Objective and Scope

Objective of this Procedure

This document describes the following processes:

- Handling Mass Modification of Vendor Master Data in SAP environments using XK99 transaction and describes the roles and responsibilities of each actor in this process.
- Adding Clerk's internet information to CICC (PI1_020) for new vendors.
- Process for employee bank detail updates, based on HtR reports.
- Steps for changing vendor workflow receiver.
- Finalization of vendor inactivation in PE1_300 and Baan environments.
- Steps for creating reports using SE16 and SE16n transactions

Scope

Data Operations Team based in Riga is responsible to handle all Vendor Master Data from NAM, LAM, APAC and EMEA regions for Technology Solutions (except for Intercompany and Commission Agent vendor records) and Composite Material businesses.

For Technology Solutions exceptions:

- Requests for Intercompany creation/name, address and bank detail change and Commission Agent vendor records creation/modification should be forwarded to Lisbon SBS team using Fresh Desk ticketing system.
- Intercompany records company code and purchasing organization data can be done by Riga Data Operations.

Definitions

Abbreviation	Description
PRS	Permanent Reference System (PF1_50)
RCS	Rhodia Core system (WP1_400)
SBS	Solvay Business Services
PO	Purchase Order
OA	"Ordering Address" partner role
VN	"Vendor" partner role
PI	"Invoice Presented By" partner role
GS	"Good Supplier" partner role

1 Mass Modifications

System: SAP

Mass modification – changing information for several vendor records simultaneously. This can be applied in cases when update is required for more than 20 records.

Data Operations Riga team can perform mass modifications using XK99 transaction for following tables:

- LFA1 - Vendor Master (General Section)

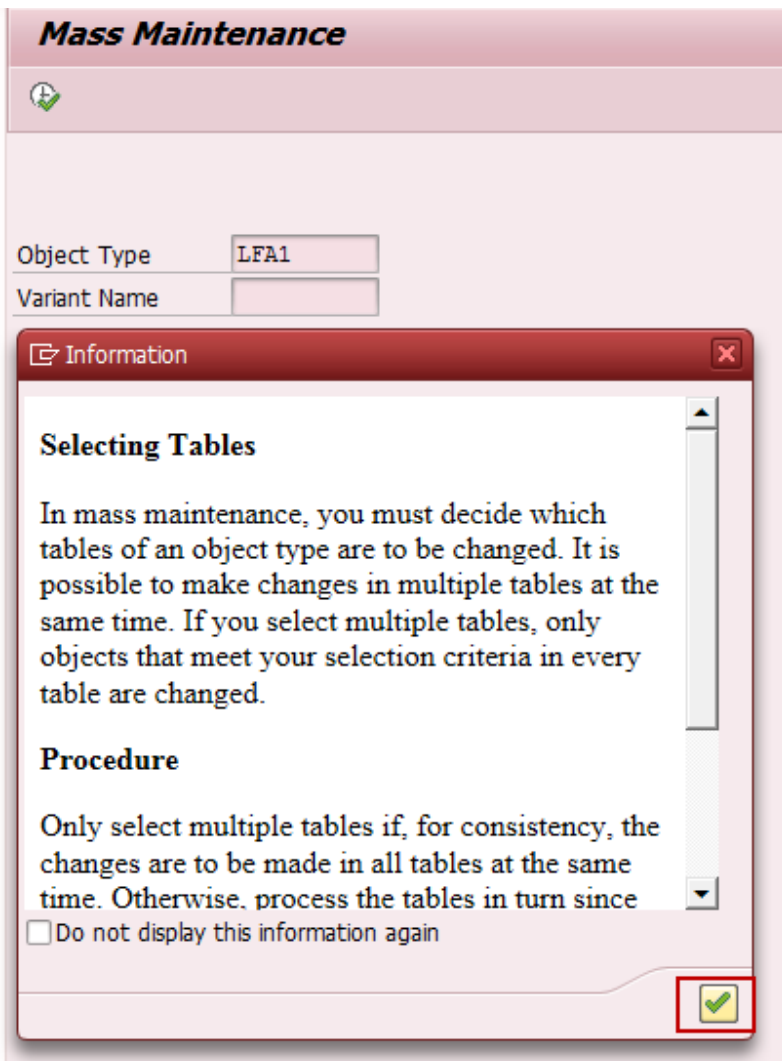

- LFB1 - Vendor Master (Company Code)
- LFAS - Vendor master (VAT registration numbers general section)
- LFBS - Vendor master (dunning data)
- LFBK - Vendor Master (Bank Details)
- LFBW - Vendor master record (withholding tax types) X
- LFM1 - Vendor master record purchasing organization data
- LFM2 - Vendor Master Record: Purchasing Data
- WYT1 - Vendor Subrange
- WYT2 - Vendor Sub-Range Description
- WYT3 - Partner Functions

In case required field/table is not available:

- For Technology Solutions FD ticket with load files should be submitted to FD D&A EMEA team.
- For Composite Materials SDE ticket with load files should be submitted to COE_SD group.

Performing changes using XK99

1. Go to transaction XK99.
2. Upon opening the new screen you will receive informational message about choosing tables correctly. Please find full message text below. Press the green checkmark to proceed to the next screen.

"Selecting Tables"

In mass maintenance, you must decide which tables of an object type are to be changed. It is possible to make changes in multiple tables at the same time. If you select multiple tables, only objects that meet your selection criteria in every table are changed.

Procedure

Only select multiple tables if, for consistency, the changes are to be made in all tables at the same time. Otherwise, process the tables in turn since selecting multiple tables can slow down the system considerably.

If you import data from files or the clipboard, you can change only one table or the fields from one table."

1. Choose the table/field to be updated. Note, that you will be able to add fields later on as well, but it should be done at this stage, if you want to import data from file or clipboard.

Mass Maintenance: Vendors

 Import Data from File
  Import Data from Clipboard

Object Type LFA1 Vendors

Variant Name

Tables Fields

Short Description	Table Name
Vendor Master (General Section)	LFA1
Vendor Master (Company Code)	LFB1
Vendor master (VAT registration numbers general section)	LFA5
Vendor master (dunning data)	LFB5
Vendor Master (Bank Details)	LFBK
Vendor master record (withholding tax types) X	LFBW
Vendor master record purchasing organization data	LFM1
Vendor Master Record: Purchasing Data	LFM2
Vendor Subrange	WYT1
Vendor Sub-Range Description	WYT1T
Partner Functions	WYT3

1. Choose the data to be changed. You have four available options (you'll find more detailed description down below):

- a.  - Execute
- b.  Import Data from File
- c.  Import Data from Clipboard

Before moving to the next screen you will receive the following warning message:

Warning

Please note that many objects can be changed simultaneously in mass maintenance. When you save your changes, the system checks them for consistency. They then take immediate effect for all objects chosen.

For this reason, please proceed carefully.

1. Execute – choose vendor records to be changed
 - o To choose several vendor records press "Multiple Selection button"
 - o To add additional search criteria press "Choose selection fields" at the bottom of the screen.

Mass Maintenance: Vendors

2 Clerk's internet addition to PI1

System – SAP (WP1_400, PI1_020)

Clerk's Internet - e-mail address stored in WP1 company code data. This e-mail is used to send remittance advices to the supplier. Due to system restrictions this information is not being transferred from WP1 to PI1 automatically.

Remit-to e-mail cannot be added to PI1 upon vendor creation, as the supplier record will be open for company code only after first invoice posting will be made in WP1.

Following chapters will outline daily activities done for populating this data in PI1 based on additions made on previous day.

Scope of the review:

- **NAM**
 - 7008 – Cytec Industries Inc
 - 7752 – Cytec Canada Inc
 - 7723 – Cytec de Mexico SA de CV
 - 7427 – Cytec Technology Corp
 - 7030 – Piney River Recovery Corp
- **EMEA**
 - 7794 – Cytec Industries BV
 - 7764 – Solvay Business Services Latvia Sia
 - 7726 – Cytec Belgium Bvba
 - 7210 – Umeco Ltd
 - 7714 – Cytec UK Holdings Ltd
- **APAC**
 - 7786 – Cytec Australia Holdings Pty Ltd

Obtaining report with e-mails to be added

Daily report should be run to collect information about company codes created in the previous day. Results containing e-mail addresses must be added to the list here.

1. Go to WP1 transaction SQ00:
 - a. User Group: NOVECARE_EDA
 - b. Query: VENDRS_CO_DATA

Query from User Group NOVECARE_EDA: Initial Screen

Query area: Standard Area (Client-specific)

Query: **VENDRS_CO_DATA**

Buttons: Quick Viewer, Display, Description

Queries of user group **NOVECARE_EDA: US Master Data Queries**

Name	Title	InfoSet	Logical Database	Tabl
SHELF_LIFE_JC	Material Views - Purch,MRP,Act,Storage	MAT_PLNT_VIEW1		MAR
SPC_PROC_KEY	Material Views - Purch,MRP,Act,Storage	MAT_PLNT_VIEW1		MAR
VENDRS_CO_DATA	Vendors with Company View Details	LFA1-LFB1_BANK_DET		LFA1

Adding Clrk's Internet to PI1

Vendors in PI1 for company code are opened automatically upon first invoice posting in WP1. Daily report must be run to check, if any vendors from the list mentioned in the previous chapter are open in PI1.

1. Go to PI1 transaction S_ALR_87012086.
2. In "Dynamic Selections" set company code creation date to the previous day. In order to enable "Created On" field, find and double click on the "Created on" under the "Company code folder".

1. Remove rows containing information for these vendors from the [GDrive file](#).

3 Employee bank detail update

System – SAP, BAAN

Cytec Legacy employee reimbursements are processed via WP1_400, PE1_300 and Baan instead of PP2. In order to ensure, that employee data is updated in a timely manner, daily reports are sent to Data Operations by HtR team, to inform us of any changes in bank account used for US employee reimbursements. This solution will be in place until Composite Materials migrates to Solvay ERP and T&E program. Please see an example of HtR (sbs.htsupport@solvaysbs.freshdesk.com) e-mail below.

US_T&E bank changes on 15.05.2018

SBS.HtRSupport May 16 (5 days ago) ★

to viktorija.kalu., Kathleen.robbi., me

Dear All,

Please find attached the T&E Bank changes introduced in the system yesterday, May 15th.

We remain at your disposal for any question you may have.

If you would like to be contacted, please reply to this e-mail or contact us through the phone number available [here](#).

Thank you and best regards,
 Claudia
 Global Contact Center

How would you describe our services? Your [Feedback](#) is important to us.
 Please do not change the subject of this e-mail, it will help us follow up your request in a better way.

**2 Attachments**

1. Save the file - the attached excel file (if any) must be saved in a designated [GDrive folder](#), in a subfolder dedicated for the running month.

Name ↑	Owner
 2018.01	me
 2018.02	me
 2018.03	me
 2018.04	me
 2018.05	me
 2018.06	me
 [UPDATE FINAL] mm.yyyy 	me

1. Check whether any of the entries in the excel file contain details for Cytec legacy employees.

EE	First Name	Last Name	Company Co	Company Co	Bank Key Ne	Bank Account New	Bank Key Old	Bank Account	Start Date
63029030	Franklyn	Ballentine	7008	CYTEC-US/ST	21101108	1247613324	No previous	No previous	01.06.2018

1.

All records relating to Cytec legacy employees should be copied in the **[UPDATE FINAL] mm.yyyy** file for the corresponding month. Template of the file can be found [here](#) and it should be copied to the folder of the corresponding month.

First Name	Last Name	Company Code	Company Code	Bank Key New	Bank Account New	Bank Key Old	Bank Account	Start Date	Vendor code	Comments	Responsible	Tckt
James	Mccallum	7008	CYTEC INDUST	122100024	263152131	No previous T&E account	No previous T&E	01.04.2018	926354		Everita	
Matthew	Soderstrom	7008	CYTEC INDUST	122105744	6755377668	No previous T&E account	No previous T&E	01.04.2018	926445		Everita	
James	Lee	7008	CYTEC INDUST	211178200	2439119	No previous T&E account	No previous T&E	01.04.2018	926320		Everita	
Blake	Acton	7008	CYTEC INDUST	125200057	5912669057	No previous T&E account	No previous T&E	01.04.2018	No vendor		N/A	
Erik	Hancock	7008	CYTEC INDUST	323274270	3355210	No previous T&E account	No previous T&E	01.04.2018	No vendor		N/A	

1. At the first date of the next month divide the entries between team members and share the file with them asking to update bank details. Corresponding ticket numbers should be noted in the file upon completion.

"I kindly ask you to update the employee bank details in SAP and Baan based on the attached file of T&E bank changes in HtR system?"

- Please create one ticket for the change.
- Do not forget to attach bank validations (Routing number mostly).
- Add the corresponding ticket number to the attached file.

I would really appreciate if this could be done till middle of the day. "

Note! Excel tends to exclude "0" from beginning of the routing numbers. If routing number provided is 8 instead of 9 digits, please try validating by adding "0" at the beginning.

4 VWF receiver change

System – SAP (PF1_050)

Following approach is to be used for:

- purchasing approver change in spot cases (i.e. approver is on vacation without a substitute or approver has left the company and the approver matrix is not yet updated);
- releasing VWF from approver inbox after it has been approved (to fix system glitch);
- releasing VWF for colleagues inbox in spot cases.

Please follow the steps below in order to change the approver.

1. Enter the VWF using transaction **Z1S_VWF_REQUEST**

SBS Data - Management of Vendor Requests

Description

Could you please either approve or return or reject following request within [http://solia.solvay.com/ij/portal/Services/uwl ?](http://solia.solvay.com/ij/portal/Services/uwl?)

If you want to return or reject the request, do not forget to justify it.

5 Finalize Composite Material vendor inactivation

System – Baan/Maximo/SAP (PE1)

As often vendors cannot be inactivated straight away due to open activity monthly checks should be done to finalize the inactivation of such vendors once open items have been cleared.

On the first work day of the month records pending inactivation must be reviewed for open activity as per Work Instructions. Please see below criteria for vendors pending inactivation:

- Baan:
 - Active vendor account;
 - "DO NOT USE" at the end of the name
- Maximo:
 - Active vendor account
 - "DO NOT USE" at the beginning of the name
- SAP (PE1):
 - Active vendor account
 - Purchasing block applied (list of exceptions can be found [here](#))

AND/OR

- Deletion flag for specific company code with no posting block applied.

List of the vendors to be inactivated should be saved in [this folder](#) with the following file name:

YYYY-MM -inactivation review.

Vendor accounts inactivated must be registered in the FD ticketing system and noted in the [log file](#).

6 SE16 and SE16n reporting

Transactions described in this chapter can be used to extract data from SAP environments either for reporting or analysis purposes.

SE16 is available in PE1_300, PF1_050, PF1_020 and WP1_400.

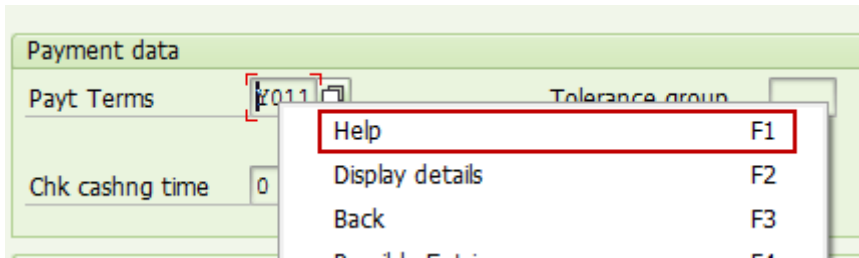

SE16n is available in PE1_300, PF1_050, PF1_020.

SE16 and SE16n will provide the same data, but the interfaces are different. It does not really matter, which transaction is used for creating the report.

Locating the table name

All data in SAP is stored in different tables. To see in which table a field is located:

1. Go into any vendor account.
2. Left click the field, you wish to extract.
3. Choose Help (F1)

1. On the top of the pop-up screen choose button for "Technical Information" 
2. In the following pop-up screen you will find the "Table Name" in "Field Data" section.

Note! In case the "Table Category" is anything else but "Transparent table", you will not be able to use the Table Name in SE16 transaction. Check for the table name in the table below or use Google search including field name and following key words "SAP", "Table".

Technical Information

Screen Data

Program Name: SAPMF02K
Screen Number: 0215

GUI Data

Program Name: SAPMF02K
Status: 215A

Field Data

Table Name: LFB1
Table Category: Transparent table
Field Name: ZTERM
Data Element: DZTERM

Field Description for Batch Input

Screen Field: LFB1-ZTERM

Below are listed some tables you might need related to vendor, customer, material or maintenance.

Table	Description
LFA1	Vendor general data
LFB1	Vendor company code data
LFM1	Vendor purchasing org data
LFBK	Vendor bank account details
WYT3	Vendor partner function data
ADRC	Vendor/Customer address data including Search term 2 (address number can be found in LFA1/KNA1)
ADR6	Vendor/Customer general e-mail (address number can be found in LFA1/KNA1)
Z1S_VWF_APPROVER	VWF approver matrix
T001W	Plant data (view vendor and customer account linked to plant)
KNA1	Customer general data
KNB1	Customer company code data
KNVV	Customer sales area data
KNVP	Customer partner function data

KNVK	Customer master contact partner
EKPA	Vendor PO partners
TFACD	Vendor Factory calendar
EINA	PIR General Data
EINE	PIR Purchasing Organization Data
EKKO	Contract - Purchasing Document Header
EKPO	Contract - Purchasing Document Item data
MARA	General Material Data
MARC	Plant Data for Material data
T001W	Plants/Branches data
CDHDR	Change document header data
CDPOS	Change document items data
ZMM_VND_MASTER_DATA	Allows to extract Vendor Master Data information from General Data, Purch. View and Company Code View in a single report

Creating report in SE16

User specific settings

To make report easier to use it is advisable to adjust some user parameters. Usually it is enough to do it only once, as system will remember your choices for the future.

User specific settings can be accessed in the initial screen. Go to **Settings/User Parameters...** or press **F6**.

- **Width of Output List** – determines how many characters will be shown in a report line. It is advised to set this to the maximum number – **1023 char**.
- **Display type** - determines the display of the final report (ALV Grid Display is recommended):
 - **ALV Grid Display**
 - **ALV List**
 - **SE16 Standard List**
- **Keyword** – determines display of the field names in the selection screen
 - **Field Name** – technical name of the field
 - **Field Label** – regular vendor name

The screenshot shows the 'User-Specific Settings' dialog box. The 'Output List' section is highlighted with a red box, showing 'Width of Output List' set to 1023 and 'Maximum Number of Hits' set to 500. Below this, the 'Display type' section is also highlighted, with 'ALV List' selected. The 'Keyword' section is highlighted with a red box, showing 'Field Label' selected. The 'Format' section is visible at the bottom, with 'Respect Conversion Exit' unchecked.

Initial screen

Go to the transaction **SE16**. In the **Initial screen** insert the name of the table you wish to extract and press "**Enter**".

Data Browser: Initial Screen

Table Name

Selection Screen

In **Selection Screen** you can set different search criteria.

Populate fields to narrow down search criteria or indicate specific records you wish to view. For example, in the screenshot below, we are running a report with all US suppliers whose name starts with "A".

Data Browser: Table LFA1: Selection Screen

 Number of Entries

Vendor	<input type="text"/>	to	<input type="text"/>	
Country	<input type="text" value="US"/>	to	<input type="text"/>	
Name	<input type="text" value="A*"/>	to	<input type="text"/>	
Deletion flag	<input type="text"/>	to	<input type="text"/>	
Posting Block	<input type="text"/>	to	<input type="text"/>	
Purch. block	<input type="text"/>	to	<input type="text"/>	
Width of Output List	<input type="text" value="1023"/>			
Maximum No. of Hits	<input type="text"/>			

You can change the fields visible in **Settings/Fields for selection**. In this list you can find and choose all fields available in the table. Please note that you can choose only up to 40 records for selection.

Select Fields for Selection

Field Name	Field Label
Selected table fields for the selection.

Tricks and tips

Below you will find some tips for selection:

- Use **Multiple selection**  to set several criteria for single field:

- a. Define selection options for the specific value.

For example, to exclude empty fields leave this field blank and set this value to "Not equal to":

- a. Add several records based on the regular search function.

For example, you can search and add all vendors with "BASF" in their name.

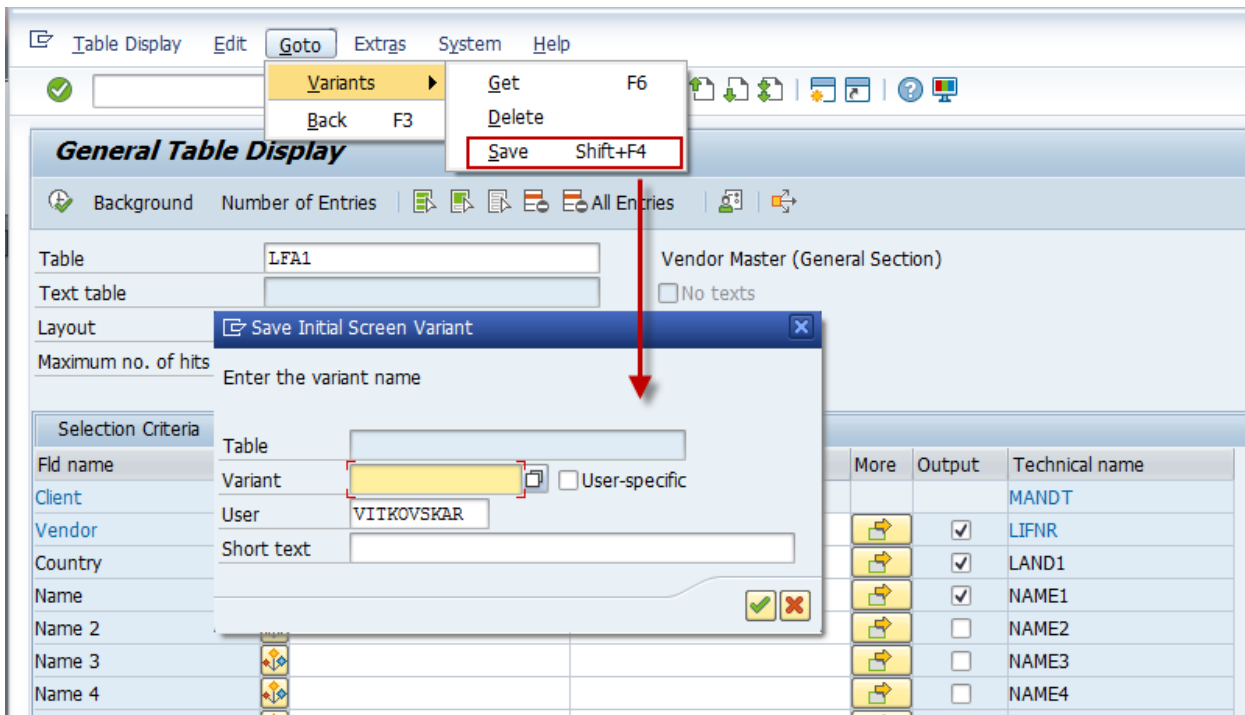

SearchTerm	Cty	PostalCode	City	Name 1	V
*****	BE	1170	BRUXELLES	BASF COATINGS SERVICES	1
*****	BE	8530	KILBINE	BASF MASTERBATCH N.V.	7

- a. Populate list with values, you've copied from other places. To use this function Ctrl+C the list of values and press "3".

- Remove "500" from **Maximum No. of Hits**, if you need to view all available records.

Width of Output List	1023
Maximum No. of Hits	

- Under **Number of Entries** you can see how many records system will return with the current selection.
- If you have some reports that you are running regularly with the same criteria you can save them as "**Variants**".
 - Mark the criteria that you want to use;
 - Goto/Variants/Save**
 - Populate the fields and save the variant:
 - Variant – variant name
 - User specific – if this field is not check marked, all users will be able to access it.
 - Short text – description of the variant

Now when you need to run the report **Goto/Variants/Get** or press **F6** and choose your variant

7 Baan report / refreshable query

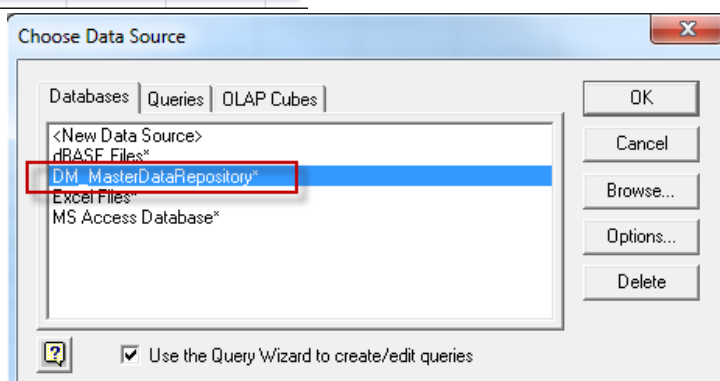

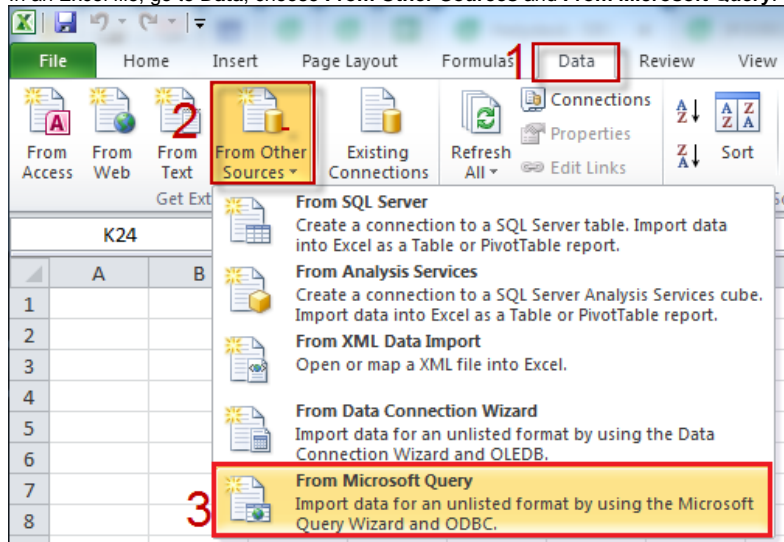

Transactions described in this chapter can be used to extract data from Baan environment either for reporting or analysis purposes.

Creating a report from Baan

Tools that will be needed for the creation of this report:

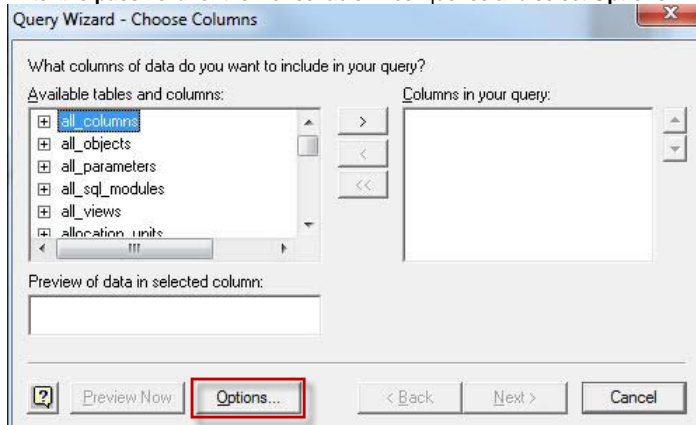

- Open blank Excel file
- File with Baan tables, their fields and descriptions

In an Excel file, go to **Data**, choose **From Other Sources** and **From Microsoft Query**:

Choose **DM MasterDataRepository** as Data Source:

Enter the **password** for the Refreshable Excel queries and select **Options** in the next window.

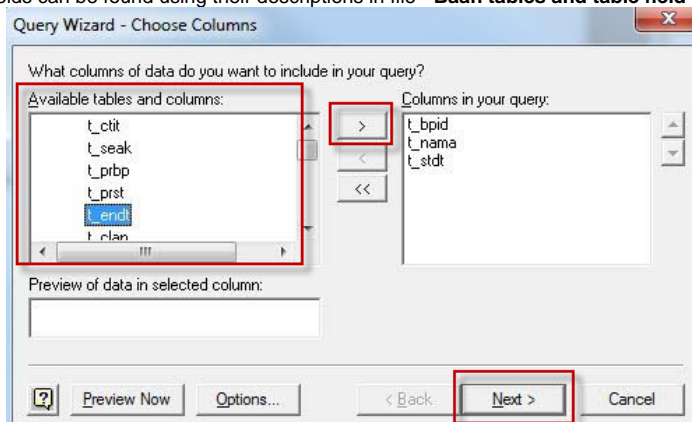

Choose **owner as dbo**:

In the next window, select the right Baan table from available tables and select the desired Baan fields for the report.

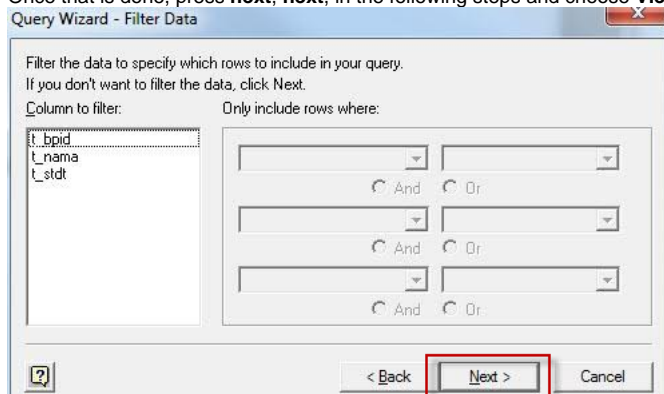

Please note that correct Baan tables and correct fields can be found using their descriptions in file - **Baan tables and table field names**. Push required Baan

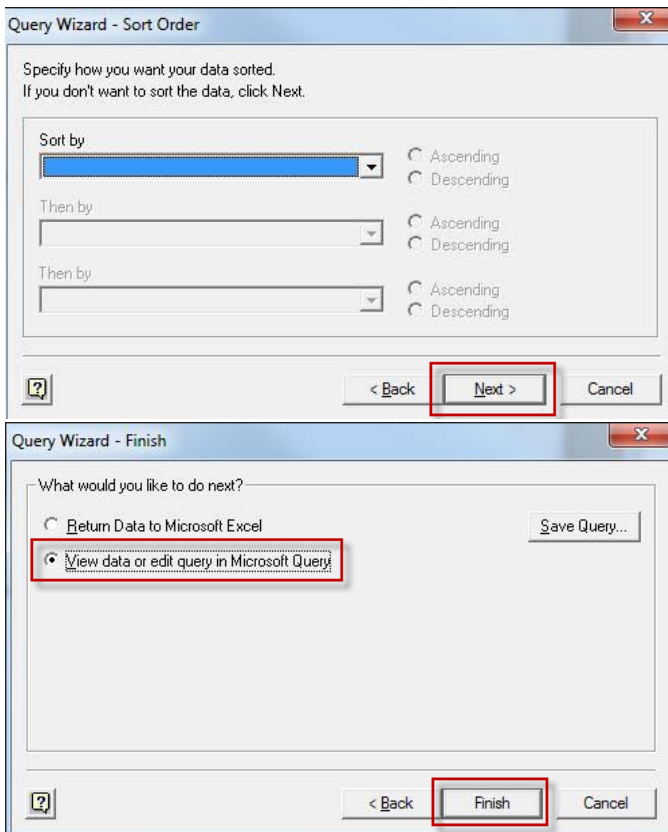

fields to the columns in your query and press **next**:

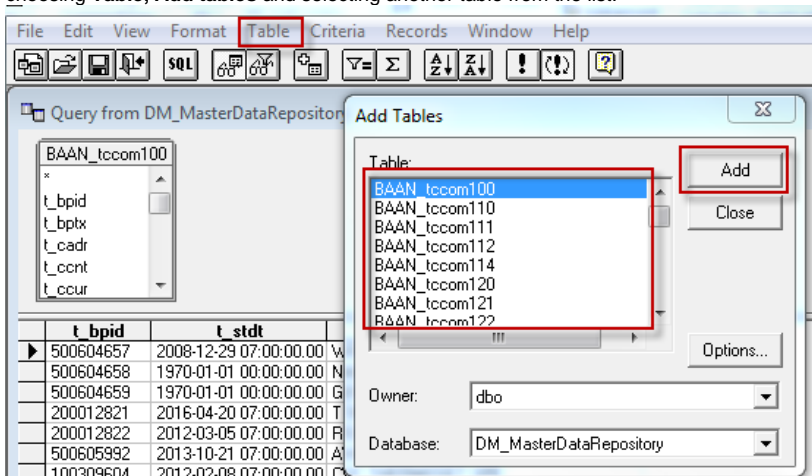

It is always best to select just the core fields in this step as later on you can always add more fields and fields from different tables. (E.g. table tccom100 for BP #, name, start date)

Once that is done, press **next, next**, in the following steps and choose **View data or edit query in Microsoft Query**, then press **Finish**.

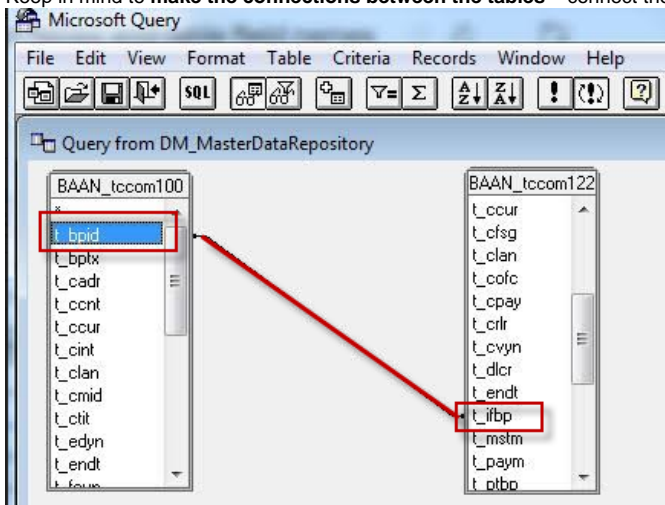

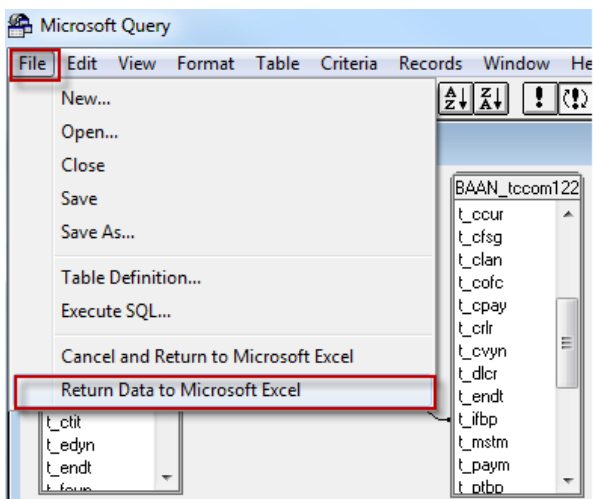

You will get your report data and if you want, you can add more fields by simply pulling them into your report from the field list or add more tables at this point by choosing **Table, Add tables** and selecting another table from the list:

Keep in mind to **make the connections between the tables** – connect the field that is identical in both tables (e.g. BP number)

Once your report is finished, go to **File, Return Data to Microsoft Excel**:

It is important to **remove the link** to the query if the report is sent out to outside sources. For that select **Data, Connections, Remove link**:

Doing so makes the report as values only without having a link to Baan system, so the report is no longer refreshable and it can be shared with other people.

8 7723 contact list update

This is an excel sheet that contains contact details for all vendors that are opened for 7723. You can find the excel sheet [here](#). Action performed one every month.

1. Go to WP1 transaction SE16 and choose table LFB1
2. In Company Code field add 7723
3. In Created on field add the last day you checked till today's date and execute

Data Browser: Table LFB1: Selection Screen

Number of Entries

Vendor to
