

How to fix the 403/404 error ?

This issue should be fixed by the release planned on the June, 17th.

In case you encounter an error message displaying "403 Access denied" or "404 Page not found", it means you are trying to access an old Solvay One page.

Please make sure you are not accessing Solvay One through an old bookmarked URL.

To access to the page, please navigate directly within the new Solvay One (one.solvay.com).
