General Presentation

SCREEN is 2 Log & Pack Dashboards providing Cost transparency & key performances analysis.

What ?

1. **One Single Source of Truth** for Procurement, Package Owners, Supply Chain and Finance, *but also for Business as well* in GBU and at Excellence Center Costs reconciled with P&L
2. Providing **Cost transparency** making links between flows from Plants to Customers, Vendors & Packages including Volumes Sold, delivered and handling units,....
3. **Providing** understanding of **action impacts from various programs** (E2E program, & all GBU projects)
4. Leading to a **standard way to assess performances**
5. Supporting the **identification of process issues and quality of data**

Access

Access to the SCREEN Qlik sense dashboards has to be requested : [Qlik Access Request Form](#) .

Access to the SCREEN BW queries has to be requested : [BW Access Request Form](#) (for some guidance in BW, see [BUSINESS WAREHOUSE](#))

Perimeter

Currently SCREEN Application contains data coming from the PF1 and WP1 ERP servers.

SCREEN is based on the new Solvay Group Taxonomy : see following pages for more info

- [Co\\$ta - Packages Taxonomy](#)
- [Co\\$ta - Package assignment](#)

Data update

- For month M & M-1 : automatic upload:
 - every day between D-2 & D+7 (where D = 1st working day of a month)
 - weekly on Saturdays
- Full load (Y,Y-1,Y-2) :
 - once a month at D+8

Screen BW data are not stored (retrieved from all others applications (FI, Logistics (Tiers), Master data)).
