Cost Element

Enter the code of the new group and its description

Be careful, when the code is created, you can not change it anymore. If it is wrong and not consistent with the existing codification, you must delete the group and create a new one.

2. Delete an existing group

Click on the group you want to delete

and then click

The group to be deleted is highlighted in red

Click the button remove

Before deleting a group, make sure there is no more cost element included in the group otherwise you must move them before in another group.

3. Move an existing group

Click on the group you want to move and

then click

The group to be moved is highlighted in red

Click on the group in which you want to include the group and then click

The group has moved

4. Rename a group

You can easily change the description of a group

Remember that hierarchies are used in reporting tools. To make them easier to read:

- Maintain consistency in descriptions (avoid mixing upper and lower case letters)
- Avoid too long descriptions

5. Include a new cost element

Click the group in which you want to include a new cost element

and then click

you can click several times if you want to include more than 5 cost elements

Enter the code of the cost element you want to include

6. Change the group of a cost element

Click on the cost element you want to move

and then click

The cost element to be moved is highlighted in red

Click on the group in which you want to include the cost element and then click

The cost element has moved

STEP 4

Once your changes are done

There is a message at the bottom of the page

You can leave the transaction
