

Google Site:GA Tracking

If there is a request to create a Google Analytics tracking ID for any Google Site, we need to check if there is any existing GA ID been created for the Site.

For example

<https://sites.google.com/a/solvay.com/fnps/overview>

Basically, there is a configuration on GSite to enable Google Analytics tracking. This tracking option is a must for GSite creator, who is also owner, to select when GSite is created. (Using GSite Creation Wizard)

After that, GSite Owner can use Solvay Directory to view the statistic.

To check the GA tracking ID
