

# Working with Hierarchies

- Break Hierarchies
- Filter Data via Hierarchies
- Using the Compact Hierarchical Display

## Break Hierarchies

If the report uses a hierarchy, you can "Break" it to basically remove it. This via the "More Sort Options" in the Sort Menu.

## Filter Data via Hierarchies

1. Select the Hierarchy to filter
2. On the filter button, choose the « Filter By Member »
3. Select then press OK.

# Using the Compact Hierarchical Display

The option Compact Display allow to generate a hierarchical view of the dimensions of an axis (row & column)

- The purpose is to give an easier way to read crosstab in case of multiple dimensions
- This allow to navigate to the detail
