

Data from SAP - Actuals (All GBUs)

Actuals list:

DATA ELEMENTS	DESCRIPTION	COMMENT
Actual consumption	Consumption for a product with the use of BOMs	These actuals are available in the MB51 transaction in SAP. The difference between these types of actuals is made by using the movement type and the procurement type. See table below for movement types & procurement type combinations for each data.
Actual production	Actual production at the current date	
Actual receipt (from PO)	Actual receipt from SAP	
Actual receipt (from PO) with source site	Actual receipt from SAP with source site	
Receipt value from PO	Receipt value from SAP	
Actual shipped at GI date	Actual shipped at good issue date (shipping date)	
Invoiced quantity	Quantity product that has been invoiced to the customer	VL03N transaction in SAP.

Movement types & procurement type combination for each data from list above:

Data	SAP System	Movement type	Procurement type
Actual consumption	WP1	261 // 262	/
	PF1		
Actual production	WP1	101 // 102 531 // 532 // 545 // 546	F (only with 101 & 102 movement type)
	PF1	101 // 102 131 // 132 // 531 // 532 // 545 // 546	F (only with 101 & 102 movement type)
Actual receipt (from PO)	WP1	101 // 102	Different from F (only with 101 & 102 movement type)
	PF1	545 // 546	
Actual receipt (from PO) with source site	WP1	101 // 102	Different from F (only with 101 & 102 movement type)
	PF1	545 // 546	
Receipt value from PO	WP1	/	/
	PF1		
Actual shipped at GI date	WP1	601 / 989 / 991	/
	PF1		

Here are a few examples of actuals we can see in SAP and then in Dynasys.

For more examples and details on actuals, feel free to check this wiki page:
