# Digital Signage - Display in Solvay

## Digital Signage - Display in Solvay

**At the heart of every great digital signage display is the content. Make it look good and people will stop to look at it.**

**The digital signage is a push only communication tool.**

| Content cannot be displayed | Content can be displayed |
|---|---|
| ⚠ No Video LiveStream | ✅ Web Pages, Social Media, RSS Feed in full page |
| ⚠ No feedback / Reactions (“likes”, ….) | ✅ Google Spreadsheet, Google Presentation, Meeting rooms Schedule |
| ⚠ No interaction can be done with the users | ✅ Awesome table, Dashboards, Specific QlikSense card for Solvay |
| ✅ Generally speaking the content is always displayed with NO sound | |

### Digital Signage Solvay - Default Template example :

**★ Displaying content full screen with no widgets is used as a default template.**

### Digital Signage Solvay - Optional Template example :

**⊕ In optional template, additional features (weather forecast, maps, etc…) can be added.**
