Objective and Scope

This document describes the process the link creation between vendor and Company, Purchasing Organization, Plant, Partner and PI1 system.

This procedure specifies the role of Vendor Master Data and the systems involved (PF1_020, WP1_400 and PI1_020).

General Principals

Requesters	The requester is responsible for sending these requests to D&A Team mailbox ptp-data.analysis@solvaysbs.freshdesk.com or via Vendor Workflow Request.
Data Operations Team	<p>D&A Team is responsible for receiving the request from the requesters and update vendors MD accordingly.</p> <p>Before proceed with the request, the person who do so must perform all the necessary checks in order to avoid duplicate vendors set up on the system.</p> <p>It is under Data Team responsibility to check whether all the required information to set up a vendor account was provided.</p> <p>Once the request is completely processed, Data Team has to inform the requester of the completion of the request.</p>

Company code view

The link between a vendor and a company code is performed without approval.

The transaction used is **XK01** or **FK01**.

NOTE 1: When extending a vendor at accounting level, we take as reference the values by the following order:

1. Requester
2. Reference company code, that should be added in the "Reference Company code"
3. Standard values

NOTE 2: In the PI1 system only the company code 0231 is maintained by the Data Team.

Accounting Information Accounting

Accounting Information

- **Reconciliation Account** (*mandatory*)

The reconciliation account in G/L accounting is the account which is updated parallel to the sub ledger account for normal postings (for example, invoice or payment). When not created a ticket must be passed to the RtR team (RtR Intercompany Group).

- By default for the **PF1_020** system the account is:
 - 2300000000 - Trade payables (Z*10, ZZPE)
 - 2486010000 - Other sundry liabilities-statement of expenses (ZZPE)
 - 2489101000 - Misc other cred CICC-power to effect payment (ZZCD)
- For the **WP1_400** system:
 - 40100100 - AP-TP-TRADE-RECONCILIATION ACCOUNT (Z010 and Z011 vendors)
 - 42100300 - STAFF-DEBIT ADVANCE ON EXPENSES (Z012 vendors)
 - 42900300 - STAFF-CREDIT EXPENSES PAYABLE-REC. ACCOUNT (Z012 vendors)
- And for the **PI1_020** system:
 - 2300000000 - Trade payables

- **Sort Key** (*mandatory*)

Indicates the layout rule for the Allocation field in the document line item.

- By default for the **PF1_020** system the account is:
 - 009 - External doc.number (Z*10, ZZCD)
 - 002 - Doc.no., fiscal year (ZZPE)
- For the **WP1_400** system:
 - 001 - Posting date (Z010, Z011 and Z012)
- And for the **PI1_020** system:
 - 009 - External doc.number

- **Head office**

This field contains the account number of the master record for the head office account.

You specify this account number only for branch accounts (examples: ZD15, ZA15). Items that you post using the branch account number are automatically posted to the head office account.

The link of a branch to a company code foresee the link of the same company to the headoffice vendor.

- **Cash mgmnt group**

In cash management, customers and vendors are allocated to planning groups by means of an entry made in the master record.

- By default for the **PF1_020** and **WP1_400** system the account is:
 - A1 - Domestic Domestic payments (A/P)
 - A2 - Foreign Foreign payments (A/P)
 - A5 - Personell costs (ZZPE)
 - A7 - Financial vendors (ZZCD)
- For the **PI1_20** system:
 - BEVCICC - CICC vendor
 - BEVNAFTA - NAFTA vendor

- **Release Group**

The code release group classifies the vendor.

- By default for the **PF1_020** system the account is:
 - Z003 - Miscellaneous creditor FI (ZZCD)
 - Z004 - Self invoicing
 - ZZZZ - Normal vendor

Reference data

- **Personnel number**

The personnel number is the only feature within a client which is unique to an employee (PF1 and WP1). You have to enter a personnel number before you can display and maintain an employee's master data and time data.

Payment Transactions Accounting

Payment data

- **Payment Terms** (*mandatory for WP1_400*)

Key for defining payment terms composed of cash discount percentages and payment periods. These field is specific linked to the Financial Accounting.

- The code must be provided by the request and if not must be equal to the information inside the Purchasing Organization.

- **Check double Invoice** (*mandatory*)

When incoming invoices are entered or when memos are entered in Financial Accounting (FI), the system checks whether an invoice or credit memo has already been entered for the same date.

Automatic Payment Transactions

• Payment Method (*mandatory*)

List of payment methods which may be used in automatic payment transactions with this customer/vendor if you do not specify a payment method in the item to be paid.

- For the **PF1_020** system the account is:
 - 2 - Confirming (it is the bank that advances the money to the supplier and we pay the bank)
 - 3 - Foreign bank transfer
 - 5 - Direct debit
 - 6 - Sepa credit transfer
 - D - WIRE crossborder transfer
 - H - Domestic transfer

NOTE: For cc 3438, 3443, 5735, 5736 and 6330 in a domestic transfer the method H is selected + "individual payment" should be activated.

For cc 3438, 3443, 5735 and 6330 in a foreign transfer the method 'HD' is selected + "individual payment" should be activated and for cc 5736 the method is 'H6D' with the same flag in the field "individual payment".

- For the **WP1_400** system:
 - P - Prélèvement (direct debit)
 - T - Bank transfers
 - V - Dom. Bank Trf.
 - Z - SEPA Credit transfer
- For the **PI1_20** system:
 - 6= - Sepa credit transfer plus Foreign transfer BE

NOTE 1: A request to update a payment method to the option DIRECT DEBIT must be forward to the CICC online. It can be use the canned response "Direct Debit Process". If requested by Larissa Duval it can be updated.

Even if the vendor already has Direct debit for one company, if asked to another company, the procedure is the same.

From the DIRECT DEBIT to other payment method must be checked by the SC Payments team (to avoid duplicate payments).

NOTE 2: A request to update a payment method to the option CONFIRMING or from the CONFIRMING to other payment method must be confirmed by the buyer (person who negotiates the contract) and then checked by the SC Payments team (to avoid duplicate payments).

• Payment Block

Block key that is used to block an open item or an account to payment transactions.

- * - Skip account / Blocked for payment

• House Bank (*mandatory for PF1_020*)

The key for the house bank is used if the vendor is always to be paid by the same house bank.

- By default for the **PF1_020** system the account is:
 - FACT - Factoring Transfer

• Individual Payment

If this indicator is set, every vendor open item is paid separately during automatic payment transactions. This means that open items are not grouped together for payment.

Correspondence Accounting

Correspondence

- **Acct w/ vendor:** This field contains the company listed under the vendor.
- **Clerk Abbrev.:** Name of the Accounting Clerk, it is used whenever a [company](#) is not linked to PI1 (the payments are done in the local system).
- **Clrk's internet :** used to send payment advises:
 - PI1_020: regular vendors;
 - WP1_400: PAX vendors.

Is possible to add more than one email address, they should be separated by a blank space.

Withholding Tax Accounting

Tax Information

In some countries, an additional country is needed for calculating or reporting withholding tax (ex.: France and Italy)

Manual update

- Before the link a check in the **SM30-ZZM_EXIT_VENDORS** (PF1_020) or **SM30-ZWPUT106** (WP1_400) must be performed to confirm if the information is available there. If not, please add the company to this table.

Normally the link to the company is automatically performed during a Purchase Order creation.

- To link the vendor to a company it needs to be filled in the vendor number and company code. It can be used a reference to copy all the data.

Create Vendor: Initial Screen	
Vendor	406192502
Company Code	0270
Account group	
Reference	
Vendor	400001001
Company code	0270 SOLVAY CHIMICA (IT)

- Then, fill the mandatory fields:

Change Vendor: Accounting information Accounting			
			Certificates Factoring Master Data
Vendor	406192502	GUGLIELMI GABRIELLA	CASTELNUOVO DELLA ...
Company Code	0270	SOLVAY CHIMICA (IT)	
Accounting information			
Recon. account	2300000000	Sort key	009
Head office		Subsidy indic.	<input type="checkbox"/>
Authorization		Cash mgmnt group	A1
Minority indic.	<input type="checkbox"/>	Release group	ZZZZ
		Certificatn date	

Change Vendor: Payment transactions Accounting			
			Certificates Factoring Master Data
Vendor	406192502	GUGLIELMI GABRIELLA	CASTELNUOVO DELLA ...
Company Code	0270	SOLVAY CHIMICA (IT)

Alternat.payee		House Bank	FACT
Individual pmnt	<input type="checkbox"/>	Grouping key	
B/exch.limit			EUR
Pmt adv. by EDI	<input type="checkbox"/>		

With.t.t...	W/tax c...	Liab...	Rec.ty	W/tax ID	Exemption number	Exem...	Exmpt...	Exe
20	20	<input checked="" type="checkbox"/>						
		<input type="checkbox"/>						
		<input type="checkbox"/>						

NOTE 1: When received a request to flag the field Individual Payment first the request needs to be passed to the PtP SC Payments team. If confirmed there, it is added in the P11 system or in the local system.

NOTE 2: When requested to block a vendor for payments the option "*" must be used (PF1 and WP1). The number of the request should be added in **Extras_Texts_Accounting note** in order to be possible track when and who has requested the block:

S L.	Description	1st line
	Accounting note	
	Information on withholding tax	
	Factoring - Manual exception	

To unblock: The person responsible for the block should be informed about the request to unblock and should confirm if the block can be removed. If no info available in the Accounting Note, the site buyer must be contacted.

NOTE 3: The standard payment terms are **Y030**.

Purchasing Organization view

Purchasing data

The link between a vendor and a Purchasing Organization is performed with approval (list of [Panel Managers](#) can be found in the Purchasing Service Line portal).

The transaction used is **XK01** or **MK01**.

NOTE: The link should be performed using the tool Vendor Workflow Request. In the situations where the vendor is already linked to other P. Organizations we can perform the link manually but the Payment Terms must be equal to the ones on the other P. Organizations.

When extending a vendor at purchasing level, we take as reference the values by the following order:

1. Requester
2. Reference purchasing org., afterwards the requester must be informed about which purchasing org. has been used as reference and with which payment terms/currency.
3. No standard values defined

EXCEPTION: The link can be performed manually in the vendors marked with LOG (Logistic vendors). The Panel Manager approval is needed.

Conditions

- **Order currency (mandatory):** Key for the currency on which an order placed with a vendor is based.
- **Terms of Payment (mandatory):** Key for defining payment terms composed of cash discount percentages and payment periods. The list can be found in the [Purchasing Service Line](#).
- **Incoterms (field 1 is mandatory):** Commonly-used trading terms that comply with the standards established by the International Chamber of Commerce (ICC).
- **Minimum order value:** Minimum value specified for purchase orders issued to the relevant vendor.

- **Pricing Date Control:** Determines which date is to be used for price determination (pricing) purposes.

Sales data

- **Salesperson:** Responsible Salesperson at Vendor's Office.

Control data

- **GR-Based Inv. Verif.:** Indicator specifying that provision has been made for goods-receipt-based invoice verification for a purchase order item or invoice item.
- **AutoEvalGRSetmt Del.** (Evaluated Receipt Settlement - ERS): Specifies that evaluated receipt settlement (ERS) or the automatic generation of invoices according to an invoicing plan is to be possible in relation to materials supplied or services performed (respectively) with regard to this vendor or this document item.
NOTE: This option is not available in the tool Vendor Workflow Request. It is used to create a Self billing vendor and this type of action needs to be performed manually.
- **AutoEvalGRSetmt Ret.** (Automatic evaluated receipt settlement for return items): Indicates that automatic evaluated receipt settlement of return items is possible for this vendor or this document item.
- **Acknowledgment Reqd** (Order Acknowledgment Requirement): Determines whether the purchasing document (purchase order, outline purchase agreement, etc.) is to be acknowledged by the vendor (ex.: ticket 3714303).
- **Automatic purchase order** (Automatic Generation of Purchase Order Allowed): Allows you to automatically generate purchase orders from purchase requisitions if the requisition has been assigned to a vendor (source of supply).
- **Doc. index active:** Subsequent settlement: Indicates that a document index is allowed for purchase orders issued to this vendor. The index is used for determining the relevant purchasing documents affected by changes to conditions offered by the vendor.
- **ModeofTrnsprt-Border** (Mode of Transport for Foreign Trade): Identifies the mode of transport (for example: road, rail, or sea) by which the goods cross a border during export or import.

Default data material

- **Purchasing group:** Key for a buyer or a group of buyers, who is/are responsible for certain purchasing activities.
- **Confirmation Control:** Determines which confirmation categories are expected for a PO item (e.g. order acknowledgment, shipping notification). The code is provided by the requested.
Concerning ARIBA Project the codes are: Z017 or Z018.

Manual update

All manual changes must be justified using the field Note (tab Text). Example: T 4695591 (Freshdesk ticket), VWF 470615 (Workflow Request) or WC 3228443 (Webcycle).

- To link it needs to be filled in the vendor number and the Purchasing Organization. It can be used a reference to copy all the data.

Create Vendor: Initial Screen		
Vendor	406192502	GUGLIELMI GABRIELLA
PurchasingOrganization	II00	Acquisti Italia
Account group		
Template		
Vendor	402440260	
PurchasingOrganization	II00	

Standard Vendor	Selfbilling Vendor
------------------------	---------------------------

NOTE 1: When received a request to update a standard vendor to Selfbilling the request needs to be transferred to the Contracts team.

NOTE 2: The standard payment terms are Y030.

NOTE 3: Requests concerning a red Stock Transport order error ("Supplier not correct in purch.org: check not ERS, GR/IV, pricing proc.") are solved by inserting a flag in the fields **Automatic Purchase Order** and **Acknowledgment Required**. And by insert the code **ST** in the field **Schema Group_Vendor**. To check if the error was solved it is used the transaction **Z1T_CHECK_TRANSFER**.

NOTE 4: When extending an ARIBA vendor to a new Purchasing Organization the CCK **Z017** must be added.

Partner Functions

The link between a vendor and a Partner is performed without approval. The transaction used is **XK01** or **MK01**.

Partner function allows you to identify which functions a partner has to perform in any business process.

Functions:

- **OA** Ordering Address - by default is equal to the VN code. It is used when the address of the Vendor is different from the of the ordering.
 - Created at general data and transported to the system needed. The account group of the OA should be ZxAD.
 - The link and unlink of an OA must be reported to the materials team.
- **VN** Vendor - entity that sells (goods or services).
 - Created at general and purchasing view
- **GS** Goods Supplier Address - the partner who sends the goods in case it is not equal with the vendor himself.
 - Created at general data and purchasing view

- **IP** Invoice presented by - by default is equal to the VN code. It is the entity that will send the invoice.

Created at general data and company/accounting view.

- **F9** Vend. Inv. Recipient - this kind of vendors are used for Selfbilling purposes and are normally requested by Selfbilling Team or directly by the locals. An F9 vendor is an exact copy of the main vendor, but with a different email address.

NOTE: An ARIBA vendor may have a IP vendor not ARIBA. The opposite is also valid.

Manual update

All manual changes must be justified using the field Note (tab Text). Example: T 4695591 (Freshdesk ticket), VWF 470615 (Workflow Request) or WC 3228443 (Webcycle).

- To update the partners of a vendor it needs to be filled in the vendor number and the Purchasing Organization.

Change Vendor: Initial Screen

Vendor: 1100039488 SUEZ RECYCLING & RECOVERY SPAIN S.L.
Purchasing Organization: EIOR Compras TORRELAV. ES

General data

- Address
- Control
- Payment transactions
- Contact Persons

Purchasing organization data

- Purchasing data
- Partner functions

Then you are able to insert (1), update (2) and/or erase a partner (2):

Change Vendor: Partner functions

Vendor: 1100039488 SUEZ RECYCLING & RECOVERY SPAIN S.L. MADRID
Purchasing Org.: EIOR Compras TORRELAV. ES

P..	Name	Number	Name	D..
OA	Ordering Address	1100039488	SUEZ RECYCLING & RECOVERY SPAIN S.L.	<input type="checkbox"/>
VN	Vendor	1100039488	SUEZ RECYCLING & RECOVERY SPAIN S.L.	<input type="checkbox"/>
IP	Invoice presented by	1100039488	SUEZ RECYCLING & RECOVERY SPAIN S.L.	<input type="checkbox"/>
				<input type="checkbox"/>
				<input type="checkbox"/>

NOTE: The VN partner cannot be changed.

Plant view (only available for WP1 system)

The link between a vendor and a plant is performed without approval. It is performed when the information for the Plant is different from the one in the Purchasing Organization (Purchasing or Partner).

The transaction used is **XK02** or **MK02**.

Manual update

All manual changes must be justified using the field Note (tab Text). Example: T 4695591 (Freshdesk ticket), VWF 470615 (Workflow Request) or WC 3228443 (Webcycle).

- To link a vendor with a Plant it needs to be filled in the vendor number and the Purchasing Organization.

Change Vendor: Initial Screen

Vendor: 102140695 LES VENTS DU CAMBRESIS
Purch. Organization: 3003 Energy Europe

Deletion flags

All areas
 Selected company code
 Selected Purchasing Organization

Deletion blocks

General data
 Selected company code incl. general data

NOTE 1: When a vendor is marked for deletion for all the Purchasing Organizations it means it is no longer used. The process of block and mark for deletion at a general level must start.

NOTE 2: Reactivations for a specific Purchasing Organization must be performed by Vendor Workflow Request (with the exception of the requests sent by SRM team).

NOTE 3: Do not flag the field "Selected company code incl. general data" in the Deletion blocks data. The function of the indicator "Deletion blocks General data" is to avoid to physically deleting the record during the archiving.

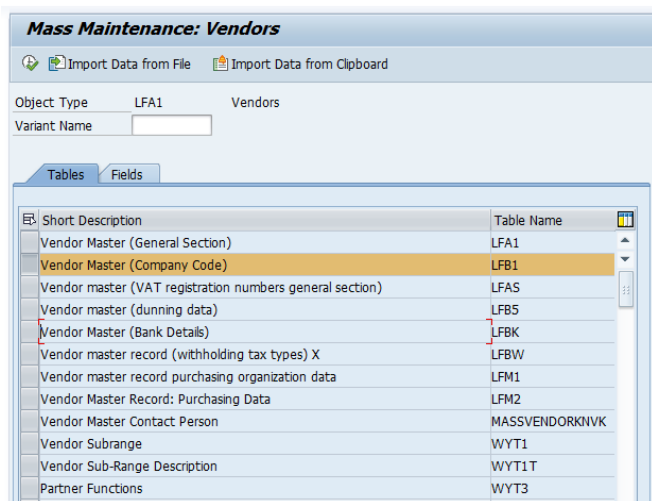

NOTE 4: At company level a vendor can be unblocked several times always with no need for approval.

- The unblock and unmark is performed using the same transaction XK05, XK06 or XK02 by removing the flags.

Mass update

XK99

Modifications and links can be performed massively. For that you use the **XK99**. Then, select the Table or the field and execute :

Mass Maintenance: Vendors

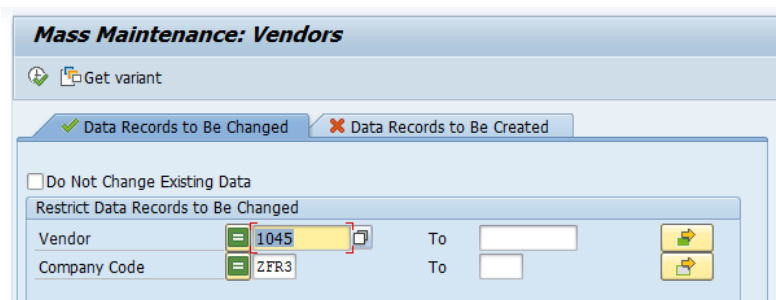

Import Data from File Import Data from Clipboard

Object Type LFA1 Vendors
Variant Name

Tables Fields

Short Description	Table Name
Vendor Master (General Section)	LFA1
Vendor Master (Company Code)	LFB1
Vendor master (VAT registration numbers general section)	LFAS
Vendor master (dunning data)	LFB5
Vendor Master (Bank Details)	LFBK
Vendor master record (withholding tax types) X	LFBW
Vendor master record purchasing organization data	LFM1
Vendor Master Record: Purchasing Data	LFM2
Vendor Master Contact Person	MASSVENDORKNVK
Vendor Subrange	WYT1
Vendor Sub-Range Description	WYT1T
Partner Functions	WYT3

Select the tab ("Data Records to Be Changed" or "Data Records to Be Created") according to your request and then insert the data and execute:

Mass Maintenance: Vendors

Get variant

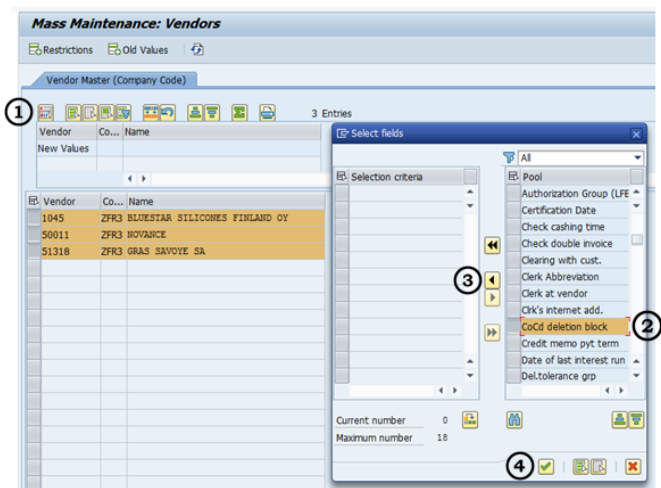

Data Records to Be Changed Data Records to Be Created

Do Not Change Existing Data

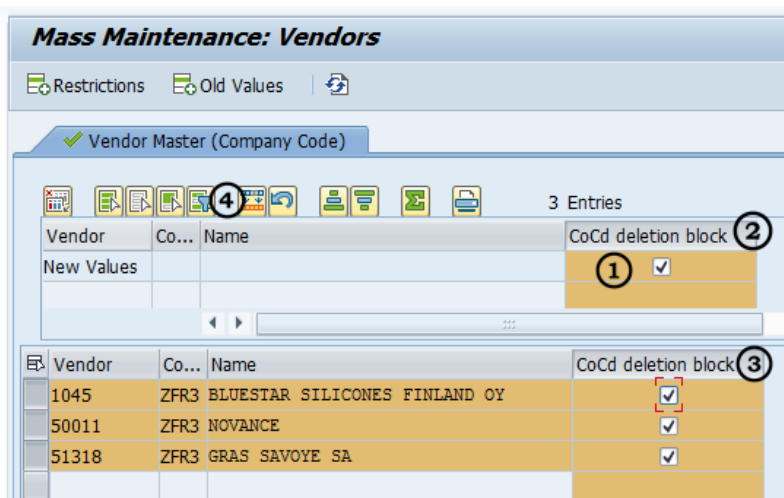

Restrict Data Records to Be Changed

Vendor	<input type="text" value="1045"/>	To	<input type="text"/>	<input type="button" value="Execute"/>
Company Code	<input type="text" value="ZFR3"/>	To	<input type="text"/>	<input type="button" value="Execute"/>

Then, clicking in the button  (1) you will be able to select the fields (2 and 3) that you want to change (4):

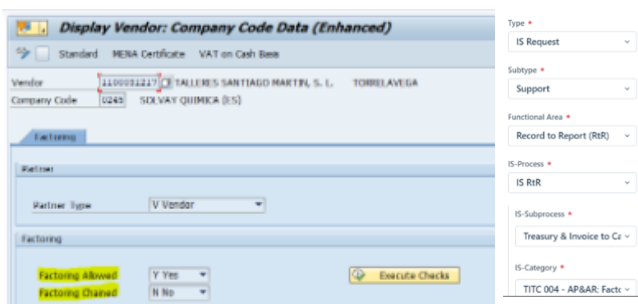

To change all the vendors you insert the data in the first table (1), click in the field Name on both tables (2 and 3) and then click in the button  (4):

Then click in the button SAVE .
