 - vii. Check of **AFAB**
 - viii. Check of **Z1AANNUL**

1 - Objective and Scope

Objective of these operations

The purpose of these tasks is to ensure that all necessary checks are performed in order to guarantee the monthly IFRS 16 closure process.

Please be aware that these checks should be performed between D-5 and D-2.

Scope

This procedure is applied to all WW companies under IFRS 16.

2 - Task description

Pre-closure activities

- i. Check of Suspense Account (SAP transaction code **FBL3N** - PF2: 5112100020 | WP2: 56030110)

The Suspense Account must always be balanced (the only exception when it's acceptable to not be balanced it is when a contract has a "payment in advance" rent posted).

This check should be performed along the month and in case it's not balanced it will need to be corrected until D-3.

Go to transaction **FBL3N** and insert the account and the company code, then select "Open items" at the last day of the month for which you are performing the check.

* 0005	0,00	0,00	EUR		0000000400011

In this situation as you can see contracts 0005/200000 and 0005/200002 have issues.

For contract 0005/200000 the amount is only in the column "Amount in local currency". This means that Suspense Account for this contract is actually balanced (the column "Amount in document currency" is 0,00), but the currency of this specific contract (GBP) differs from the currency of the company (EUR) and in this situation the error is due to different exchange rates in the system.

For contract 0005/200002 the difference is due to the presence of a "probable end date" in the valuation parameters of the contract, which is limiting the calculation of the valuation part of the contract.

Memo

To solve this situation you need to confirm if the contract in fact will be extended, and then create a new time slot in the valuation which will consider the term extension with the correct interest rate.

After the contract is updated you should post the contract and refresh **FBL3N** to see if it's balanced and the issue is solved.

* 0005	0,00	0,00	EUR		0000000400004

This is the most frequent reason why the suspense account might not be balanced.

This always happens with "open-end" contracts, as it is necessary to insert a "probable end date" during the contract creation.

NOTE: If you find any other type of issue that's unbalancing the account please analyze and solve and update this documentation if necessary.

ii. Check of Retirement Flow (SAP transaction code **FBL3N** - PF2: 7560020000 & 6560020000 | WP2: 89854631 & 89854630)

The Retirement Flow Accounts must always be balanced.

This check should be performed along the month and in case it's not balanced it will need to be corrected until D-3.

Go to transaction **FBL3N** and insert the accounts and then select "All items" from the first day of the year until the last day of the month for which you are performing the check.

G/L Account *
Company Code *

CoCd	Account	BusA	St	Stat	DocumentNo	Clrng doc.	Type	Doc..Date	FK	Amount in doc. curr.	Amount in local cur.	LCurr
**	0001									0,00	0,00	EUR
**	0005									0,00	0,00	EUR
**	0237									0,00	0,00	EUR
**	0276									0,00	0,00	EUR
**	3471									0,00	0,00	EUR
**	5835									0,00	0,00	EUR
**	5960									0,00	0,00	EUR
***										0,00	0,00	EUR

Retirement Flow accounts might not be balanced if a RE-FX contract presents a Special Flow in the valuation of the contract.

In that case it is necessary to analyze and correct the contract.

NOTE: If you find any issue that's not recurrent and unbalancing the account please analyze and solve and update this documentation if necessary.

iii. Check of Postings Without CO Object (SAP code transaction **FBL3N** - PF2: 6100000001 | WP2: 98300160)

The RENTING-MOVABLE ASSETS account must always be balanced.

This check should be performed along the month and in case it's not balanced it will need to be corrected until D-3.

Go to transaction **FBL3N** and select the variant "IFRS16 CO OBJ", then select "All items" from the first day of the year until the last day of the month for which you are performing the check.

**	5782			0,00	USD
**	5835			0,00	EUR
***				0,00	EUR
				0,00	USD

There shouldn't exist postings without CO object so these accounts with the selections of these should be balanced.

If it's not balanced it's necessary to analyze and correct the postings.

NOTE: If you find any issue or error that is allowing postings without CO object, you should report to CO and ID process experts in order to check this situation with IS.

iv. Check of OI table (SAP code transaction **SE16** - PF2: Table name = *Z1F_CAPEX_OI* | WP2: Table name = *ZWFAT58001*)

This table is used for vendor OI reclassification. Source : data from WBP

Go to transaction **SE16** and select the table according to the system you are in.

Data Browser: Initial Screen

Table Name

Z1F_CAPEX_OI

Click enter and insert as Key date the last day of the month of closure and "Execute".

In order to clear the open items, detect the RE-FX contracts with payment in advance. Normally a contract, in F-03, should only have 2 lines posted (one with document type S4 and other with document type S5), so if we have 3 lines for a contract this is a contract with payment in advance (two lines with document type S4 and another line with document type S5).

Clear G/L Account Process open items

2. Clearing of Lease Liability (ST) Lease reclassifications Account (PF2: 5112100070 | WP2: 56030160)

Before you perform the clearing please check the balance of this G/L account in **FBL3N** (open items last day of the current month).

G/L Account 5112100070 LEASE LIABILITY (ST) LEASE RECLASSIFICATION
Company Code *

CoCd	Account	BusA	St	Stat	DocumentNo	Clrng doc.	Type	Doc..Date	PK	Amount in doc. curr.	Amount in local cur.	LCurr	Text	Assignment	T
** 0245										0,00	0,00	EUR			
** 5835										0,00	0,00	EUR			
** 5957										6.021.272-	6.021.272-	KRW			

In order to proceed with the clearing the balance has to be zero.

If the balance is not zero, this means that when the transaction was performed in a previous closure one of two postings wasn't performed due to accounts in OB52 being closed.

In order to correct this situation we need to manually reverse, through **FB03**, the document that was posted, since the balance for this account should also be zero.

After all necessary corrections were done and G/L account is balanced (=0) in **FBL3N** you can proceed with the account clearing.

In transaction **F-03** for the account selection¹ insert the correspondent G/L account and the fill in the other fields (Company Code, Clearing Date, Period and Currency) accordingly to the data.

to

to

Run in "Test Run" one company at a time, inserting the current fiscal year and the current month.

Always run **AFAB** in "Repeat" mode.

If there is nothing to post the following message will appear:

Depreciation Posting Run for company code 0001

TESTRUN

Posting date : 31.05.2020 Date created: 29.05.2020 Period: 2020/005/02

Reference do...	Planned Amount	Amount Posted	Amount to be posted	Cumul.Posted Amt

■ **TESTRUN completed successfully**
▲ **No documents were created in this run**

If there are documents that need to be posted, please follow the same steps of **ASKB**.

Go back to **AFAB** main page, remove the tick from "Test Run" and click on "Program" to "Execute in background" (or press F9).

Chose as "Output Device" LP01.

Then, run "Immediate", check and save.

To check the status of **AFAB** postings, go to transaction **SM37** and "Execute" (or press F8) the transaction.

Going back to **AFAB**, check again on test run if the same company has nothing else to post.

viii. Check of Z1AANNUL

This transaction needs to be run twice a month, during pre-closure and closure periods.

During pre-closure, run **Z1AANNUL** only in test mode, to verify if the different accounts are balanced.

Fill **Z1AANNUL** with the required information – templates with pre-filled information can be found in the "Variant Directory of Program Z1AANNUL".

Use as charts of account COCA for PF2 and Z001 for WP2.

Run one company at the time, remembering to change the Country Key, based on the country identity of the company code (e.g.: company 0001 Belgium – country key BE; company 5835 Italy - country key IT, etc..).

To run **Z1AANNUL** during pre-closure in test run, remove the ticks on "CREATE BATCH-INPUT" and "SCMA".
