

# Rules - PF2 - Business Area

## Principles

**i** The Business area is used in **PF2** only and it identifies the business involved in each transaction.

The codification of the Business area is:

- 1st digit : [Rules - PF2 - Sector code](#)
- the 2 middle characters : [Rules - PF2 - Activity 1](#)
- last digit is always "0", except for German companies

**i** **Transaction code in SAP**  
[PF1 - Table TGSB \(view ZZRTGSBV\) - Business area](#)

**i** In PF2, the allocation of inventories by [Activity 1](#) is done using the **Business Area**

The Business area is a 4 digit code. The reporting division (= Activity 1) is determined from the 2 middle characters (positions 2-3).

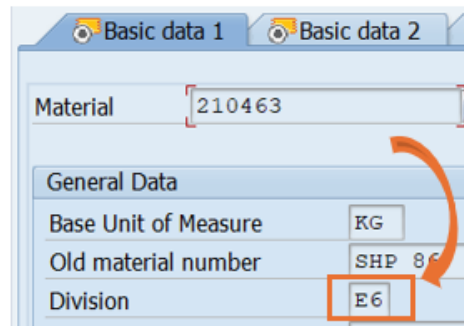

Reporting  
 Division = 49

It is directly assigned to FI postings, cost centers, orders and WBS.

The business area for material stocks movements, that will derive the inventory allocation in Working Capital report, is determined with the combination of its Division and a Plant

=> **DV x Plant = Business Area**

**i** Material division and Reporting division are not to be confused

## Determination of the Group of Activities using the business area

In [MM03](#), the division of the material code 31851 is AA

The combination of the Material division AA with the plant TOSA gives the Business Area 3490 (maintained in table T134G)

Plnt	Dv	BusA
53YA	B1	3490
53YA	D1	7330
53YA	E5	3490
53YA	E6	3490
53YA	E7	3490

The corresponding Reporting division is 49.

The group of activities (=SPPOL) is determined with the table ZZR\_REPO\_DIV using the reporting division (=49).
