

How to fix the 403/404 error ?

This issue should be fixed by the release planned on the June, 17th.

In case you encounter an error message displaying "403 Access denied" or "404 Page not found", it means you are trying to access an old Solvay One page.

Please make sure you are not accessing Solvay One through an old bookmarked URL.

To access to the page, please navigate directly within the new Solvay One (one.solvay.com).

403 Access denied

Sorry, the page you requested cannot be found, might have been removed or is temporarily unavailable.

Please return to the previous page, or click [here](#) to be redirected to the homepage.

404 Page not found

Sorry, the page you requested cannot be found, might have been removed or is temporarily unavailable.

Please return to the previous page, or click [here](#) to be redirected to the homepage.
