# 1. Objective and Scope

## 1.1. Objective of this Operation

The purpose of this document is to describe the way to calculate the percentage of imported raw materials in the production of each product.

The monthly calculation is performed to have the percentage of the raw material imported for each product. These data must be updated until the last day of current month in FCI (Ficha de Conteúdo da Importação) for each material inside the "Secretaria da Fazenda" website and also in the material master data in SAP.

The information to be retrieved from the system should be always from the last two months, for example, the process is being executed on July, considering that the data from SAP must be extracted for June and will be updated in each material master date in August.

## 1.2. Scope

This procedure applies to company :

- **7523** Rhodia Poliamida

Plants: 7525, 7515, 8227, 8287

# 2. Definitions

# 3. Tasks description

**Reminder:** log in SAP in Portuguese

## 3.1. *I run SAP Transaction ZWPP\_MCKOST*

Go to transaction ZWPP\_MCKOST .

Use the variant RES 13 NEW and run for all plants, the report is done by company.

**Obs.:** Plants can be added or excluded of the scope according to Solvay's business dynamics.

Paste in file "Vendas" in the Computer Network after the last line with values. This file should be cumulative of the year.

The columns V to AC in gray will be filled automatically, check if are pulling formula.

Verify if there is difference in column AB "(Total Item NF-IPi-ICMS) - (Liquid + pis + cofins)" can not have values different from zero.

If there are differences it should be analyzed line by line and correct the calculation basis. In some cases the report considers tax values that are exempt, so the value should be disregarded.

Common errors that generate difference in column AB of the taxes which are exempt:

CFOP 5917/6917 has no PIS / COFINS.

CFOP 6109 has no ICMS / PIS / COFINS.

CFOP 5111/6111 has no ICMS / IPI.

CFOP 5112/6112 has no ICMS / IPI.

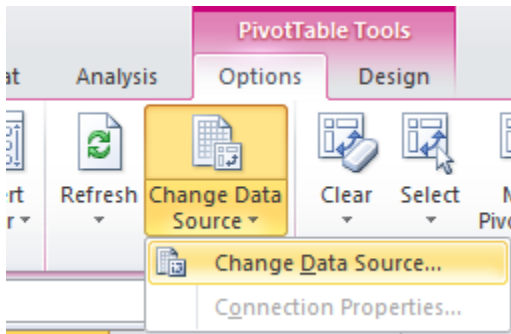

CFOP 1918 has no IPI.

### 3.5. I analyse the data

After all data are in file XXXX Res13 - 1ª Parte, order the column D, as picture.

Tab ZWPB40A

1) Check the column K has #N/A.

Then you should copy the codes of components that are in column F and follow again the process above in point 3.2., but use the variant *RES13COMP XXXX*.

Go back, and check if the column K is with values.

Remove the filter.

2) Go to the column T and filter the items:

- o 2 Foreign - acquired nationally.

At this moment you should analyze the K column, if any line has information # N / A, you should change there, leaving equal to column J; this mode correcting errors.

Remove the filter.

3) Filter the column I only the unit of measure LB and the column L only with V.

In cases where the cost is Variable (V) have to multiply column K by 0,45359.

SUM :  $=IF(M2266="E"; IF(E2266=1; 0; H2266 * VLOOKUP(C2266 & F2266; 'Histórico import'!A:I; 9; FALSE)); IF(E2266=1; 0; J2266 * I)) * 0,45359$

5) Filter on column P only for percentages higher than 70%.

Once the filter is done, analyze column W and check if there is any amount higher than 1.

If there is, take the component number on column E and go to **Historic Import** tab and search for the component on column D. On column I, divide the number by 1.000 in case the Unidade de Medida is on TON .

3.6. I include Tolling material data

## 3.6 I include Tolling material data

Specific for the company code 7523.

When you don't have errors in the tab ZWPP40A, you must include the materials that are Tolling.
