

PIM-VALUE New/change/delete

Overview	Table of content
Describe the steps need the admin need to follow to implement this change Concerned profiles: ADMIN	New/Change/Delete value Step 1 - Check list owner this value can be created /Change /Delete link to owner by list link here - [PIMPROD] Value List Step 2 - New Value Find the list Create new entry Step - Modify Value Find the value in the list Update the English Value only (if change is minimal) Step - Delete Value Find the value in the list Delete value Related articles Need help?

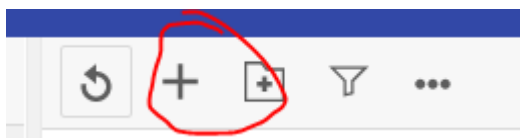

New/Change/Delete value

Step 1 - Check list owner this value can be created /Change/Delete	
ADMIN	
link to owner by list	link here - [PIMPROD] Value List
Step 2 - New Value	
ADMIN	

Find the list

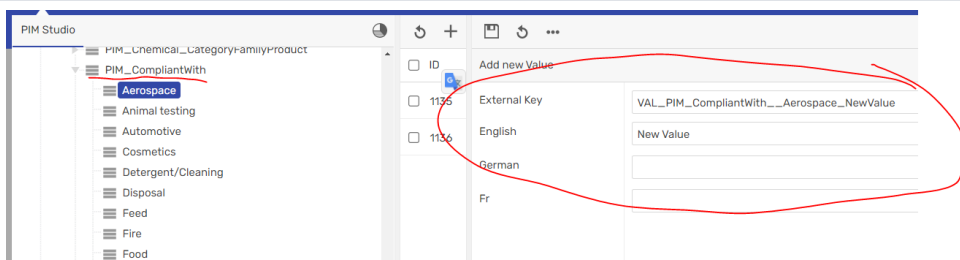

Create new entry

Fill External Key (same Format) as rest of the list

Fill the English Value

The other Values (German, Fr) are not necessary at this stage

NOTE: In the example above, the value should be created under a parent value called "Aerospace". Make sure you create the value under the right tree.

WARNING: It sometimes does not function. In that case the work around is to export list value & reimport it by populating Parent ID (so value get set under the right tree)

Step - Modify Value

ADMIN

Find the value in the list

Update the English Value only (if change is minimal)

Update the External Key if change is large

TBC with Conigon/Drupal team on the impact

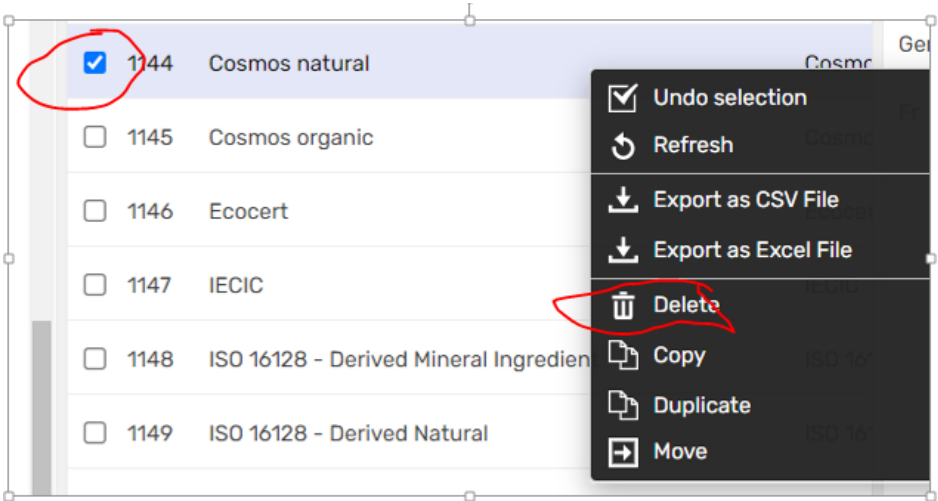

All Products tagged with this value will now be tagged with the new value

Step - Delete Value

ADMIN

Find the value in the list

Delete value

All Products tagged with this value will NO LONGER be tagged with this value
