

Digital Signage - Supported Image & Video Formats

Digital Signage - Supported Image & Video Formats

Supported Image Formats

- ✓ Minimum quality : 72dpi
- ✓ Using **low-resolution images** will resort in pixilation & distortion

- ✓ **PNG-24** is the **preferred format** for best results

- ⚠ **JPEG** is **not suitable** for images with text, large blocks of colour or simple shapes as crisp lines may appear blurry

Supported Video Formats

- ✓ Minimum : 720p (1280x720 pixels) at 30 frames per second
- ✓ **Preferred : 1080p** (1920x1080 pixels) at 30 frames per second

- ✓ MPEG-4 Part 2 or Part 10/H.264 codec

- ✓ WMV 9, VC-1 (Simple or Main profile)

Library

These Images & Videos are **stored** in **Library** as to streamline the process:

- Documents are organised in a library (images, videos,...)
 - Shared
 - Private
- **Different libraries levels with access control**
 - Corporate library
 - Common library
 - Shared with me library
 - Non-shared library (with specific content)
