

# Section Access in QlikSense

For some of the dashboards available in QlikSense, we need to follow two procedures

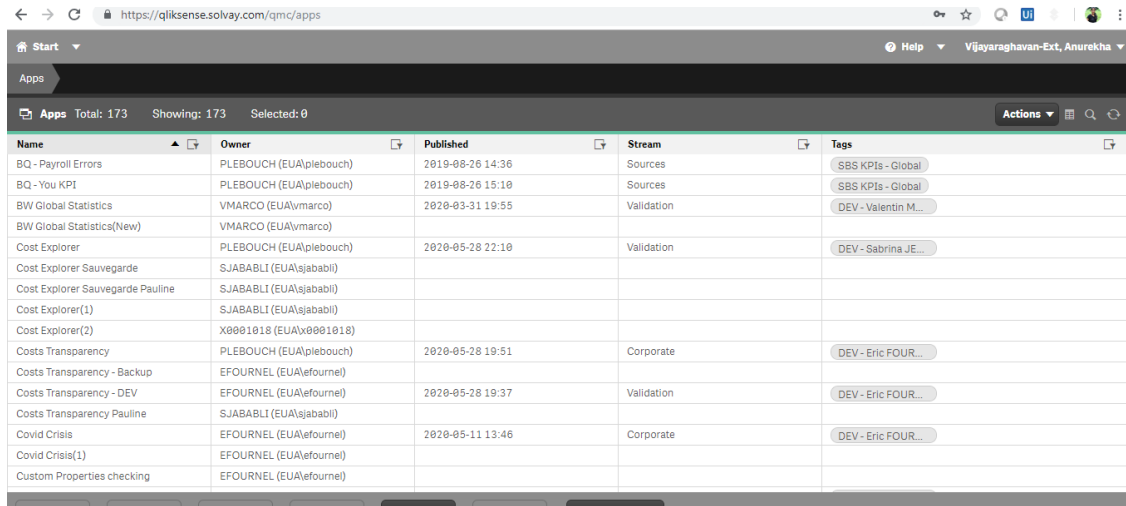

- Normal access management procedure
- Section access

Steps to find if a dashboard requires section access to be provided.

Step 1: Go to QlikSense QMC link

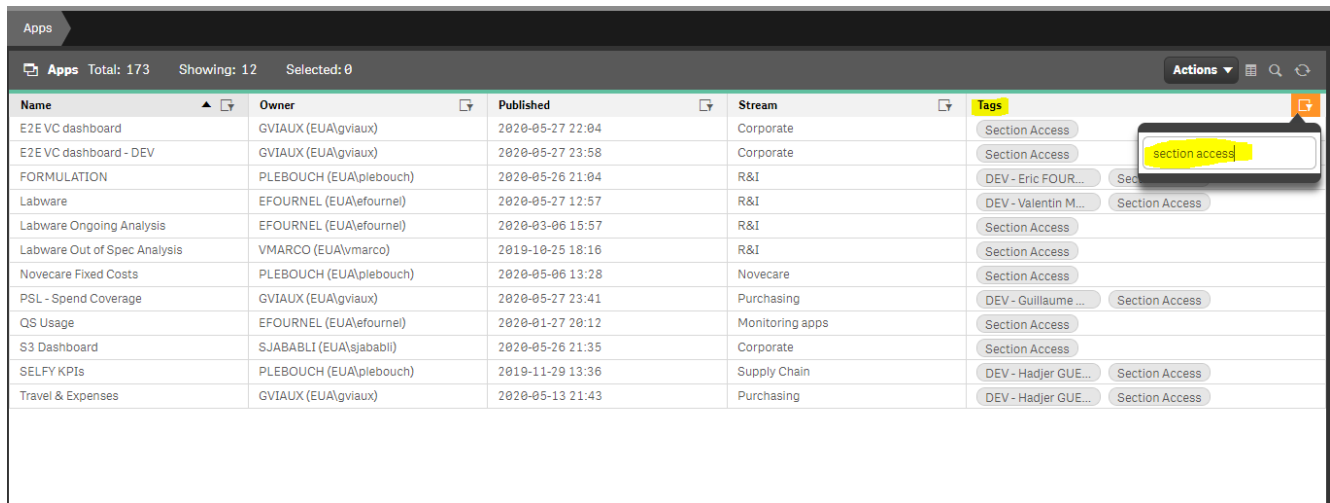

<https://qliksense.solvay.com/qmc/>

Step 2: Navigate to Apps tab

Here we can see the list of dashboards available

Step 3: Under the tags, filter with "Section Access", where in it will display only the dashboards for which section access need to be provided.

## SECTION ACCESS PROCEDURE

Step 1: Go to the security file: [SECURITY - PROD](#)

In the APP column, search the name of the application.

Sometimes, the app(Dashboard name)will not be the exact name of the application as it may be too long.

To make sure, we can go to the APP tab that contains the correspondence between the names used in this file and the name used in Qlik Sense.

	A	B	C
1	<b>APP</b>	<b>QS Usage - Application Name</b>	<b>Only apps with Section Access</b>
2	ALL		<b>ALL is only for IT team</b>
3	CS_FIXED_COSTS	Novocare Fixed Costs	<b>Put the real name of the app published in the stream</b>
4	COSTS_TRANSPARENCY	Costs Transparency	
5	CUSTOMER	Customer Dashboard	
6	E2E	Mockup E2E Value	
7	LABWARE	Labware	
8	LABWARE_TV		
9	PSL_SPEND	PSL - Spend Coverage	
10	QS_USAGE	QS Usage	
11	S3	S3 Dashboard	
12	SELFY	SELFY KPIs	
13	SG&A	SG&A	
14	T&E	Travel & Expenses	
15			
16			

For example Selfy KPIs is the name of the app in QlikSense, but in the access sheet, App will be referred to Selfy

Step 2: Add the user in the Security Prod G Sheet.

Before adding, check if the user is available already for the requested application.

If not add them **based on the sorting with respect to Solvay NT User ID**

All the mandatory columns are: ACCESS, USERID, EMAIL, APP, CREATION\_DATE, RESTRICTION and the security dimension(s) specific to the application.

Step 3: Provide access in QlikSense QMC(Normal procedure we follow)

Refer Step 3 procedure in the below wiki guide

<https://wiki.solvay.com/display/SP/QlikSense+Access+management>

NOTE: All the access provided via section access will not be available immediately.

The user can now see the application in the Supply Chain stream but they can't read it because the task for the Security has not turned.

**The task starts every day at 2 AM CET. Then, the user would be able to read the app the next day.**
