

1.2. Scope

The scope of CATS control for GBS IS is for all legal entities in PF2.

2. Definitions

See Finance Glossary:

- CATS
- Personnel number
- Personnel area
- Sender cost center
- Activity type
- Plant

3. Tasks description

3.1. I extract the timesheet

3.1.1. In D-3, download the CATS Monthly control of the previous month

3.1.2. Open the CATS Monthly control file and go to the tab "CADO Upload File"

3.1.3. Delete all the data from the columns without formulas

3.1.4. Run "CADO" transaction in SAP PF2 System: Display Time Sheet Data.

This transaction, extracts all timesheets details completed by users and by cost centers.

- Click on "Sender parameters field"

A screenshot of the 'Display Time Sheet Data' SAP transaction screen. The screen has a menu bar with 'Program', 'Edit', 'Goto', 'System', and 'Help'. Below the menu bar is a toolbar with various icons. The main area is titled 'Display Time Sheet Data' and has three tabs: 'Receiver parameters', 'Sender parameters' (which is highlighted with a red box), and 'All parameters'. The 'Sender parameters' tab contains several input fields and radio buttons. Under the 'Person' section, there are fields for 'Personnel no.' and 'Status'. Under the 'Reporting period' section, there are radio buttons for 'Today', 'Current Week', 'Current month', 'Current Year', 'All', 'Past', and 'Other Period'. The 'Data selection period' is set to '07.04.2014' to '07.04.2014'. Under the 'Options' section, there is a 'Layout' field.

- Enter the closing month period or choose "Current Month"

3.1.5. Open the extracted file and copy the data collected to the “CADO Upload File” tab of the CATS Monthly Control.

3.1.6. Convert the networks to number format.

3.2. I extract the networks detail information

3.2.1. Run “CN46N” transaction in SAP PF2 System: Project Info System: Network Initial Screen

This transaction gives the networks parameters, including the company code associated.

- Copy the networks list extracted in CADO and upload them in CN46N

Program Edit Goto System Help

Layout CN46N COCD

- Run the transaction (Click on )
- Change the layout in order to obtain the following fields:

- Network;
- Text
- Project definition
- WBS Element
- Network type
- Plant
- Basic start date
- Basic finish date
- Duration
- Status

Network	Text	Project definition	WBS element	Network type	Plant	Basic start date	Basic finish date	Duration	Status
---------	------	--------------------	-------------	--------------	-------	------------------	-------------------	----------	--------

- Download your result into a Spreadsheet. (Evaluate ->Export-> Spreadsheet -> Save)

3.2.2. In the CATS Monthly control file and go to the tab “CN46N”.

3.2.3. Delete all the data from all the columns except Company code (this column contains formulas).

3.2.4. Open the extracted file and copy the data collected to the “CN46N” tab of the Monthly Report.

3.2.5. Refresh the file.

3.3. I extract Cost centers list, whenever needed

3.3.1. Verify in “CADO Upload File” tab if the column M “CoCd CC” contains errors.

3.3.2. If yes, Run “KS13” SAP transaction: Display Cost Centers: Initial Screen.

- Put the first date of the actual year to have valid cost center at date

 The screenshot shows the 'Display Cost Centers: Initial Screen' in SAP. The title bar at the top says 'Cost Center List' and 'Edit Goto Extras Environment System Help'. Below the title bar is a toolbar with various icons. The main area has a section titled 'Display Cost Centers: Initial Screen'. It contains several input fields: 'Cost center', 'Cost center group', 'Selection Variant', and 'All Cost Centers' (which is selected with a radio button). Below these fields is a 'Parameters' section. In the 'Parameters' section, the 'Valid From' field is highlighted with a red box and contains the date '01.01.2014'. The 'to' field contains the date '31.12.9999'.

- Run the transaction (Click on )
- Add the company code to the selection:

3.3.3. In the CATS Monthly control file and go to the tab "KS13".

3.3.4. Delete all the data from all the columns.

3.3.5. Open the extracted file and copy the data collected to the "KS13" tab of the Monthly Report.

3.3.6. Refresh the file (F9)

3.4. I verify if the user used the correct network to allocate the hours

- Compare the results in the "CADO Upload File" tab

WBS	CoCd CC	CoCd network	Ok?	REC	TEAM	Service Line
NHA.SX004.DELNA	4045	1	OK	RECURRENT	Infra - DLV NAM	IS SL INFRASTRUCTURE
NHA.SX004.DELNA	4045	1	OK	RECURRENT	Infra - DLV NAM	IS SL INFRASTRUCTURE
NHA.PX732.ISAO	1	1	OK	PROJECTS	SCMS SL - IS SC and M&S Mj	IS SUPPLY CHAIN AND M&S SERVICE LINE
NHA.PX646.ISAO	1	4045	NOK	PROJECTS	SCMS SL - IS SC and M&S Mj	IS SUPPLY CHAIN AND M&S SERVICE LINE

- The **NOK** results, which are "not allowed by the group", have to be corrected.
- The column "CoCd CC" indicates the correct company code to use. The column CoCd network, indicates the network that was used in the time allocation.
- Copy the NOK results to the tab **Corrections**.

3.5. I correct the network, if errors detected

- Analyze if there are networks created for the selected project in the correct company code consulting the WBS Elements request file for the current and previous year.
- If there is no network created for the project, inquire the controller if it is needed the creation of WBS/network or if the hours should be transferred to Recurrent Networks.
- Go to transaction CAT2 and select the Data Entry Profile SIS-PMSX - SIS time sheet for super user:

a. Enter the personnel number in scope and click in

b. Correct the network and click in the icon

to save.

- c. It will be given a message  **Your skills do not match the activity skill SBS-IT.** Do not worry, just click enter and it will save the changes performed.
- d. Repeat this step to perform all the necessary corrections employee by employee.

3.6. I repeat the extractions of the timesheet and the network details until no more action to execute

If the results in the "CADO Upload File" tab are all green "OK", proceed to the next step. If not, perform the necessary corrections until all data is "OK".

WBS	CoCd CC	CoCd network	Ok?	REC	TEAM	Service Line
NHA.SX004.DELNA	4045	1	OK	RECURRENT	Infra - DLV NAM	IS SL INFRASTRUCTURE
NHA.SX004.DELNA	4045	1	OK	RECURRENT	Infra - DLV NAM	IS SL INFRASTRUCTURE
NHA.PX732.ISAO	1	1	OK	PROJECTS	SCMS SL - IS SC and M&S Mj IS SUPPLY CHAIN AND M&S SERVICE LINE	

3.7. I confirm that the settlement key control of the network is related to Projects

Run "CN47N" transaction in SAP PF2 System: Overview: Activities/Elements. This transaction extracts networks parameters to control that the projects networks are correctly settled. To differentiate a structural network of the ones generating allocation, the settlement control key of the network must be "PD01" and not "ZS01".

- "PD01" Settlement control key should be used for all projects in order to generate costs.
- "ZS01" is used for recurrent allocations.
