What Is Digital Signage Content in Solvay?

The simple notion of content is anything displayed on a screen, including text, images, animations, video, and audio. However, "content" can also refer to the collective result of combining various media to tell a story. Here it's about the overall experience imparted to the target audience. Content is what entices employees or visitors to stop, captures their attention and engages them, and collects information for business insight.

Overall purpose for using Digital Signage in Solvay :

✅ Knowledge sharing	✅ Company Memos for Recognition
