

5.0 Miscellaneous Processes

5.1. Neptune - Mobile Application for Plant Maintenance

Neptune is a mobile application, available on various Android devices (tablets, smartphones...) that connects to the SAP systems of Solvay (PF1 and WP1).

In Plant Maintenance, this application allows to create and process Notifications & Work Orders onsite in the production shopfloors or any other area.

It provides a convenient, simple and efficient user interface for all users of the application.

Click on this [link](#) to read them in details.

5.2. Budgeting (PF1 - Project System)

This section is relevant for Solvay PF1 system only

A short description of this application & function.
