Site vs Site PUR

The site represents the physical location where one or several business activities take place.

Site

In this dimension, the site determination is based on financial data: the Responsible Cost Center determines a Profit Center, which determines a Plant, which can be mapped to a site. More details [here](#).

You can have different plants under the same site

Site PUR

In this dimension, the site determination is based on the plant used in a purchasing document item, which is mapped to a site.
