

## b) via 'Edition grid view' directly in DynaSys

This option is not activated by default, needs to be completed by DynaSys team on how to activate it.

**Usefulness:** in terms of performance, sometimes it's useful to do "many changes at once" rather than one by one. This option could be in the case we want to do 1 to 10 changes (for more we recommend: [via Export/Import Microsoft Excel](#)) and it uses the 'Edition grid' in DynaSys.

1) Choose your SKU (Important: click on the 'SKU' column, not Material) and press CTRL+C

The screenshot shows the 'Edition grid view' in DynaSys. The main table has columns: Material, SKU, Valuation class SAP, Valuation class proposed, Valuation class override, and Valuation class final. A row for 'RHODASURF HPM 100 INTER 450LB CHS 7424 Baltimore' is selected, with a red arrow pointing to the 'SKU' column. Below the table, there is a 'Data fields' section with a table containing the same columns. A red arrow points to the 'SKU' header in this section.

Material	SKU	Valuation class SAP	Valuation class proposed	Valuation class override	Valuation class final
