

Display a dashboard in Shiftconnector

From the Inetsoft home page, open the dashboard you want to embed in Shiftconnector and click on the *Share* button and then *Copy link*.

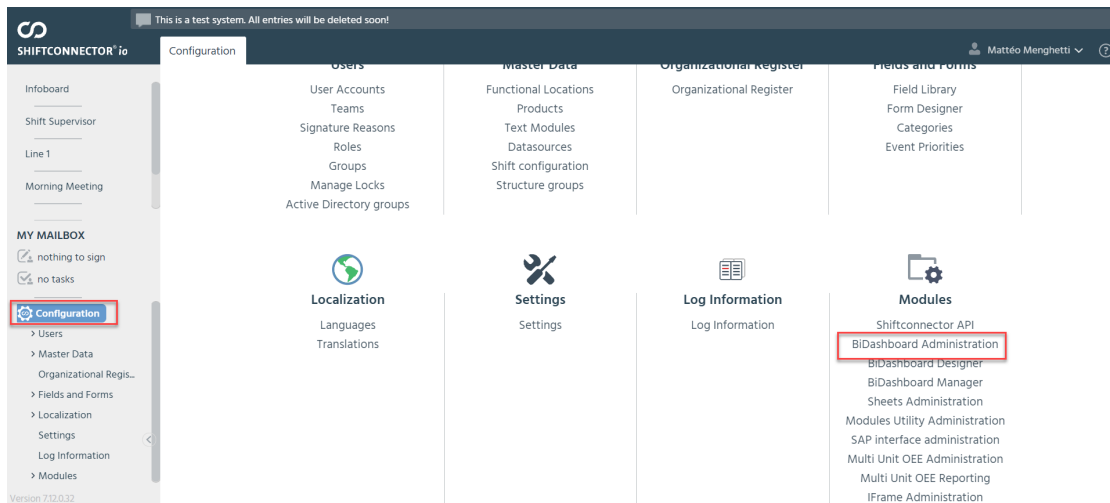

A pop up will appear and you can copy the url which will write as follows:

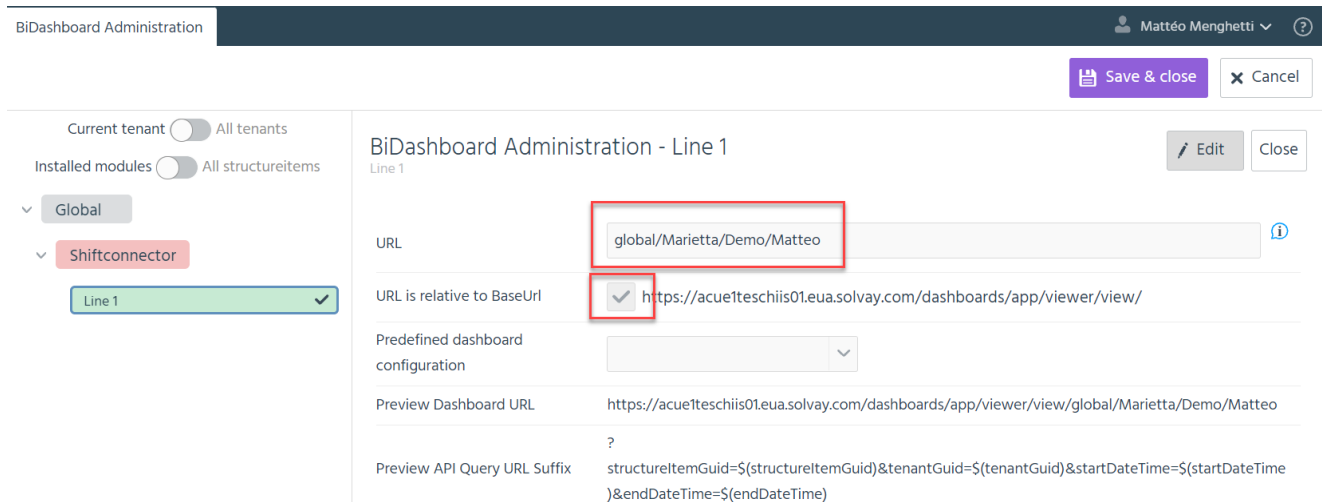

<https://inetsoft-url.eua.solvay.com/dashboards/app/viewer/view/global/Marietta/Demo/Matteo>

Copy the bold part of the url highlighted in red (starting with *global*).

Go to *Shiftconnector*, enter the *configuration* menu and click on *BiDashboard Administration*.

Select the structure item where you want to display your dashboard. Paste the url that you copied before in the *URL* section and check the *URL is relative to baseUrl*.

Now your dashboard should appear as a separate tab in the desired structure item.

The screenshot displays a dashboard interface for 'SHIFTCONNECTOR io'. At the top, a dark header contains the logo, a notification 'This is a test system. All entries will be deleted soon!', and navigation tabs for 'Events 0', 'Tasks 0', 'Instructions 0', and 'BiDashboard'. The user 'Matteo Menghetti' is logged in. A left sidebar lists navigation items: 'Infoboard', 'Shift Supervisor', 'Line 1' (highlighted), 'Morning Meeting', 'Search', 'Tool improvements', and 'MY MAILBOX' (with sub-items 'nothing to sign' and 'no tasks'). The main content area features a 'BATCH LIST' chart showing a Gantt-style view of tasks. The y-axis lists task IDs: 170-1237-21-, 170-1239-21-, 170-1241-21-, 170-1243-21-, 170-1245-21-, 170-1247-21-, 170-1249-21-, and 170-1251-21-. Each task is represented by a blue bar. A legend on the right, titled 'Measures', shows 'Min(start_dashboard)' as a white square and 'Max(end_dashboard)' as a blue square.

Task ID	Start Dashboard	End Dashboard
170-1237-21-	0	1
170-1239-21-	0	2
170-1241-21-	0	3
170-1243-21-	0	4
170-1245-21-	0	5
170-1247-21-	0	6
170-1249-21-	0	7
170-1251-21-	0	8
