

# I prepare the Intrastat return

## Tasks to be completed when documenting an operation (from creation to publication)

1. Enter the **Title of the operation / page**

2. Add the following Labels:

- Scope of applicability: **ww**, **country\_accounting**
- Country or group of countries (if applicable): belux, china, france, italy, lam, nam,uk\_ie, bulgaria, dach, netherlands, iberia, poland, latvia, australia, india, japan, south\_korea, thailand, singapore
- Unit and Domain according to the [List of labels to be used in the Finance Service Line space](#)
  - E.g. 1: WW Operation in Financial Accounting under domain "Central Finance Processes & Compliance":
    - Labels to be used: **ww**, **financial\_accounting**, **central\_fin\_proc\_compliance**
  - E.g. 2: France Operation in Financial Accounting:
    - Labels to be used: **country\_accounting**, **france**, **financial\_accounting**  
(for country operations, the Domain is always country\_accounting)

3. Fill in all fields as described above

4. Once the description of the operation is completed, ensure it is approved and published by launching the [SBS-Finance approval workflow](#)

**Domain:** Indirect Taxes

**Responsibility area:** Ensure the Intrastat compliance

## Table of contents

Previous OP << I prepare the  
Intrastat return >> *I submit the  
Intrastat return*

## 2. Definitions

See [Finance Glossary](#)

### 3. Tasks description

*WHAT and HOW - Main content of the operation*

*The content should be mainly organized in 2 levels of Headings to ensure a proper link with the Table of Contents.*

*Select the level of heading in the "Paragraph" option.*

#### *3.1. I perform the SAP extractions (the SAP transaction used depends of the country)*

With a few exceptions, the SAP extractions are provide by the Robotization Team after the closure of the month.

#### *3.2. I compare the data extracted from SAP with the VAT codes*

SU VAT Team should analyze the differences between the VAT data extracted and the Intrastat data and complete the missing information. For that purpose, the team should perform the Quality Checks (see 3.4). The tax codes per country related with EU acquisitions of goods and EU supplies of goods should be taken into consideration when preparing the Intrastat. In case of differences between VAT tax codes amount and Intrastat data, VAT team should be able to justify the differences.

#### *3.3. I check the origin of the differences between SAP extractions and VAT codes, if any*

See 3.2

#### *3.4. I analyse the differences to validate the VAT treatment*

In case there are differences between VAT and Intrastat (use transaction Z1F\_CHECK\_INTRASTAT), the differences have to be justified.

In cases the flow was not retrieved in intrastat side, VEFU needs to be populated in order to update Intrastat info and be able to create the files for upload, when applicable.

#### *3.5. I request to Purchasing SL the corrections of tax codes related with intracommunity transactions, if any*

Under the VAT codes analysis, some invoices are identified for VAT code correction. To request the correction, SU VAT/Intrastat have shared a file in G drive with PTP, where are inserted all the corrections that needs to be done by tax code.

**End of document.**
