Work Instruction

Functional Area: S2S

Process Name: Vendor Maintenance

System: SAP PE1 – client 300

Instructions for creation of this document

Creation

- 1 work instruction per System environment (if multiple systems are used for same process flow)
- Update table of contents: This can be done automatically by right clicking in the table of contents and selecting "update field"
- Use a screen shot making software for easy 'copy-paste' screen shots of system screens or documents
- Purpose:
 - Describe in 1 or 2 sentences the essence of the process
- Work instructions - for the requesters:
 - Indicate by region/country/location the instructions in order to be able to execute the process in the DMO

- Use appendixes for documentation in multiple languages, listings, local documents, etc. - this to keep the core work instructions concise
- Work instructions - for DMO:
 - Explain each 'box' in the swimming lane called 'SSO' indicated on the process flow; use for each 'box' a new sub header 'process step 1' etc. ('header 2' in Word template)
 - Add systems/document screenshots with complete description and fields in use.
 - Explain if there are local Specifics / Exceptions in table below each screenshot (Don't describe specifics / exceptions in the general process description)
 - Use 'naming convention' for process names, etc.
 - Use appendixes for documentation in multiple languages, listings, local documents, etc. - this to keep the core work instructions concise
- Appendixes:
 - Use for documentation in multiple languages, listings, local documents, etc.

Purpose

The objective of the vendor setup and maintenance in SAP is to enable the S2S processes within SAP in relation to direct and indirect spend purchasing and invoicing parties.

General Description

Every request for a vendor setup or maintenance should be requested through FreshDesk. Requests received through Data Operations Mailbox or Workflow system (AP related requests) should also be entered into Freshdesk.

SAP Vendor Account Groups

The Account Group field is a high-level grouping which defines the primary use of a supplier. The account group selection drives certain aspects of system processing, such as whether the supplier can be used for invoicing or purchasing.

- All Vendor Master records in the system are assigned to an account group
- The vendor account group is a logical grouping of alike vendors in the system
- The vendor master view layout and field access is controlled via the account group

1	Main Supplier Vendor	ZVEN	Suppliers are the business partners against which the PO is raised. Payments can also be made from this vendor.	GeneralCompany codePurchasing
2	Invoicing Vendor	ZINV	Invoicing Party is the business partner against which the invoice is posted.	GeneralCompany code
3	Ordering Address Vendor	ZOAD	Ordering Address is the business partner for whom we maintain only address details. This account group is used just to capture the address details where the PO print/emails go to.	General
4	Intercompany Vendor	ZINT	Companies in Solvay group have to be created as vendors under this account group to facilitate STO (Stock Transfer Order)	GeneralCompany codePurchasing
5	Employee Vendor	ZEMP	Business partner for paying reimbursements for Solvay employees.	GeneralCompany code

Determining Account Group

Vendor should be set up only as the invoicing party (ZINV) if:

- The address is a remit-to address, which will be used for payments only
- Vendor has been classified as a Non-PO vendor through the commodity code field

Data Steward should provide commodity code, based on that, you can recognize if vendor needs to be created as a PO vendor under ZVEN account group or as non-PO vendor under ZINV account group.

The list of Non-PO Commodity codes can be found in the table below:

Commodity Code	Description	PO / Non PO
BUSTRA	Business Travel	Non-PO
GOVTAX	GOVT Taxes, fees	Non-PO
GOVOTH	GOVT Other Expenses	Non-PO

CONFID	Confidential spend	Non-PO
HRTRAI	HR Training & Educa	Non-PO
HRHEAL	HR Health Med Welln	Non-PO
HRRERE	HR Rewards Recog	Non-PO
HREXPA	HR Relocation Expat	Non-PO
HRLEAS	HR Leased Cars	Non-PO
HRPEBE	HR Pension, Benefits	Non-PO
HRTEMP	Temp Personnel Salaries & Other Fees	Non-PO
FININS	FIN Insurances	Non-PO
FINAUD	FIN Audit Fees	Non-PO
FINBNK	FIN Banks	Non-PO
FINFIN	FIN Charity donation	Non-PO
LEGALS	Legal Services	Non-PO
ITTELE	IT Telecom costs	Non-PO
UTILIT	UTIL Electricity	Non-PO
UTILIT	UTIL Natural Gas	Non-PO
UTILIT	UTIL Fuel	Non-PO
UTILIT	UTIL Steam	Non-PO
UTILIT	UTIL Water	Non-PO
MCLISM	MA Subscriptions	Non-PO

NOTE: Non-PO vendors **should not** be set up for purchasing
Vendor should be set up only as the main supplier (ZVEN) if:

- The address is the primary and the only address provided for a supplier and it has not been flagged as a Non-PO vendor

Required Documents

A request for vendor setup/maintenance must be accompanied by approvals (see §4) and following documents:

- Completed template for all new creations.

Europe:

- No mandatory document is required, but for every new bank detail addition, we need Company letterhead / invoice / e-mail from supplier / SBI or equivalent, containing:
 - Name
 - Remittance address [best practice]
 - Bank details
 - VAT registration number + tax information (when applicable)

Both VAT number and IBAN number must be validated as described in [Validation For Customer And Vendor Master Data](#).

US:

- Company Letterhead / Invoice or any official documentation, which contains vendor's name, address, bank information (if applicable). An e-mail from vendor can also be accepted, if it contains all mandatory details.
- W-9 form except for:
 - Applicant interview expense reimbursement;
 - Donation payments (local charities, sponsor youth groups activities, etc.);
 - Employees;
 - Vendor setup for manual payment request to pay back a customer who has a negative balance;
 - Amounts received as damages for personal physical injuries or physical sickness (liability settlements for asbestos);
 - State institutions, taxes, garnishments
 - Contingent workers, if the reason of payment are awards or recognitions;
 - Vendors located in Canada – they do not have W-9 form.

Suppliers falling under W-9 form exceptions do not require additional approvals for the creation and have special parameters for the setup:

- Payment terms – NET1;

- Commodity code - non-PO commodity code, according to services
- Segmentation – Sensitive.

There are cases when W-9 form is required for payment request:

- Membership fee;
- If payment request does not fall under any of W-9 form exceptions;
- Contingent workers (consultants)

Customer Carrier: No additional documentation except for customer template is required. VAT number should be provided for European accounts.

NOTE! VAT number is mandatory for all **EU based** vendors.

Required Approvals

Extension from other systems/company codes:

If vendor exists in other systems or for other company codes:

- In case the payment terms are the same no additional approvals are required, but buyers/data stewards should be informed.
- No additional documentation is required, if the details can be checked against recent invoices. In case no recent invoices found in the system, official document should be provided (invoice, W9 for US, letterhead with bank details)
- No template is required. In case some system specific details are missing, please turn back to the requester to clarify.

Approvals for Direct suppliers (Raw Materials):

Please note!!! Packaging vendors can be set up as both DIRECT and INDIRECT depending if the goods they deliver are in the BOM or not. Please check with the requester, if Packaging needs to be set up as a Direct Supplier, follow Direct Spend setup, in case of Indirect- set up as an Indirect Spend supplier. Approvals for changes and setups should come from persons approving Indirect Spend suppliers.

Approval for creation: No approval for creation is needed if there are standard payment terms (see **Appendix 3 – Overview Standard Payment Terms**) and if request comes from Direct Spend Data Steward. If request comes from any other person, approval from Data Steward needs to be provided:

Name	Surname	Title	Region	Country	Location
Ammar	Alsali	Purchasing Lead EMEA	Global	UK	Heanor Manchester
Chazz	Pelfrey	Raw Material Planner	IM	US	Tulsa
Clint	Baker	Raw Materials Planner (<i>backup</i>)	IM	US	Tulsa
Marie	Woodhouse	Buyer	PM	UK	Keighley
Melanie	Greenfield	Materials Planner	PM	UK	Keighley
Davide	Mina	Buyer	PM	IT	Mondovi
Tracy	Ng		PM	US	Santa Fe Springs
Davide	Mina	Buyer	PM	FR	Toulouse

Payment terms approval: For new vendor creation if requested payment terms are less favorable to Solvay than Standard Payment terms (see **Appendix 3 – Overview Standard Payment Terms**) an approval from Procurement Director is requested. In addition, any modification of payment conditions of the existing vendor that is less favorable for Solvay requires a written approval from a Procurement Director.

Name	Surname	Title	Region	Country	Location
Heanor, Manchester, Tulsa					
Jean-Pierre	Demeunynck	Head of Purchasing	CEM	US	Tempe
Santa Fe Springs, Keighley, Mondovi, Toulouse					
Tracy	Ng	Procurement Manager	CIM	US	Santa Fe Springs

For Standard or Non-Standard payment terms only "Harmonized payment term codes" also called "Approved Payment term codes" are allowed to be used (see **Appendix 4– Overview Harmonized and approved Payment terms**).

Transportation related suppliers

Approval for creation - Approval for new vendors can only be granted by Transportation/Logistics Manager.

Payment term approval - Any exception to the Standard Country Payment terms require written approval from a Transportation/Logistics Manager (see table).

Name	Surname	Title	Region	Country	Location
Frank	Valendo	Manager of Transportation, North America	Global	Tulsa	Garret Mountain
Pietro	Iodice	Site Leader - Operat. Director	Europe	Mondovi	Mondovi
Robert	Murdock	Product Line Director	Europe	Keighley	Santa Fe Springs
Emmanuel	Odic	Site manager	Europe	Toulouse	Saint Jean
Andrew	Rimmer	European Logistics Manager	Europe	Heanor, Manchester	Wrexham

Tracy	Ng	Procurement Manager	US	Santa Fe Springs	Santa Fe Springs
-------	----	---------------------	----	------------------	------------------

Customer Carrier – Customer carrier is used by Customer Service to indicate the carrier used by customer. Additionally only the General data needs to be created (ZVEN is not opened for company code or purchasing organization). Approval/Request for the setup should come from Customer Service Representatives.

Important!!! When new carrier-forwarder is created carrier calendar table should be completed for carriers delivering outbound goods (all customer carriers). On how to do it please see Appendix 6.

Suppliers falling under Indirect Procurement scope of responsibility:

Approval for creation/payment terms: No approval for creation is needed if request comes from Indirect Spend Data Steward. If request comes from any other person, approval from Data Steward needs to be provided:

Name	Surname	Title	Region	Country	Location
Ken	Sharp	Capex Buyer	Europe	UK	Heanor Manchester
John	Stanmore	TS Buyer (<i>backup</i>)	Europe	UK	Heanor Manchester
Michael	Adler	Buyer	NA	US	Tulsa
Tracy	Ng		NA	US	Santa Fe Springs Keighley
Davide	Mina	Buyer	Europe	IT FR	Mondovi Toulouse

Suppliers falling under outside Procurement Scope of Responsibility (non-PO)

Approval for creation: No approval for creation is needed if request comes from Finance controller. If request comes from any other person, approval from Data Steward (Finance) needs to be provided:

Name	Surname	Title	Region	Country	Location
Julie	Sampson	Finance Analyst	Europe	UK	Heanor Manchester
Shannon	Raney	Finance Controller	US	US	Santa Fe Springs
Sandy	Diercks	Plant Controller	US	US	Tulsa
Sarb	Variah	Site Controller	Europe	UK	Keighley
Giuseppina	Barovero	Site Controller	Europe	IT	Mondovi / Toulouse

Check completeness of the template

Upon receipt of the request for the maintenance or creation of a vendor, the completeness of the template (**Appendix 6**) must be checked and all required documents must be joined.

The template must be always fully completed. If Section 1 can be completed by a vendor, Section 2 is for internal use and should be filled out by the requestor.

Additional comments from requester:	

Changes

Overview of the changes and necessary approvals / documentation can be found in **Appendix 14**.

Data Governance is responsible for all SAP processes.

- Any changes to vendors that involve the following fields:
- Commodity Code

- Payment Terms
- INCO Terms

REQUIRE approval from Data Steward. For PO suppliers approval for Payment Term changes should come from Procurement Director. Any other changes to the vendor's address or account information do not require the Data Steward approval.

NOTE! If payment terms on the invoice are longer (more favorable) than in the system, we can accept requests from AP and change payment terms based on the invoice without additional approvals.

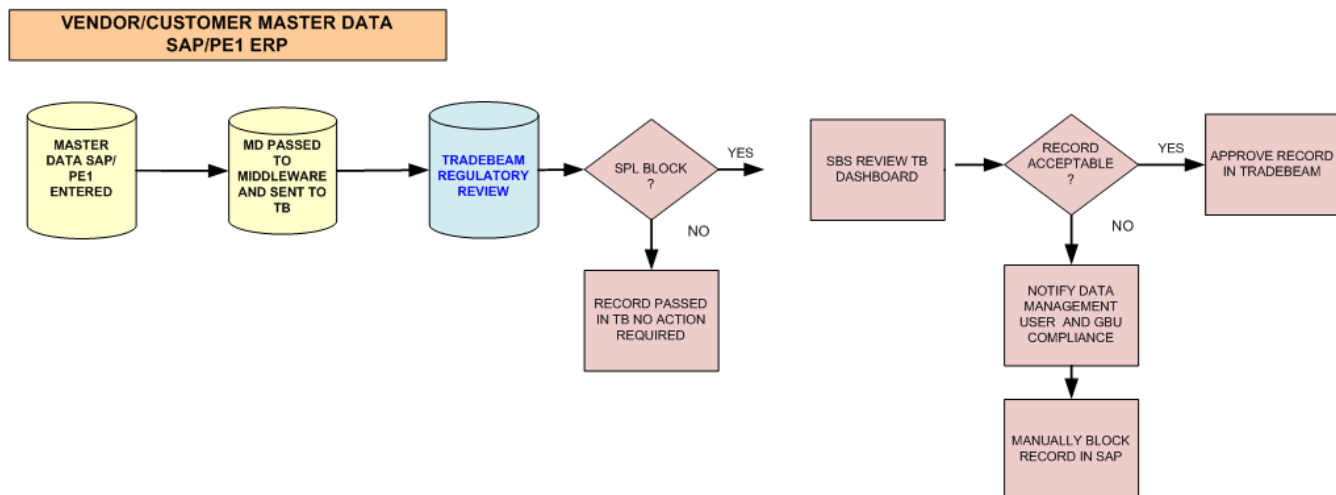

- For following changes we do not require to fill out a request form:
 - Contact details
 - Banking information
 - Currency
 - Name
 - Address
- For name change in US W9 form should be provided in order to verify that the Tax ID stays the same.
- For name change in other countries, address change and banking information change a letterhead with the new information should be provided. For ZOAD creation/change checklist or an e-mail with the new ZOAD should be provided
- **NOTE!** Address, currency and name changes for Direct Spend Suppliers should be duplicated in the corresponding Returns Vendor account in the customer master as well. After completing changes in vendor master please send the request to DM RIGA Customer Master Team. When creating the ticket, please provide vendor number, returns vendor number, and original FD ticket number. The purpose of Returns vendor is to maintain an address to which returned (or faulty) goods could be sent back to.
- Extension to another company code—In case the payment terms are the same no additional approvals are required, but buyers/data stewards should be informed.
- Address and currency changes for Direct Spend Suppliers should be duplicated in the corresponding Returns Vendor account in the customer master as well. After completing changes in vendor master please send the request to someone from DMO Customer team.
- If a new vendor needs to be created due to differing currency no additional documentation is requested. If a new vendor needs to be created due to an additional ordering address a checklist or an email with the new address should be provided.

TradeBeam Screening

Screening will be performed at partner creation. Transactions will automatically be passed to the TradeBeam Solution for the restricted party compliance screening when a partner is created or changed and saved. The screening of all partner records will be performed against the government published lists.

Master Data Setup:

- Data Operations enters a new record in system. Saving the record will pass the record to TB for SPL screening.
- Tradebeam will review the record and if necessary place the record on the task list for SBS review.
- SBS will review the record and determine if the record is true block.
- If the record is a false positive the record will be approved in TB.
- If the record is true block, Data Operations individual who entered the data in SAP will be notified to manually block the record.
- Data Operations will block/inactivate the record in SAP.
- Data Operations will notify the requester that the record has been blocked by the compliance team.

Compliance team contact information:

- **NAM/LAM/EUROPE** - trade.control@solvay.com
- **APAC** – Diane Giglio

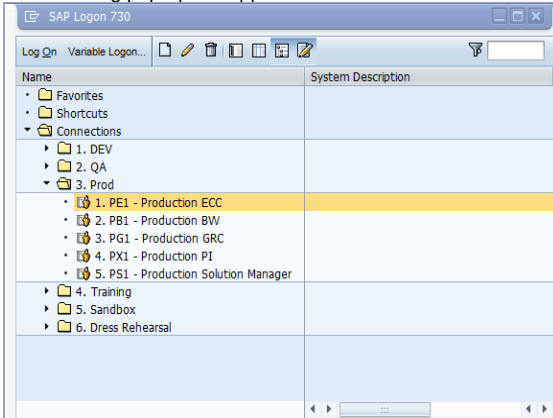

Process description

Accessing SAP

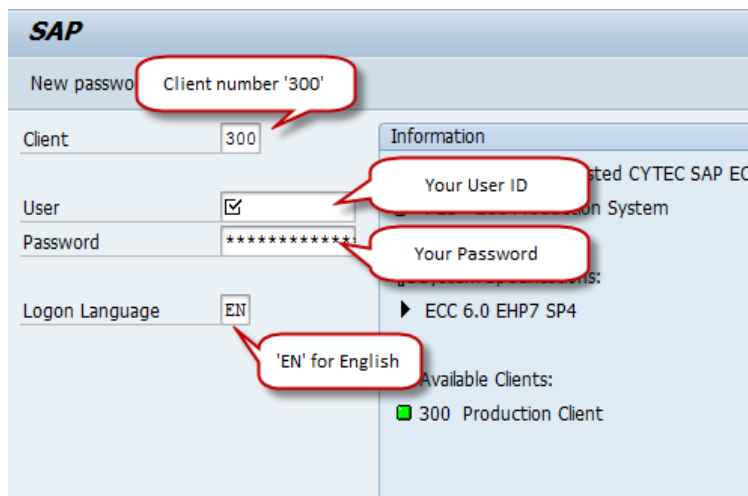

The first step is accessing SAP, on your desktop or on the desktop start menu you double-click the icon:

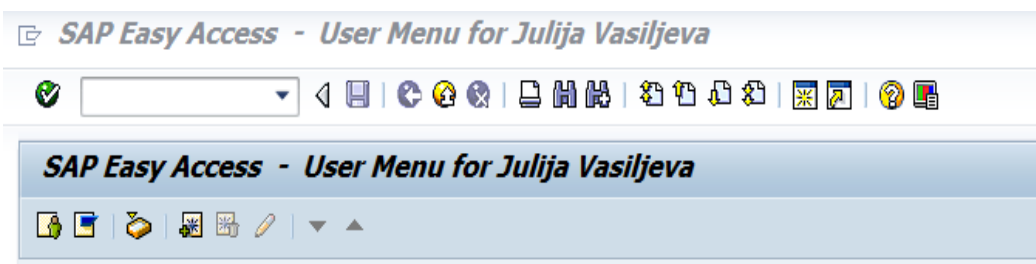

The following pop-up will appear:

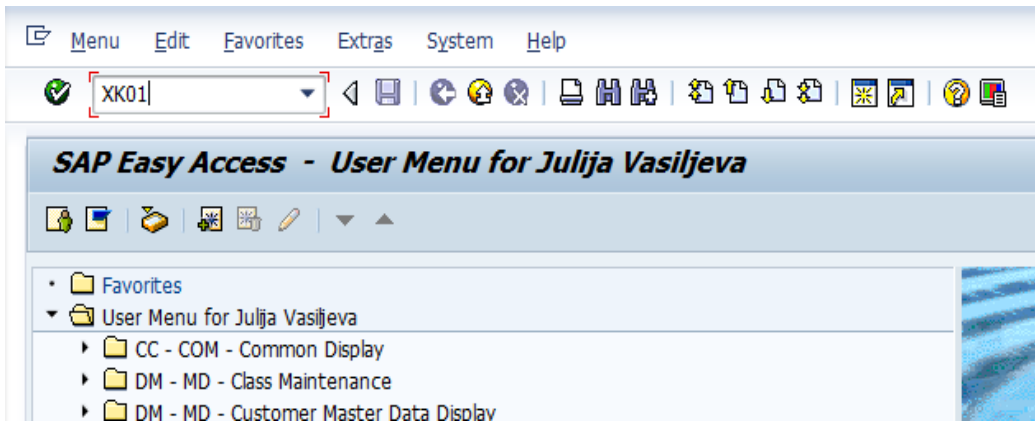

Double click on **PE1- Production ECC** and you'll be connected to log-in screen from SAP. Complete following details and hit Enter.

Enter into the main menu of SAP:

Then transaction code needs to be entered:

Available transaction codes:

- XK01 – create new**
- XK02 – change**
- XK03 – display**
- XK04 – view of account changes**
- XK05 – block**
- XK06 – mark for deletion**
- XK07 – account group change**

Checking if a vendor already exists

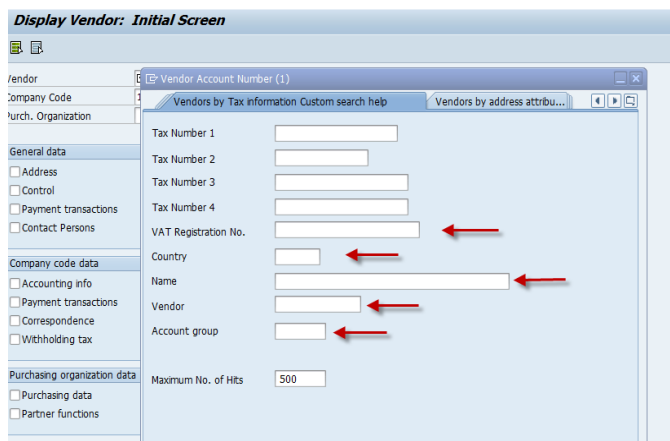

Before creating a vendor, always check if the vendor doesn't already exist in the system. The system will also check for you once you start entering the data, but a small difference like a space, can still accept the creation of the vendor.

Select transaction code XK03, hit enter. On the next screen, put your cursor on the "vendor" field.

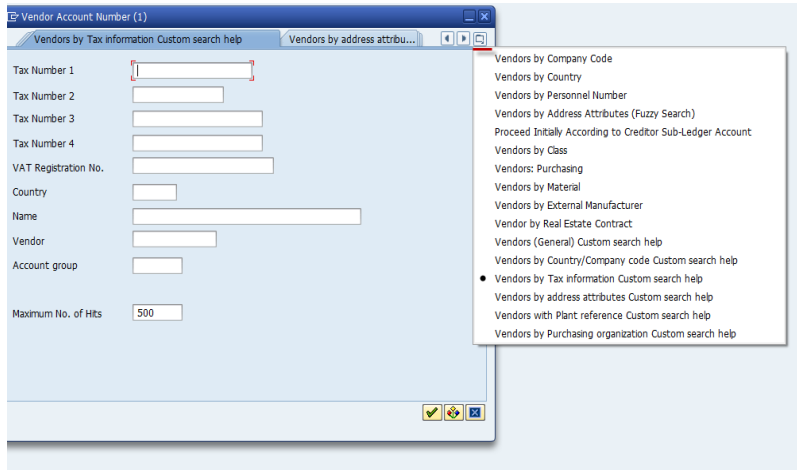

Select :

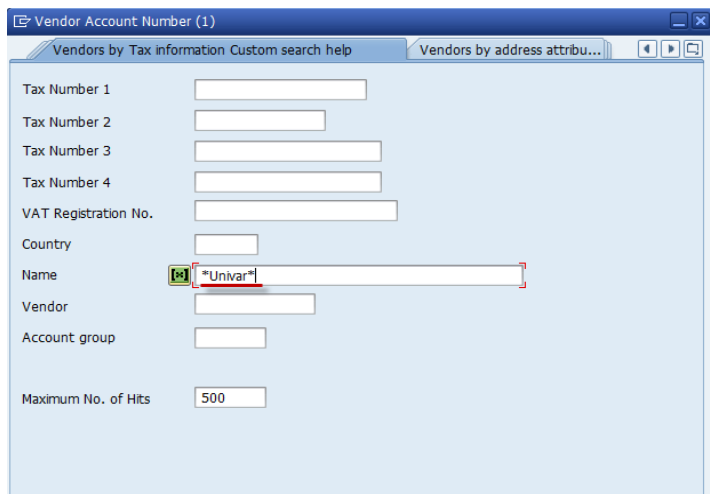

You will get to the following screen:

There are different options how to look up for existing vendor – by name, by registration number, by country etc. You can also press  for more options:

Use the name or a part of the name of the vendor (Sentence case)
Use *** as a wildcard, which is replacing a part of the name which you don't enter in the field.

Hit enter and the next screen will appear:

Tax No. 2	Tax Numbe...	Tax Numbe...	VAT Registration ...	C...	Name 1	Vendor	Acct_G...	Cent_D...	Cen_Pst...	Cen_Pur...
			GB557180334	GB	Univar Limited	10000119	ZVEN	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			NL002307716B01	NL	Univar Bv	10000742	ZVEN	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
91-1347935				US	Univar USA Inc	10000264	ZINV	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
91-1347935				US	Univar USA Inc	40000113	ZVEN	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

You can select the vendor, by double clicking the record. You will return to the initial screen "Display vendor". Select the views you need to see in detail and compare the data in the system with the input from the requestor.

To find for which Purchasing Organization or Company code this vendor has been created press

Enter vendor number that you have found and press . You will get results for all the companies this vendor has been created:

Vendor: 10000119

Company Code: Restrict Value Range (1)

Purch. Organization: Restrictions

General data

Address

Control

Payment transactions

Contact Persons

Company code data

Accounting info

Payment transactions

Correspondence

Vendor: 10000119

Company Code:

Company Name:

City:

Currency:

Maximum No. of Hits: 500

Restrict Value Range (1) 2 Entries found

Restrictions

Vendor: 10000119

Co...	Company Name	Ci...	Crcy
7218	Cytec IM (Derby) Ltd.		GBP
7223	Cytec IM (Manchester) Ltd		GBP

Double click on vendor number.

If the vendor has not been created at all, you must create a new one.

If the vendor already exists for one company, just extend it for requested company.

IMPORTANT: If vendor's VAT number or tax code has been changed, new vendor needs to be created and old one needs to be blocked and marked for deletion.

Any financial information change for vendor (name, IBAN) needs to be accompanied by official company's letter/invoice/email and check list.

Bank detail verification

Due to Solvay audit requirements for bank detail addition/change requests bank information needs to be verified with the supplier.

It is done by sending an e-mail to the supplier and asking to confirm that the bank details provided upon vendor creation / update request are valid for W-9 exceptions and contacting GCC team for standard vendor creation.

E-mail templates can be found [here](#) for Z011 supplier bank detail clarification.

For bank detail addition/changes:

- Use the email address mentioned at the general data level (Contact persons section -Financial department contact);
- If email address is not available at the Contact persons section (Financial department contact), use the one in the general data - communication section;
- If email address is not available in the vendor master, check this company in Google and use that email address;
- If email address can't be found in the internet (sometimes companies have only Online web forms for contacting them), contact the responsible buyer;
- **Do not** send e-mail to the address mentioned on the invoice;
- For Miscellaneous Creditors bank details should be clarified by Data Operations to ensure that outbound is made within the same day, **except** Governmental Institutions. For Governmental Institutions the requester should provide bank account, contact ID and source of bank account.

Exceptions:

- E-mail domain used by supplier to provide new bank account matches Vendor Master Records.
- E-mail used by supplier to provide new bank account matches Vendor Master Records;
- E-mail mentioned in the supporting documentation with new bank account matches Vendor Master Records;
- Vendors located in China, India, Japan, as banking information is being checked during the payment run;
- If IBAN can be validated here [GOV.PL](#) for Poland.

gov.pl | Ministry of Finance

List of entities registered as VAT payers, unregistered, as well as deleted and restored to the VAT register

Account number NIP REGON Name of the entity (min. 5 characters excluding special characters)

Enter the tax ID number

Outbound should be done by GCC Team based on the vendor location:

- NAM/LAM vendors should be contacted by GCC Curitiba (PTP AP Specialists NAM, PTP AP LAM)
- APAC vendors should be contacted by GCC Apac (PtP HD APAC)
- EMEA vendors should be contact by GCC Lisbon (PtP Provisioning EMEA)
- For countries Poland, Finland, United Kingdom, Latvia, Kazakhstan contacted by GCC RIGA (PTP HD RIGA)

Fresh desk ticket for contacting GCC

In order to contact GCC team, please submit new or existing request in a FD ticket following request type/process.

Type *

BD Outbound

PTP-Process *

PTP-Subprocess *

PTP-Category *

With following group:

Priority *

Status *

Group *

Country

Parent or Child (System - Please ignore)

Parent ID (System - Please ignore)

Please see below the points of what should be added in the ticket:

1. Vendor ID and Country (in Freshdesk ticket subject)
2. SAP Vendor Master Data contacts
3. Vendor contacts from official page in the Internet
4. Which data needs to be confirmed (VAT, Contacts, Bank account, Bank ABA routing number, check remit address for US payments by check,...)
5. If SBI/RIB/Evidence is required (Vendor Creation Required Documents)

GCC Team's Procedure.

If the GCC Team receives anything related to bank details, they will transfer the ticket to Data Team to determine the necessary actions as only Data will be able to better tell if an outbound is required, which team should perform it and if necessary, transfer the ticket back to GCC for outbound.

If the outbound from GCC has been unsuccessful after their 3 attempts, the ticket will be transferred back to Data Team for further actions:

- If there is no Bank Data in Vendor Master, Data Operation will inform requester that they were not able to confirm the Bank Account and due to that the same will be empty until the first invoice will be received and posted. When this is done, invoice is posted and blocked and then the supplier will have an Invoice Reference to identify why we have contacted them.
- If there already is Bank Data in Vendor Master, payment is performed to what we already have and no changes are made until further contact from the supplier.
 - If GCC has forwarded the documentation and screenshots from the system to the supplier the outbound is not considered as valid.

Creating a vendor

Create Vendor: Initial Screen

The transaction for new vendor creation is 'XK01':

Vendor For a new creation vendor number must stay blank. The system will automatically assign a number to the vendor at the moment of saving the record.

Acct Group	Number range
ZEMP	70000100-79999999
ZINT	80000 - 89999
ZVEN, ZINV, ZOAD, ZRFQ	10000100 - 49999999
ZVNH	30000 - 59999
ZLEG	50000100 - 59999999
ZPOR	90000100 - 99999999
ZMNF	60000100 - 69999999

Company Code Vendor should be opened in Company Code if the remittance address is the same as the general address for PO suppliers or if it is a non-PO supplier.

Company code	Description
1246	Aerovac Llc
7250	Aerovac Keighley Ltd
7252	Aerovac Toulouse Sas
7257	Aerovac Mondovi SRL

Purch. Organization

CP01 for ZVEN vendors;
Blank for ZINV vendors.

Account group

ZVEN – for PO Vendors;
ZINV – for non-PO vendors, or for PO vendors with differing invoicing address;
ZOAD – for Ordering address.

NOTE! For **Customer Carriers** vendor should not be opened for Purchasing Organization or Company code.

Create Vendor: Address

Name Company name. In this line the name should not be longer than 40 characters. If the name exceeds 40 characters, second line (it is field **Name 2**) is to be used for next 40 characters. Do not use commas or any special symbols in the name (except for the '&' sign if specifically requested). **NOTE! Name 1** and **Name 2** fields are printed on documents and labels – try to accommodate all name info in those 2 fields. (Sentence case)

Search Term1 Should capture the "essence" of the vendors name:

- Suppress any business entity types, such as "Corporation", "Company", "Co", "SRL", "GMBH" etc.
- Don't use any special characters - dots/hyphens/commas etc.
- Suppress eventual first name if this is a person (only use the last name)

- If the name contains initials, put a space after each initial (e.g. EPC POWDER should read as E P C POWDER)
- If the name contains more than one word, populate as much as it fits (even if the last word fits only partially)

Search Term2 Filled in for:

- ZEMP vendors - PeopleSoft ID
- ZINT vendors – 'PAYER' for Payers, Plant numbers for Plants.
- ZVEN and ZINV – 'WITHOLDING' for vendors eligible for Witholding (Mondovi).
- 1099 reportable suppliers – '1099', except if
 - company is a Raw Material supplier;
 - "Corporations" or "Incorporations" is checked on the W-9 form;
 - Box is checked next to "Limited liability company", but in the comment is letter "S" or "C" = Corporation in W-9 form.

C/O - 'Care of' / 'Attention to' name (if applicable). Part of the address if the recipient is different from the occupant and the names are not similar. Starts with "C/O" or "FAO", else blank.

NOTE! Information entered in **C/O** field is not printed on documents, therefore to make this information visible for document users it may be copied to **Name 2** field.

(Sentence case)

Street - Main field for street address of vendor, max 35 characters to be filled in this field. As Street 2 and Street 3 fields are not printed on all documents, street should be fitted in this field.

This field is used to capture PO Boxes as well. If a PO Box is used only for remittance information a ZINV account with it should be created.

(Sentence case)

District - Will be populated automatically for USA and Canada depending on the Country, State and Postal Code.

Postal Code - Postal code / ZIP code. SAP provides standard postal code format checks depending on the country maintained.

City - City name. For USA and Canada SAP may overwrite the City name with a value depending on Postal Code. (Sentence Case)

Country - Country code (**Appendix 9** –list of country codes in SAP).

Region - State / Province / County. Choose according to the City.

Mandatory for **US** and **Canada** and optional for other countries.

Time zone - Automatically determined by the system.

Tax Jurisdiction - Automatically assigned by the system for US suppliers.

Transportation zone - Transportation Zone is defined based on Country Code (CC) and Postal code (PP..) as follows:

For US: Country Code (US) + first 3 symbols of postal code, CCPPP (Example: US750 if the postal code is 75053-2029)

*For other countries: Country Code + first 3 symbols of postal code if postal code is less or equal to 5 symbols, CCPPP
Country Code + first 4 symbols of postal code if postal code contains more than 5 symbols, CCPPPP*

For countries which do not have zip codes: SAP Country Code + 3 or 4 zeros, CC0000.

Inner spaces and dashes are eliminated before concatenation:

Ex1: Country CA, Post code H7L 4R9 = 6 symbols = CCPPPP = CAH7L4 (no space)

Ex2: Country KA, Postal code 110-360 = 6 symbols = CCPPPP = KA1103 (no dash)

TZones are dependent upon Country Code master (T005).

Customer, Vendor and Routes are dependent upon TZones.

Note! In case correct TZone cannot be found based on the codification above, please consult **Appendix 15**.

Language - For structural material sites language defaulted to EN – English

Local language details are maintained for Process Material Vendors which only deal in French and Italian

- If a Process Vendor has a country address in France and is only open for Toulouse company code then set the language indicator to French
- If a Process Vendor has a country address in Italy and is only open for Mondovi company code then set the language indicator to Italian

When extending existing vendor from Toulouse or Mondovi to a different company code please make sure to check that language code is set to EN for all company codes.

Telephone - Telephone number, consisting of dialing code and number, but without the country code as it is being picked automatically based on the country entered as part of the address. If more than one telephone number is maintained for an address, the first telephone number is marked as the standard number. Press *Other Telephone Numbers* button to maintain more numbers.

If the country code of the telephone number is different from the country in the address, it can be changed in the pop up "Maintain Telephone Number".

Create Vendor: Control

Customer - In cases mentioned below this field is populated with SAP number of the customer counterpart of the supplier:

- Direct spend suppliers (Returns vendor number);
- Customer refund vendors;
- Intercompany vendors.

For all Direct spend related vendors: send to someone from DMO C2C team in order to create customer general view and sales org. screen (VD01) (attach all received documentation). When customer part is completed, add customer reference number in the Control screen and then ticket can be closed.

Tax number 1 - For US - SSN from W9;
 For China – registration number (old);
 For Italy – Fiscal code;
 For France – Siret number

Tax number 2 - For US vendors populate EIN from W9.
 For Additional Tax number for reporting to the tax authorities (Country Specific).

For the US SSN or EIN is mandatory unless it is a W9 exception. Missing SSN or EIN can be added, but if a company has changed its registration number a new account should be created and the old one inactivated.

Tax number 3 - For China - registration number (new).

Tax number 5 - For China – registration number for natural persons.

Fiscal address - If ZLEG (Legal Address Vendor) record is created, it should be linked to the main vendor – ZLEG account number in the Fiscal address field. Currently is not used.

VAT Reg. No. For EU vendors, populate VAT registration number (all VATs to be preceded by country code). In case a company is registered in several countries we can maintain more than one VAT registration number using the "Other" option. There should not be more than one VAT for one country. If the VAT number is missing it can be added, but, if the company has changed its VAT number, new account should be created and the old one inactivated.

Industry - Strategic – 0001;
 Non-strategic – 0002;
 Sensitive – 0003.

(If not specified in the checklist, please use 0002 - non-strategic for regular vendor setups and 0003 – sensitive for employees)

SCAC - Populated only for US Forwarding Agents/Carriers with standard Carrier Access Code (SCAC)

Stat. gr. Service - Refers to a statistics group for transportation service agent to determine transportation/logistics data.

Should be defaulted to: '01' - Relevant for statist for all Forwarding Agents (Commodity codes – FREIGH, FRLEAS, FSTPLO, FSFMSV);

'02' - Not rel. for statist for all other vendors.

NOTE: Please forward W9 forms to **Janis Zvaigzne** (cc Martin Bright) in all cases, except the following:

- if company is a Raw Material supplier;
- if "Corporations" or "Incorporations" is checked on the W-9 form;
- Box is checked next to "Limited liability company", but in the comment is letter "S" or "C" = Corporation.

At the beginning of a new year a report with all 1099 reportable suppliers will be provided to Accounts Payable team.

Payment Transactions. Setting up banking details.

If a different vendor number has to be used for remittance information banking details should be added only for ZINV account.

Ctry- Enter country code of the banking details

Bank Key

US	ABA	Routing number (9 digits)
Canada	CSA	Transit number (5 digits) + bank code (3 digits)
Europe	Bank key, sort code, BIC...	See Appendix 1

NOTE! If routing number for US validates as Joint UPIC Account the bank name should be JOINT UPIC ACCOUNT.

Bank account Account number (For more details see **Appendix 1**). For Belgian accounts the format should be as follows 3 digits-7 digits-2 digits.

BankT 0001 for default banking details, for the other 0002, 0003 etc. This option is used if the vendor is using different accounts simultaneously. If a bank account will not be used anymore the line with the outdated banking information should be removed.

Change Documents

You can check and adjust the banking details by pressing . Please check if SWIFT, ABA and Bank name is correct before proceeding to the next view.

If there are no banking details available for the Banking Key used, you will be requested to populate the following fields:

Bank Country - Country of the Bank. Will be populated automatically.

Bank Key - Bank key/Sort code for Europe, ABA for US, CSA for Canada. Will be populated automatically.

Bank Name - Name of the bank. Do not use commas or any special symbols in the name. Mandatory field.

Region - State for US and Canada, county for UK etc. Optional.

Street - Street of the Bank. Optional.

City - City of the Bank. Optional.

Branch - Bank Branch. Optional.

SWIFT/BIC - Mandatory for European banks and for international transactions (for US banks as well). If SWIFT ends in "22" or "XX" Payment team should be contacted to clarify the full SWIFT.

NOTE: Creation of new bank codes can be accessed through transaction code **FI01** and editing through **FI02**.

Partner Functions

Change Vendor: Partner functions

Vendor: 11001001 Industrial Engineering Services Wrexham
 Purchasing Org.: CP01 Central Global P Org

P..	Name	Number	Name	D..
OA	Ordering address	11001001	Industrial Engineering Services	<input type="checkbox"/>
VN	Vendor	11001001	Industrial Engineering Services	<input type="checkbox"/>
PI	Invoicing Party	11001333	Industrial Engineering Services	<input type="checkbox"/>
				<input type="checkbox"/>

These fields define additional rights and responsibilities of each partner in a business transaction.

OA - Ordering address: usually is the same as SAP number we're creating. This address can also be set up under ZOAD account group. Please note that ZOAD account group maintains only the address used for placing purchase orders.

VN - Vendor is always defaulted to the SAP vendor number we're creating. This vendor number is usually used for placing Purchase Orders.

PI - If the vendor remittance address matches the main address then the invoicing party is the same as the vendor number we're creating. If company's remittance address is different, it is created as a separate invoicing party ZINV and linked to the main vendor in the Partner Functions screen. Please note, only ONE invoicing party can be populated on this screen. Before removing Invoicing party, make sure, that there are no open invoices.

Important!!! In case if a separate invoicing party ZINV is added and linked to the main ZVEN vendor, *company code Data* need be blocked for ZVEN account, as invoices will be processed through ZINV vendor.

Commodity Code

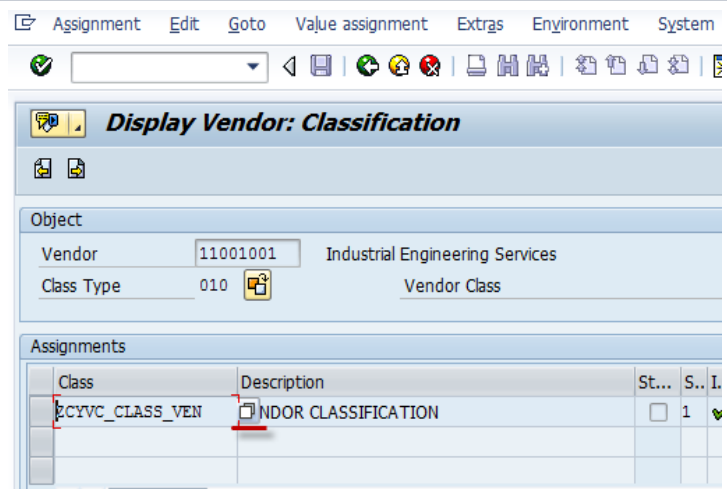

Commodity code - In the field of Value add commodity code. This is mandatory field and should have the same value for all company codes vendor is opened for. Using this field you can determine vendor type (Direct spend, Indirect spend non-PO, Indirect spend – PO). (List of commodity codes can be found in **Appendix 7**).

How to add Commodity code:

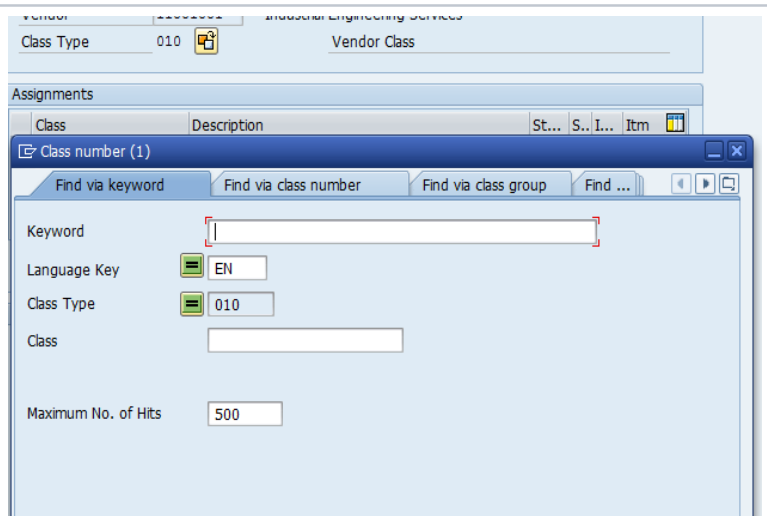

Go to Environment/Classification

Press the button 

The Class number screen will appear. Press ENTER.

Press ENTER again.

Display Vendor: Classification

Inactivating a vendor

There are several cases when vendor inactivation might be necessary:

- Supplier has gone out of business;
- We are no longer in business with the supplier;
- Registration number change has taken place;
- Account is a duplicate.

There also might be cases when vendor needs to be blocked/marked for deletion only for specific company code or purchasing organization:

- Supplier has been incorrectly opened for P.Org.;
- Supplier has been opened for incorrect company code;
- Separate remit-to party has been added for the main account, and main account should cease to serve as invoicing party.

Note!: It is safe to put purchasing block after PI party has been updated in open PO's, but Deletion flag can only be put after every open item is cleared.

Note!: Please remember to inactivate Returns vendor as well. Create a ticket for DM RIGA Customer Master Team stating in the ticket replacement vendor account (in case of new creation), old vendor account, returns vendor account and original FD ticket.

Note that as per SWAP project, Toulouse and Mondovi sites are under responsibility of Lisbon AP and Provisioning Teams. Other sites are being operated here in Riga. Detailed list of SWAP affected CC can be found [here](#).

Steps for the inactivation

After approval for inactivation of the vendor account has been received please follow the steps below. Please note that we cannot inactivate the account until all open items have been cleared.

1. Check for open items ([Chapters 9.2-9.6](#)):
 - a. PO's (ME2L)
 - b. PIR's (ME13)
 - c. Contracts (NME33K)
 - d. Invoices (FBL1N)
 - e. WorkFlows ([Sharepoint](#))
2. If there are **no open items** proceed with the inactivation as described in [9.7 Vendor inactivation \(blocking and marking for deletion\)](#) and inform Provisioning and AP teams.
3. If there are **open** items please contact AP/ Provisioning/Data teams asking them to move or update open items.

In case replacement account has been created please use the template below:

"Dears,

New account #123456 NEW VENDOR NAME has been created in order to replace #654321 OLD VENDOR NAME.

Dear Procurement team,

Could you please move the open items [PO's] to the #123456 NEW VENDOR NAME or, if not possible, update the PI party of the open PO's from #654321 OLD VENDOR NAME to #123456 NEW VENDOR NAME?

Please let us know whether the PO's have been moved or updated.

Dear AP,

Could you please move invoices, if needed from #654321 OLD VENDOR NAME to #123456 NEW VENDOR NAME?

Please let us know whether the invoices have been moved or will they remain on the old account until processed."

4. Based on the response from the teams please take the following actions:
 - a. PO's are not moved and there are open invoices – apply purchasing block and deletion flag for specific company codes
 - b. No PO's and there are open invoices – apply purchasing block and deletion flag for specific company codes
 - c. PO's are not moved and there are no open invoices – make sure that PO's have been updated with the new PI party and apply purchasing block and posting block
 - d. Non-PO supplier with open invoices – apply deletion flag for specific company codes
5. In case you are left with some pending open items please
 - a. For open PO's check whether they have been processed monthly
 - b. For open Invoices check whether they have been processed based on Net due date

Check for open PIR's (ME13)

In order to see only open PO's, you can choose /DM_OPEN layout.

In case there are any open PO's please contact the procurement team and ask them to either move open PO's or update them with the PI party of the replacement vendor (if applicable):

- If PGr (Purchasing Group) is GEU or GNA contact Riga Provisioning Team by FD group: PTP Provisioning Riga
- If other PGr contact:
 - Responsible planner = PO creator.

If the open PO's are not going to be moved please:

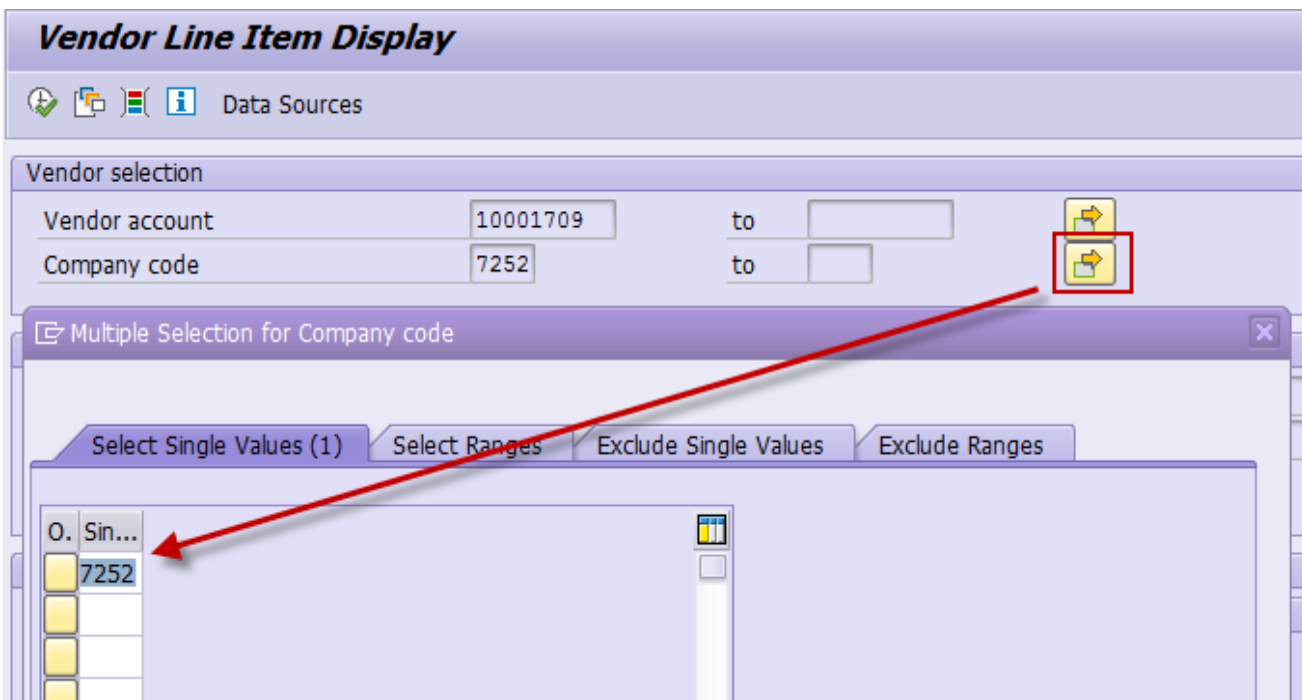

- Make sure that the PO's have been updated to the PI party of the replacement account;
- Apply "Purchasing block". This will enable goods receipt, but will prevent new PO creation;
- Check regularly (monthly) whether the open items have been processed.

Note! In case provisioning needs to update some details afterwards the purchasing block can be temporary removed.

Check for open Invoices (FBL1N)

Use transaction **FBL1N** to check for open invoices.

Populate the number of the vendor and all company codes the vendor is open for.

Checkmark **Open Items** and all **invoice types**, to make sure that all open items are displayed.

In case you receive any return form the system it means that there are invoices pending payment. Here you can check the due date for the invoice as well.

Vendor 10001709
Company Code 7252

Name Manutan
City Gonesse

St	Assignment	DocumentNo	Type	Doc. Date	S	DD	Amount in local cur.	LCurr	Clrng doc.	Text	Net due dt
<input type="checkbox"/>	<input checked="" type="radio"/>	20180809	5100001748	RE	31.07.2018		143,64-	EUR			31.08.2018
*	<input checked="" type="radio"/>						143,64-	EUR			
** Account 10001709							143,64-	EUR			

In case there are any open invoices please contact AP team and ask them to move the invoices to the replacement account, if required. FD ticket should be created to AP Team for group: PtP AP Riga, but for Toulouse and Mondovi sites it should be PtP AP EMEA Team.

In case invoices could not be re-posted on the replacement account, please apply deletion flag for specific company code and check whether they have been cleared after the net due date.

Note! Payment runs are happening on Monday and Thursdays. This means that the invoice will be cleared on the first Monday or Thursday after the net due date.

Check for open Workflows (Sharepoint)

There might be some invoices not yet posted in SAP, but already has workflow initiated in SharePoint. Go to Accounts Payable SharePoint page [here](#) and go to "Invoices" section.

Look for invoices based on vendor number.

Vendor Code = 10001137 And Select Column = Or Select Column = 🔍 ✖

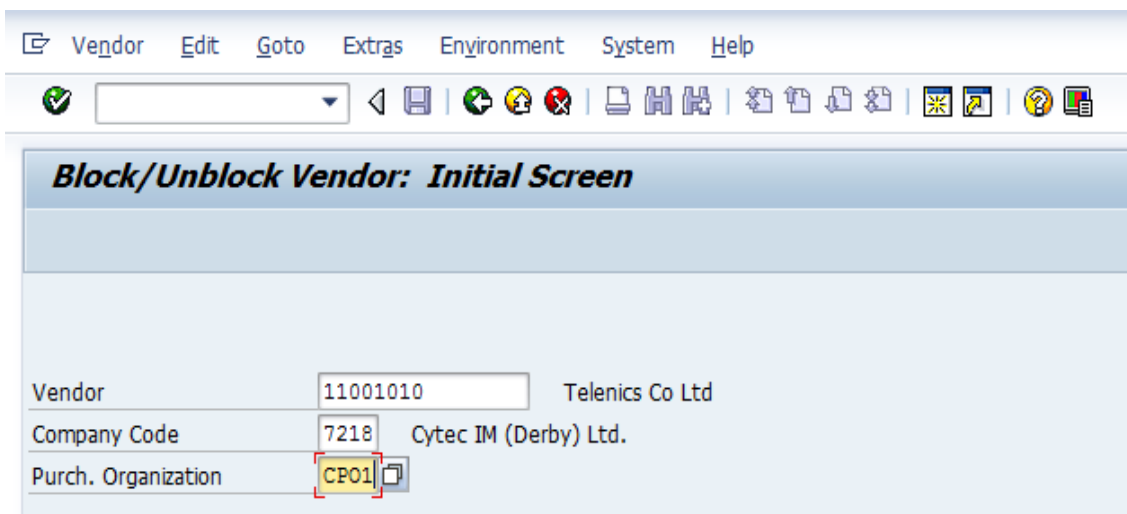

Invoices

	SSC Operator	Invoice Status	Vendor Name	Vendor Code	Invoice Number	Legal Entity
    	Liepkalne, Liga	Waiting for Approval Decision	Amb Training	10001137	AMB001233	218
    	Liepkalne, Liga	Completed	Amb Training	10001137	AMB001180	218

In case you see any entries with invoice status other than "Completed" or "Duplicate Invoice" please check whether the invoice information matches the replacement account and inform AP team to post the invoice on the new vendor account, FD ticket should be created to AP Team for group: PtP AP Riga, for Toulouse and Mondovi sites it should be PtP AP EMEA Team, cc'd SSC Operator.

Vendor inactivation (blocking and marking for deletion)

In order to block vendor in the main menu select transaction code XK05 hit enter enter vendor code **Company code**. In case of vendor needs to be deactivated in Purchasing area, **Purchasing Org** should be marked as well:

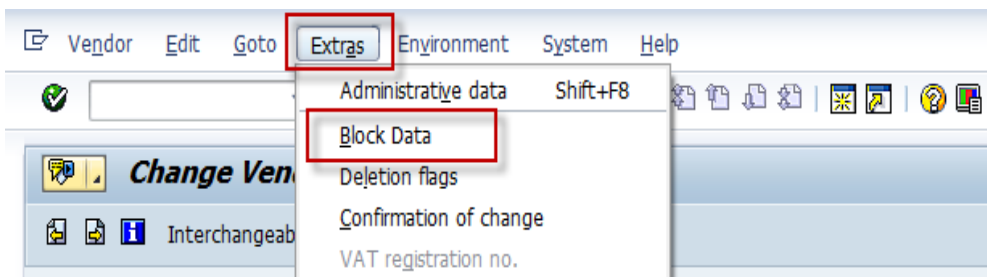

Vendor 11001010 Telenics Co Ltd

Company Code 7218 Cytec IM (Derby) Ltd.

Purch. Organization CPO1

Alternatively this transaction can be accessed through transactions XK02 or XK03. After entering vendor account go to Extras **Block Data**

Appendix 11 – Additional data check for vendor "Customer with a negative balance".

When vendor is created, go to Customer master data, use transaction code XD02. Enter customer number, company code:

Hit Enter:

Change Account Group

Vendor: 10000106 Federal Express
 Acct Group: ZINV Invoicing Party

... when changes made to acc. grp, this is to be maint. for

Co...	Company Name	Pu...	Description
1237	Sec IM (OK) Inc		

Number of entries: 1

Hit Enter and add new account group:

Vendor: 10000106 Federal Express

Change Account Group

Vendor: 10000106 Federal Express
 Vendor account group: ZINV Invoicing Party
 New account group: ZVEN

You should receive Warning message about account group change:

Warning

Caution: partner determination procedure will change from to ZL1 on POrg level

New entry

Hit enter and add purchasing data, according to Work Instruction.
 If previously this vendor was a non-PO vendor; don't forget to change commodity code.

Appendix 13 – Locations and plants

Appendix 14 – Process Specifics for Vendor Master

TYPE of SETUP/CHANGE	APPROVAL REQUIRED?	REQUIRED DOCUMENTATION
PO vendor creation/ reactivation (Direct/ Indirect Spend) (ZVEN)	Data Steward (Procurement)	Checklist; letterhead; W9 for US suppliers
Non-PO vendor creation/ reactivation (ZINV)	Data Steward (Finance)	Checklist; letterhead; W9 for US suppliers
Employee creation (ZEMP)	Data Steward (T&L)	Checklist
Intercompany creation (ZINT)	Data Steward (Finance)	Checklist, can also accept e-mail
PO vendor extension (Direct/Indirect) (ZVEN)	Only notify Data Steward (Procurement)	
Non-PO vendor extension (ZINV)	Only notify Data Steward (Finance)	
Commodity code change for a non-PO vendor (ZINV)	Data Steward (Finance)	
Commodity code / INCO terms change for a PO vendor (ZVEN)	Data Steward (Procurement)	
Banking info	no approval is required	Letterhead, followed by outbound procedure
Contact details / currency	no approval is required	
Language changes	no approval is required	
PO vendor inactivation (Direct/Indirect)	Data Steward (Procurement)	
Non-PO vendor inactivation (ZINV)	Data Steward (Finance)	
Payment method change	no approval is required	
Reconciliation Account change	no approval is required	
Name and/or Address changes (if it does not require creating a new vendor)	no approval is required	Letterhead; W9 for US suppliers (in case of a name change)
Tax code/ VAT change for a PO vendor	Data Steward (Procurement)	Checklist; letterhead; W9 for US suppliers (<i>a new vendor needs to be set up, old vendor needs to be inactivated</i>)
Tax code/ VAT change for a non-PO vendor	Data Steward (Finance)	Checklist; letterhead; W9 for US suppliers (<i>a new vendor needs to be set up, old vendor needs to be inactivated</i>)
New Invoicing party creation (ZINV) and linking it to the ZVEN account	no approval is required	Checklist; letterhead
New Ordering address creation (ZOAD) and linking it to the ZVEN account	no approval is required	Checklist or an e-mail with the new ordering address
Payment terms change for a PO vendor (ZVEN) (if new terms are less favorable to Solvay)	Procurement Director	
Payment terms change for a non- PO vendor (ZVEN) (if new terms are less favorable to Solvay)	Data Steward (Finance)	
Creation of a "duplicate" PO vendor due to different currency	no approval is required	

Creation of a "duplicate" PO vendor due to additional ordering address	no approval is required	Checklist or an email with the new ordering address.
--	-------------------------	--

** given the possibility that the request might come from a different party - other than the Data Steward

Appendix 15 – Locating correct Transportation Zone

When new vendors or customers are set up, a transportation zone (t-zone) needs to be assigned to its address master data. The only real need for the t-zone is to determine the proper route and transit time for outbound shipments to customers (they serve no similar purpose for inbound deliveries from vendors).

Since routes are not more specific than a day, as long as we can derive the correct number of transit days, the requirement is met. Consequently, we are now taking the approach of using existing t-zones wherever possible from other business partners who are located fairly close (within a few hours away).

Also important in determining the need for a new t-zone is to insure that the proper route determination is in place if the business partner is a customer.

Finding the correct t-zone

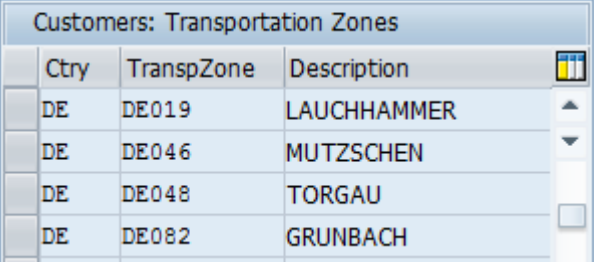

Criteria:

- Same country
- Within a few hours transportation time by road

Steps:

1. First identify what the vendor's t-zone would be under the original Project GO configuration rules.
2. Try to locate this t-zone among the existing ones using **ZTZONE** transaction or you can search (F4) on the t-zone field of the vendor master.
3. Find the existing t-zone code that is most similar to the desired code. *For example*, t-zone DE047 (DOEBELN GERMANY) is the desired code (FD ticket 964458), but it does not exist.

Display View "Customers: Transportation Zones": Overview

Ctry	TranspZone	Description
DE	DE019	LAUCHHAMMER
DE	DE046	MUTZSCHEN
DE	DE048	TORGAU
DE	DE082	GRUNBACH

4. Once you have identified a potential code, determine the actual distance between the cities of the t-zones. Google is helpful for that.

Google

DOEBELN GERMANY to TORGAU GERMANY

From Döbeln, Germany
To Torgau, Germany

56 min (59.2 km) via S24

Directions

5. Since Google indicates these two towns are less than an hour apart, DE048 is acceptable to use instead of setting up a new code for DE047. For vendors since there are no route implications, any existing t-zone within 12 hours should be acceptable as long as the country code is the same.

6. In case no applicable t-zone cannot be located open a ticket to COE_SD group indicating:

- a. t-zone code;
- b. whether the code is required for vendor or customer;
- c. original requester;
- d. address;
- e. roles for which the vendor will be used.

Appendix 16 – Carrier calendar table

When new carrier vendors are set up, if they will deliver outbound goods, they need to be added to the carrier calendar table which defines the days of the week that the carrier can pick up goods at all applicable plants to be used to determine availability dates in sales orders.

Request:

- Carrier's available pick up days;
- Plant, from which the goods will be picked up.

Be sure you can translate pick-up days into the correct factory calendar code before entering a new record in the table.

- The t-code for maintaining the table is ZZ_DEL_DAT
- The table updated is ZTC2C_DEL_DATE

Using the t-code specified above, enter a new record in the table by Selecting New Entries. Enter the proper plant(s) applicable to this carrier. These could be a single plant or any/all plants for the company for which the vendor was established.

Changes/additions to factory calendars (including the setting of holidays by country for each year) are configuration changes which are transports from Dev to QE to PE. If these types of changes are required, please open a ticket for COE_SD.

Appendix 17 – Workcycle Management

Once a SharePoint Workcycle is received it will automatically create Freshdesk ticket:

Dear Cytec, Datamanagement,

Please take action on a vendor invoice recently received by the Cytec Global Business Services. This invoice cannot be processed without your feedback/approval.

Action Requested: Vendor Data Management

Links:

To see Attachments, please click this link: [Clickhere](#)  [View invoice](#)
 To take action, please click this link: [here](#)  [Open Workcycle](#)
 To view your open tasks click this link: [click here](#)
 To see an image of the invoice, please click this link: [click here](#)
 To see Invoice Properties: [click here](#)

Comments: Hello, Can you please update 10002258 vendor's bank account? Thanks, Tiago  [See request without opening the Workcycle](#)

To add an attachment to the history of this invoice, please attach your file to this message and forward the Email to the person who assigned the task. This task was assigned by: Neves, Tiago(**User Name: EUA\neve2324**)

Invoice Number: 11037748/D

Vendor Name: Autostrade Per L Italia S P A

Vendor information

Vendor Code: 10002258

Note: This is an auto-generated Email. Do not respond to this Email. Email replies cannot be delivered.

If this invoice was incorrectly assigned to you, please click on the Take action link above, open the task associated to the invoice and reject the task including explanatory comments. If you know the person whom the invoice belong to, please add his/her name within your comments.

For issues/questions about invoices, please call the Cytec Global Business Services:
 Phone: +371 67118977

Make the necessary actions and close the Workcycle.

Please review the Vendor Information
