

Project deployment

Every SWoW project requires a local deployment, led by the **local multidisciplinary project team**.

Here you'll find some ideas about **WHO** to embark in this team and on **HOW** to structure the different phases of the project.

LOCAL leadership team and SWoW ambassadors will be essential to actively support the local project team.

The local project team will be supported by the corporate Facilities Excellence and Workforce Experience Team to kick-off the project & for guidance all along.
