

How to create Dynamic Segmentation list using Cadre

We will receive a scenario to create a Dynamic list(Segmentation) with the Filter Properties "CADRE"

Choose the Filtering condition as Cadre from the Drop down list.

And choose the value as 'C'

Brazil Cadres

[Edit name](#)

Filtering conditions

countrycode

Is

BR

+

Add a new "or" condition

And

cadre

Is

C

In the above example, we have selected Cadre for Belgium, so the country code is selected as 'BR'

And Cadre is also selected.
