

# Decommissioning of PPE in Business Object on July 27th

## Decommissioning of Premier Pilotage Economique in Business Object

Dear colleague,

In order to simplify our system landscape and provide better support to our users, we are preparing the decommissioning of the application Premier Pilotage Economique (PPE) in Business Object (BI4).

### As a user of the BI4 PPE application, what will it change for you?

From now on, all reports that were running in BI4 should be replaced by similar reports using the application Profit & Loss (P&L) in BW.

Support teams are here to help you get onboard on BW general use or specific reports.

If you do not have any access to it, [please fill-in this form](#) and select the application "PL - Profit & Loss".

- You can find some useful information on the application P&L [in this documentation](#). Note that a specific [page](#) was created to give the definition of all characteristics available in the application P&L in BW and the corresponding object in BI4 when it exists.
- If you need another type of support, please fill out [this form](#) to let us know how we can help you in your transition to the new Profit & Loss reports in BW Analysis.

For any issue, please submit your request through [SolvIA](#) by specifying BW P&L.

Best regards,

Charlotte Rollier

*\*For PAX users, the application will remain available until the end of the TSA.*
